

REQUEST FOR PROPOSAL AGRICULTURAL CONSERVATION EASEMENT PROGRAM DESIGN AND RESTORATION ASSISTANCE

AGENCY

UNITED STATES DEPARTMENT OF AGRICULTURE
Natural Resources Conservation Service (NRCS) Little Rock, Arkansas

CATALOG OF FEDERAL DOMESTIC ASSISTANCE (CFDA) NUMBER

10.072 – Wetlands Reserve Program (WRP)
10.931 – Agricultural Conservation Easement Program (ACEP)
10.923 – Emergency Watershed Protection Program (EWP)

SUMMARY

NRCS, an agency under the United States Department of Agriculture (USDA), in Arkansas is requesting applications to provide planning, design and implementation of restoration activities on eligible Wetlands Reserve Program, Agricultural Conservation Easement Program, and Emergency Watershed Protection properties. The objective of WRP/ACEP/EWP is to provide technical and financial assistance to landowners in planning, designing and implementing wetland and associated upland restoration plans that maximize wildlife habitat in wetland systems, as well as provide water quality improvements, reduced soil erosion, reduced impacts of flooding and provide wildlife habitat opportunities for threatened and endangered species. Applicant's will be responsible for assisting landowners by providing technical assistance necessary to develop and implement WRP/ACEP/EWP restoration plans, while at the same time improving and protecting wetland habitat for environmental benefits. Performance may include any part or all operations necessary to perform engineering surveys, preliminary and final engineering designs, inspection, and construction management activities for various wetland restorations, enhancement and creation practices; and other related conservation practices that meet NRCS standards and specifications.

Applications are being requested from eligible non-government organizations, tribes, or individuals for competitive consideration of cooperative agreement awards with a base year and up to four, one-year option periods.

This notice identifies the objectives, eligibility criteria, and application instructions for design and restoration assistance proposals. Applications will be screened for completeness and compliance with the provisions of this notice. Incomplete applications will be eliminated from competition, and notification of elimination will be mailed to the applicant.

PROPOSAL DUE DATE

Proposals must be received in the NRCS State Office by 5 p.m., Central Daylight Time (CDT) on December 30, 2019.

Proposals may be hand-delivered or mailed. Mailed copies should be sent via United States Postal Service, express mail, or overnight courier service. Applicants may also submit their application electronically via grants.gov. If you choose to submit your application via grants.gov, visit www.grants.gov/apply and follow the instructions. All applications, regardless of how they are submitted, must be received by NRCS **by 5:00p.m. Central Time, December 30, 2019.**

Note: NRCS is not responsible for any technical malfunctions or Web site problems related to Grants.gov submissions. Applicants should begin the Grants.gov process in advance of the submission deadline to avoid problems.

NRCS will announce the selected applications on or around a projected date of January 10, 2020, following announcement of the projects selected at the national level.

ADDRESSES

Proposals sent via United States Postal Service, express mail, overnight courier service, or hand-delivered:

Randy Childress
Assistant State Conservationist for Easements
USDA - Natural Resources Conservation Service
Room 3416, Federal Building
700 West Capitol Avenue
Little Rock, AR 72201

The hard copies mailed or hand-delivered must be received in the Arkansas State Office by 5:00 p.m. CDT on December 30, 2019. Proposals sent electronically must be uploaded to www.grants.gov and must be entered successfully by 5:00 p.m. CDT on December 30, 2019.

For more information on the technical requirements of the program, contact:

Cindy Neal
ACEP-WRE Coordinator
USDA - Natural Resources Conservation Service
Room 3416, Federal Building
700 West Capitol Avenue
Little Rock, AR 72201
Phone: (501) 301-3114
E-mail: cindy.neal@usda.gov

SUPPLEMENTARY INFORMATION

I. FUNDING OPPORTUNITY DESCRIPTION

A. Legislative Authority

The Wetlands Reserve Program (WRP) was authorized as part of the Food Security Act of 1985, Title XII, Public Law 99-198, as amended; Food, Agriculture, Conservation and Trade Act of 1990, Title XIV, Section 1237, Public Law 101-624, 104 Stat. 3584, 16 U.S.C. 3837, as amended; Omnibus Budget Reconciliation Act of 1993; Federal Agriculture Improvement and Reform Act of 1996; Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act of 1998 and Agriculture, Rural Development, Food and Drug Administration and Related Agencies Appropriations Act of 2001 and as amended, Farm Security and Rural Investment Act of 2002 and Section II of the Food, Conservation and Energy Act of 2008, P.L.110-234 authorized the Secretary of Agriculture to provide technical assistance under this program to eligible producers. It was repealed P.L. 113-79, Title II, §270(a), Feb. 7, 2014, 128 Stat. 767. However, there are still remaining funds that are left out of the congressional allowance for this program as well as remaining restoration needs.

