

FINANCIAL ASSISTANCE FUNDING OPPORTUNITY ANNOUNCEMENT

Department of Energy (DOE) Office of Fossil Energy and Carbon Management (FECM)

Regional Scale Collaboration to Facilitate a Domestic Critical Minerals Future: Carbon Ore, Rare Earth, and Critical Minerals (CORE-CM) Initiative

Funding Opportunity Announcement (FOA) Number: DE-FOA-0003077

FOA Type: Initial

Assistance Listing Number: 81.089 Fossil Energy Research and Development

FOA Issue Date:	4/24/2024
Submission Deadline for Full Applications:	6/24/2024 5:00 PM ET
Expected Date for Selection Notifications:	October 2024
Expected Date for Award:	March 2025

- To apply to this FOA, applicants must register with and submit application materials through NETL eXCHANGE at <https://NETL-eXCHANGE.energy.gov/>.
- Applicants must designate primary and backup points-of-contact in eXCHANGE with whom DOE will communicate to conduct award negotiations. If an application is selected for award negotiations, it is not a commitment to issue an award. It is imperative that the applicant/selectee be responsive during award negotiations and meet negotiation deadlines. Failure to do so may result in cancelation of further award negotiations and rescission of the selection.

Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.

Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include FOA name and number in subject line.

Notice to Applicants of Registration Requirements

There are several one-time actions that must be completed before submitting an application in response to this Funding Opportunity Announcement (FOA) (e.g., register with the System for Award Management (SAM), obtain a Unique Entity Identifier (UEI) number, register with Grants.gov, register with NETL eXCHANGE, and register with FedConnect.net). It is vital that applicants address these items as soon as possible. Some may take several weeks, and failure to complete them could interfere with an applicant's ability to apply to this FOA.

- **SAM** - Applicants must register with SAM at <https://www.sam.gov/> prior to submitting an application in response to this FOA (unless the applicant is exempt from those requirements under 2 CFR 25.110). Designating an Electronic Business Point of Contact (EBiz POC) is an important step in SAM registration. Failure to register with SAM will prevent your organization from applying through NETL eXCHANGE. The applicant must maintain an active SAM registration with current information at all times during which it has an active Federal award or application under consideration.

Due to the high demand of SAM registrations and UEI requests, entity legal business name and address validations are taking longer than expected to process. Entities should start the SAM and UEI registration process as soon as possible. If entities have technical difficulties with the SAM registration or UEI validation process they should utilize the [HELP](#) feature on SAM.gov. SAM.gov will work entity service tickets in the order in which they are received and asks that entities not create multiple service tickets for the same request or technical issue. Additional entity validation resources can be found here: [GSAFSD Tier 0 Knowledge Base - Validating your Entity](#).

- **UEI** - Applicants must obtain an UEI from the SAM to uniquely identify the entity. The UEI is available in the SAM entity registration record.

NOTE: First tier subawardees/subrecipients at all tiers must also obtain an UEI from the SAM and provide the UEI to the Prime Recipient before the subaward can be issued.

- **Grants.gov** - Applicants must register with Grants.gov at <https://www.grants.gov/register> to receive automatic updates about this FOA
- **NETL eXCHANGE** - Applicants must register through the NETL eXCHANGE at <https://NETL-Exchange.doe.gov>. This account will allow the user to apply to any open FOAs that are currently in eXCHANGE.
- **FedConnect** - Applicants must register with FedConnect at <https://www.fedconnect.net> to receive notification that a funding agreement has been executed by the

I. Funding Opportunity Description

A. Authorizing Statutes

The programmatic authorizing statutes are:

- Public Law (PL) 95-91, DOE Organization Act, as amended
- P.L. 116-260, Div. Z, Energy Act of 2020, Title VII, Sec. 7001, as amended, codified at 42 U.S.C. 13344

Awards made under this announcement will fall under the purview of 2 Code of Federal Regulations (CFR) Part 200 as supplemented by 2 CFR Part 910.

B. Background/Description

i. Background and Purpose

In 2020, NETL issued the Funding Opportunity Announcement (FOA) DE-FOA-0002364 for the first phase of the Carbon Ore, Rare Earth, and Critical Minerals (CORE-CM) Initiative for United States (U.S.) Basins to advance the use of unconventional and secondary feedstocks to produce rare earth elements (REEs), critical minerals (CMs), and novel valuable, nonfuel, carbon-based products (CBPs) as part of our next generation of domestic U.S. materials. Realizing the CM potential in these feedstocks would enable the United States to reduce its dependence on critical minerals and materials (CMM) imports and establish and advance a domestic (CMM)¹ supply chain. The purpose of this FOA DE-FOA-0003077 is to expand the work of the CORE-CM Initiative basinal assessment (see Appendix J) and development of critical mineral supply chains from unconventional and secondary feedstocks. This FOA (DE-FOA-0003077) will expand the focus from the basin scale to a larger, regional scale with the goal of nationwide coverage. Projects will also consider environmental justice, the ongoing energy transformation, and impacts on communities. Successful Applicants do not have to be current or past awardees under DE-FOA-0002364 (Phase 1). Collaboration is strongly encouraged both within the Applicant team and with neighboring regions

¹ The term “Critical Material” includes critical minerals designated by the secretary of the Interior. Section 7002(a)(2) of the Energy Act of 2020 defines critical material to mean: (A) any non-fuel mineral, element, substance, or material that the Secretary of Energy determines – (i) has a high risk of a supply chain disruption; and (ii) serves an essential function in one or more energy technologies, including technologies that produce, transmit, store, and conserve energy; or (B) a critical mineral. (30 U.S. C. § 1606(a)). The term “critical minerals and materials” or “CMM” used throughout this document means “Critical Material” as defined in section 7002(a) of the Energy Act of 2020. [2023 Critical Materials Assessment \(energy.gov\)](#)

Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.

and the inclusion of DE-FOA-0002364 (Phase 1) project teams or partners is highly encouraged to demonstrate continuity.

ii. Background

Public Law 116-94 (December 20, 2019) provides funding for and authorizes the Department of Energy (DOE) to carry out fossil energy research and development activities under the authority of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including “conducting inquiries, technological investigations and research concerning the extraction, processing, use, and disposal of mineral substances without objectionable social and environmental costs (30 U.S.C. 3, 1602, and 1603).”