The Emergency Watershed Protection Program-Floodplain Easements (EWPP-FPE) was authorized in American Recovery and Reinvestment act of 2009, Public Law 111-5; Section 215 of the Flood Control Act of 1950, Public Law 81516; the Agricultural Credit Act of 1978, Section 403, Public Law 95-334, 33 U.S.C. 701B01, as amended by the Federal Agriculture Improvement and Reform Act of 1996, Section 382, Public Law 104-127, 16.U.S.C. 2203 authorized the Secretary of Agriculture to provide technical assistance under this program to eligible producers. The Secretary may request the services of non-Federal entities to assist the Secretary in providing the technical assistance necessary to develop and implement conservation programs under this title. The Secretary of Agriculture delegated the authority for the administration of WRP/EWPP-FPE to the Chief of the Natural Resources Conservation Service.

The Agricultural Conservation Easement Program (ACEP) was established under the Food Security Act of 1985, Title XII, Part Subtitle D, Section 1237, Public Law 99-198; amended by the Agricultural Act of 2014, Pl. 113-79; 16 U.S.C. 1265.

The Federal Grant and Cooperative Agreement Act of 1977 (31 U.S.C. 6301-6308, Public Law 95-224) authorized NRCS to enter into grants and cooperative agreements to accomplish a public purpose or stimulation of an activity authorized by statute. NRCS may do this through entering into cooperative agreements with a service provider or other cooperator to stimulate the

availability of technical assistance. The assistance being sought through this request relies on guidance contained in the Technical Service Provider Final Rule, 7 CFR Chapter VI, Part 652 published November 29, 2004 and revised January 1, 2009. Applicants whose proposals are recommended for funding must agree to be bound by the final rules as a condition of receiving an award.

B. Overview

The purpose of the Wetlands Reserve Program (WRP) is to conserve, protect and enhance the nation's wetland ecosystems. The purpose of the Agricultural Conservation Easement Program is to establish an agricultural conservation easement program for the conservation of eligible land and natural resources through easements or other interests in the land. The purpose of the Emergency Watershed Protection – Floodplain Easement Program (EWPP-FPE) is to provide for restoration, protection, maintenance and enhancement of the functions of the floodplain, conserve natural values include fish and wildlife habitat, water quality, flood water retention, ground water recharge and safeguard lives and property from floods, drought and the products of erosion. The programs promote the restoration, enhancement, protection, maintenance and management of wetland systems and adjacent land that would contribute significantly to wetland functions and values. Through WRP, ACEP, and EWPP-FPE, landowners may receive financial and technical assistance to install or implement structural or vegetative wetland and associated upland restoration practices on eligible land. WRP/ACEP/EWPP-FPE provides that the Secretary may request the services of, and enter into cooperative agreements with, non-Federal entities to assist in providing technical assistance necessary to develop and implement conservation programs under these programs. The agency is directing resources toward the restoration of degraded wetlands across the state of Arkansas; with emphasis in the historic bottom-land hardwood regions.

NRCS is requesting applications from qualified individuals and organizations that share a common interest in the conservation and restoration of wetland resources throughout Arkansas.

C. Project Description

The objective of WRP/ACEP/EWPP-FPE is to provide technical and financial assistance to landowners in planning, designing and implementing wetland and associated upland restoration plans that maximize wildlife habitat in wetland systems, as well as provide water quality improvements, reduced soil erosion, reduced impacts of flooding and provide wildlife habitat opportunities for threatened and endangered species. Applicants will be responsible for assisting producers by providing technical assistance necessary to develop and implement WRP/ACEP/EWPP-FPE restoration plans, while at the same time improving and protecting wetland habitat for environmental benefits. Performance may include any part or all operations necessary to perform vegetative and hydrology restoration in a timely and effective manner. Work shall include any or all of the following activities: engineering surveys,

preliminary and final engineering designs, and construction management activities for various wetland restorations, enhancement and creation practices; and other related conservation practices that meet NRCS standards and specifications. All services shall be provided in accordance with applicable NRCS policy and criteria that can be found at the following websites: NRCS Field Office Technical Guide: <http://efotg.nrcs.usda.gov>; NRCS National Irrigation Guide <http://irrigationtoolbox.com/NEH/Part%20652%20National%20Irrigation%20Guide/>; and NRCS National Engineering Handbook, and National Engineering Manual References: <http://directives.sc.egov.usda.gov/RollupViewer.aspx?hid=17092>.

Surveys required may consist of, but are not limited to, any part or all of the following activities: topographic surveys, design surveys, construction layout surveys, construction quality assurance surveys, and quantity surveys. All survey information shall be submitted to the NRCS on CD or DVD containing the digital files in .dwg format compatible with AutoCad 2014. The .dwg file will be referenced to the appropriate State Plan Coordinate System, North American Datum 1983, local zone, U.S. Survey Fleet and a basis of bearing to grid north. In addition, a CD shall be provided to the NRCS containing the ESRI ARC Info export/Info export (.e00) or shapefile (.shp, .dbf, .shx). The projection must be clearly defined. In addition, hard copies of the survey data, notes, computations, etc. shall be provided to the NRCS. Service providers will perform all work in close coordination with the NRCS ACEP-WRE Specialist, District Conservationist (DC) and Area Engineer. Once a project is received the awardee will complete the assigned work during the performance period identified in each agreement.

Wetland Engineering Practices and Biological Practices may include but are not limited to the following Conservation Practices: Wetland Restoration (657), Wetland Enhancement (658), Wetland Creation (659), Open Channel (582), and associated practice such as Critical Area Planting (342), Fence (382), Range Planting (550), Tree/Shrub Establishment (612), Tree/Shrub Preparation (490), Mulching (484), and Structure for Water Control (587); and others as deemed necessary and applicable by the Arkansas NRCS. All practices are described in the NRCS electronic FOTG, which can be found at: <http://www.nrcs.usda.gov/technical/efotg/>.

The awardee will be expected to provide for the inspection and quality control of each WRP/ACEP/EWPP-FPE restoration contract, provide to NRCS quarterly Federal Financial Reports (SF425) and semi-annual progress reports, submit reimbursement requests (SF270) via EZFEDS, complete a compliance check worksheet according to NRCS specifications, complete the design check out sheets for water control structures, complete the Compliance Documentation for Herbaceous Vegetation, and provide any other documentation as may be required by the NRCS standards and specifications.

Location of Services: Throughout Arkansas

USDA Service Center Location: All Arkansas Field Offices

Equipment: Vehicles, computers, surveying equipment, etc.

Arkansas NRCS anticipates the following involvement, which is deemed substantial, in carrying out projects funded with Federal assistance provided through a cooperative agreement under this announcement.

Arkansas NRCS will:

- Conduct an initial briefing at the Arkansas NRCS State Office in Little Rock, Arkansas prior to award to discuss the goals and objectives of the project and items of work to be conducted under the agreement.
- Designate a liaison to participate in the planning and management of the cooperative agreement and coordinate activities between the awardee and Arkansas NRCS.
- Identify and prioritize work assignments at the Arkansas State Office level with consultation from the Arkansas WRP team and local field offices.
- Provide for state level coordination/guidance of the technical specialists.
- Provide quality assurance for services provided under the agreement.
- Provide access to NRCS technology and technical tools to the maximum extent possible.
- Approve all new technologies and innovative practices, including applicable standards and specifications, prior to the applicant applying technical services for those and practices. NRCS will identify and prioritize work assignments for completing activities required to implement the wetland and associated upland restoration components of each conservation plan.
- NRCS will monitor the awardee's progress and suspend work if agreement requirements are not met.

II. Funding Availability

All awards are subject to the availability of sufficient funds being appropriated by Congress and apportioned by the Office of Management and Budget (OMB) to support the addition and full cost of service to implement technical assistance activities. Cooperative agreements will be awarded competitively to applicants certified as a Technical Service Provider (TSP) meeting the USDA NRCS national criteria established for certification. The certification criteria is located in "TechReg," an NRCS web based certification application program found at:

<http://www.nrcs.usda.gov/wps/portal/nrcs/main/national/programs/technical/tsp/>.

Cooperative agreements have been determined to be the appropriate funding instrument because of the substantial involvement of NRCS in providing technical oversight and coordination of planning, designing and implementing wetland and associated upland

restoration activities.

It is anticipated that approximately **\$10 million** will be available for planning, designing and implementing wetland and associated upland restoration plans in Fiscal Year 2020. The amount of funds available for this program is not fixed and may vary considerably from the current funding level. Amendments to the agreement(s) may be developed upon availability of funding in future years (approximately a 5-year period). The work will be performed statewide.

The cooperative agreements will include one base-year and four, one-year option periods. Work under this agreement is subject to satisfactory negotiation of individual cooperative agreements. There will be no minimum or maximum price on any individual agreement. The maximum order amount for each cooperative agreement period (base-year and each option-year) shall be determined by available funds. There shall be no guaranteed minimum amount for the base year or for the option periods, if exercised. Multiple cooperative agreements may be awarded as a result of this announcement. Projects will be ordered on an as-needed basis beginning from the date of the award of the agreement for a period not to exceed five years.

The amount of funding awarded under individual cooperative agreements will be based on NRCS's Arkansas Cost Allowance (Attachment B). The amount of each individual agreement shall not exceed the maximum amount allowed under the price list based on the number of acres contemplated. All applicants must provide a narrative stating that they are capable of completing the work described in this proposal within the budget set by the NRCS Arkansas Cost Allowance.

III. Eligibility Information

Applicants must be certified as a Technical Service Provider (TSP) meeting the USDA NRCS national criteria established for certification. The certification criteria is located in "TechReg," an NRCS web based certification application program found at: <http://www.nrcs.usda.gov/wps/portal/nrcs/main/national/programs/technical/tsp/>. If applicant is selected and certification requirements are not met, no tasks will be assigned.

A listing of possible eligible applicants is as follows:

Governmental

- State governments
- County governments
- City or township governments
- Special district governments

Non-Governmental

- Nonprofits having a 501(c) (3) status with the IRS, other than institutions of higher education

- Nonprofits that do not have a 501(c) (3) status with the IRS, other than institutions of higher education
- For profit organizations with conservation focused objectives

IV. Application and Submission Information

A. How to Obtain Application Materials

All OMB standard forms necessary for application submission are posted on the following site: http://www.grants.gov/agencies/aapproved_standard_forms.jsp

Standard Form 424 - Application for Federal Assistance (submit w/application)

Standard Form 424A - Budget Information – Non-construction Programs

Standard Form 424B - Assurances – Non-Construction Programs (submit w/application)

Standard Form 424C - Budget Information – Construction Programs (used on future orders)

Standard Form 424D - Assurances – Construction Programs (submit w/application)

SF-LLL - Disclosure of Lobbying Activities

Standard Form 425/425A - Federal Financial Report (after award)

Standard Form 270 - Request for Advance or Reimbursement (after award)

AD-1047 - Certification Regarding Debarment, Suspension and Responsibility Other Matters

AD-1048 - Certification Regarding Debarment, Suspension Ineligibility and Voluntary Exclusion

B. Application Content and Format

Applications must contain the information set forth below in order to receive consideration for an award. Applicants should not assume prior knowledge on the part of NRCS or others as to the relative merits of the work described in the application. Applications must be submitted in the following format:

- ° Applications are to be typewritten on 8 ½" x 11" white paper, double spaced and on one side only
- ° The text of the proposal must be typewritten in a font no smaller than 12-point, with one-inch margins
- ° Applications must include all required forms and narrative sections described below; incomplete applications will not be considered
- ° Do not include letters of support, endorsement or recommendations for award

It is the sole responsibility of the applicant to complete the grant or cooperative agreement application. Applicants should refer to <http://www.grants.gov> to apply. Further, the applicant must respond to the Evaluation Factors for Award and

include project narratives with a detailed discussion of the project and methodology to be used.

1. Cover Sheet: Applications must use Standard Form 424, including SF 424A and 424B, with the required information filled in and the certified assurance signed as the cover sheet for their proposal. NOTE: All applicants must provide DUNS number in Block 5. By signing the application form the applicant is providing the required certifications set forth in 7 CFR Part 3017 regarding Debarment and Suspension and Drug Free Workplace, and 7 CFR Part 3018, regarding Lobbying.
2. Project Funding: Project funding will be based on the NRCS Arkansas Cost Allowance and as such, applicants must include a statement identifying that they are capable of completing the work described in this proposal within the budget set by the NRCS Arkansas Cost Allowance.
3. Project Description: The application shall include a narrative statement that addresses the following as a minimum:
 - a. A description of the resources and experience of the organization necessary to successfully perform planning, design and implementing wetland and associated upland restoration activities.
 - b. A brief description of the capabilities to perform tasks as assigned under the cooperative agreement, including a brief description of the organizational entity and of the qualifications, employment status, current responsibilities, and proposed level of effort for the project coordinator and staff responsible for implementation. Resumes for key personnel should be included in an appendix to the application.
 - c. A list of past experiences with providing planning, design and implementing wetland and associated upland restorations for conservation contracts.
 - d. The application may include an appendix. Material should be included only when necessary to support information provided in the narrative. Copies of documents, brochures, etc. are encouraged to demonstrate experience, knowledge, skills and abilities.
4. Certifications: All applicants must include a signed SF 424B, Assurances, Non-Construction Programs. By signing and submitting an application, applicants assure and certify that they are in compliance with the following from 7 CFR:
 - a. Part 3017, Government wide Debarment and Suspension (Non-procurement);
 - b. Part 3018, New Restrictions on Lobbying;
 - c. Part 3021, Government wide Requirements for Drug-Free Workplace (Financial Assistance).

5. DUNS Number: A Dun and Bradstreet (D&B) Data Universal Numbering System (DUNS) number is a unique nine-digit sequence recognized as the universal standard for identifying and keeping track of over 70 million businesses worldwide. A Federal Register notice of final policy issuance (68 FR 38402) requires a DUNS number in every application (i.e., hard copy and electronic) for a grant or cooperative agreement (except applications from individuals) submitted on or after October 1, 2003. Therefore, potential applicants should verify that they have a DUNS number or take the steps needed to obtain one. For information about how to obtain a DUNS number go to <http://www.grants.gov/RequestDUNS> or call 1-866-705-5711. Please note that the registration may take up to 14 business days to complete.
 6. Required SAM Registration: The System for Award Management (SAM) is a database that serves as the primary Government repository for contractor information required for the conduct of business with the Government. This database will also be used as a central location for maintaining organizational information for organizations seeking and receiving grants or cooperative agreements from the Government. Applicants must register with SAM. To register, visit <http://www.sam.gov>. Allow a minimum of 10 days to complete the SAM registration.
- C. How to Submit a Written Application: Applicants must submit one signed original and three complete copies of each project application. Each copy of the proposal must be bound or otherwise secured in the upper left-hand corner. Applications submitted via facsimile or email will not be accepted.
- Submit written applications to:
Randy Childress
Assistant State Conservationist for Easements
USDA, Natural Resources Conservation Service
Room 3416, Federal Building
700 West Capitol Street
Little Rock, AR 72201
- D. Application Due Date: Applications must be received no later than December 30, 2019, 5:00 p.m. Central Time. Applications received after that time will not be considered. An application's postmark date is not a factor in whether an application is received on time. The applicant assumes the risk of any delays in delivery. Applications will not be accepted by facsimile machine submission or by email.

AGENCY CONTACT: Cindy Neal, (501) 301-3114

- E. Acknowledgement of Submission: Proposals received by the due date will be acknowledged with an official letter. If an applicant has not received an acknowledgment within 30 days of the submission, the applicant must contact the administrative contact (see “Agency Contacts” above) immediately. Failure to do so may result in the application not being considered for funding.

V. Application Review Information

- A. Review and Selection Process: Arkansas NRCS anticipates the possibility of multiple awards for this announcement. Prior to the evaluation review, each application will be screened for completeness and compliance with the provisions of this notice by the appropriate NRCS staff. Incomplete applications and those that do not meet the provisions of this notice will be eliminated from competition and notification of elimination will be mailed to the applicant.

Applications meeting the provisions of this notice will be evaluated by an evaluation team against the evaluation criteria. The evaluation team will make recommendations to the State Conservationist for final selection and award.

- B. Criteria for Application Evaluation: The applications will be evaluated using the following criteria:

Threshold Questions:

1. Does the organization have a Technical Service Provider?
2. Does the organization have a Registered Professional Engineer in the State of Arkansas on staff?
3. Does the organization have a surveyor/engineering technician capable of meeting the requirements stated in this announcement to enable the planning, design, and implementation of engineering practices?

If yes, then the following selection Criteria will be considered:

- 25% - Specialized experience and technical competence in the type of work required.
- Demonstrates an understanding the intent of WRP/ACEP/EWP-FPP
 - Experience working on wetland and/or floodplain restoration in the State of Arkansas or similar ecosystems.
 - Shares a similar mission to support natural resources conservation efforts with private landowners.

25% Professional Qualifications/ Performance Personnel

25% - Organizational Capabilities

15% - Capacity to accomplish the work

10% - Past Performance

Attachment B – Cost Allowance -- ARKANSAS

	NRCS Practice Code	Technical Assistance (TA)	Financial Assistance (FA) Actual Costs Not to Exceed Amount Payment = Act. Costs + 10% ** indicates no Additional FA added
VEGETATIVE ESTABLISHMENT			
Tree/Shrub/ Establishment	612		
Bare-root Seedlings (Based on 302 trees/acre)		\$ 40.00/Acre	\$176.00/Acre
2.5 gallon containerized		\$2.00 EA	\$20.00 Each