For the past quarter century, China has been the dominant supplier of CMM for global markets. The importance of CMM cannot be overstated. With hundreds of end-uses and applications in clean energy production, oil refining, electronics, batteries for electric vehicles, phosphors for lighting, and defense technologies, rare earths are critical to the stability and growth of modern society. However, the U.S. is heavily reliant on imports to supply REE and associated compounds as well as intermediate and end-products containing rare earths as permanent magnets, motors, and turbines. As such, a secure, reliable, and sustainable domestic supply of these strategic resources is both essential to the continued health of our Nation’s energy and electronics industries and is an important contributor to national security.

The DOE, National Energy Technology Laboratory’s (NETL) *Feasibility of Recovering Rare Earth Elements* program initiated research in 2014 to address the technical and economic feasibility of recovering REE from domestic U.S. coal-based resources, including run-of-mine coal, prepared coal, partings, pit cleanings, coal preparation refuse, tailings, clay and shale interstitial inclusions and over/under-burden materials, power generation ash, acid mine drainage fluids and precipitated sludges. Research focused on using commercial and second-generation processes in proof-of-concept through pilot-scale testing to extract and separate REE from U.S. coal-based resources in an environmentally benign fashion. Feedstocks initially containing 300 ppm total REE (except for acid mine drainage fluids) were used to produce REE pre-concentrates (2wt%, 20,000 ppm) and high purity concentrates (90–99wt%, 900,000–990,000 ppm). In DOE-NETL’s *Feasibility of Recovering Rare Earth Elements* Program, REE are defined as the lanthanide series of elements – lanthanum, cerium, praseodymium, neodymium, (promethium), samarium, europium, gadolinium, terbium,

Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.

dysprosium, holmium, erbium, thulium, ytterbium, and lutetium, and which additionally include scandium and yttrium.

In 2019, NETL's *Feasibility of Recovering Rare Earth Elements* program was expanded to include recovery of other CM from coal-based resources and so the program name has changed to *Critical Minerals Sustainability*. Critical minerals that were identified in Executive Order 13817² include aluminum (bauxite), antimony, arsenic, barite, beryllium, bismuth, cesium, chromium, cobalt, fluorspar, gallium, germanium, graphite (natural), hafnium, helium, indium, lithium, magnesium, manganese, niobium, platinum group metals, potash, the rare earth elements group, rhenium, rubidium, scandium, strontium, tantalum, tellurium, tin, titanium, tungsten, uranium, vanadium, and zirconium.

In addition to the extraction, separation, recovery and purification of CMM from coal-based resources, the program has addressed field sampling and chemical characterization of over 4,200 domestic coal, coal refuse, ash, coal seam and interstitial clays/shales and acid mine drainage and associated sludge samples. These materials contain REE concentrations in excess of 300 ppm for use as the "best" potential feedstock materials in current DOE-funded REE-CM extraction, separation and recovery facilities (bench-scale and small pilot-scale). Sample materials were collected from Northern, Central, and Southern Appalachia, Gulf Lignite, Illinois, Powder River, Lignite/Williston, Rocky Mountain, Canyon City, Raton, Uinta-Piceance, and the West/Northwest Basins. Assays (chemical characterization analyses) were performed to determine the REE and/or CM concentrations contained in these domestic field sample materials. These results are documented in NETL's publicly available Energy Data eXchange (EDX) website.³

DOE-NETL has shown the technical feasibility of recovering REE from coal-based resources as high purity mixed rare earth oxides (MREO). If separated from each other, individual high purity rare earth oxides (REO) could ultimately be converted into rare earth metals (REM) for use in intermediate as well as end-products for commodity or national defense use.

Using carbon contained in coal as a carbon source to develop new valuable, nonfuel, products is the focus of DOE-NETL's *Advanced Coal Processing Program (currently the Minerals Sustainability Carbon Ore Processing program)*. As transformational coal-to-carbon products research, cost-competitive products are being developed:

² List of Critical Minerals posted in Federal Register/Vol. 83, No. 97/Friday, May 18, 2018/Notices

³ <https://edx.netl.doe.gov/ree-cm/>

- Valuable carbon fibers and nanomaterials for use in non-traditional products as structural materials (i.e., strength-enhancing additives for cement-based products)
- 3D printing materials (i.e., fluids, conductive inks, plastics/composites)
- Energy storage and electrode materials (i.e., supercapacitors and lithium-ion batteries)
- Carbon nanomaterials (i.e., graphene, graphene oxide, carbon quantum dots, and carbon nanotubes)
- Carbon foam (i.e., aerospace and automotive structural applications and ship building industries)
- Advanced carbon-carbon composites and carbon fiber reinforced carbon composites (CFRCCs)

Additionally, under the Carbon Ore Program –U.S. coal databases have been revisited, expanded, and made easily and publicly accessible to enable coal suppliers and power plant operators the capability to estimate the impacts of coal properties and compositions on the efficiency, reliability and emissions of both existing and new power generation facilities. This COAL DATA⁴ initiative is a geo-data and computational fluid dynamics (CFD) modeling effort that uses scientific and big data computing to efficiently accumulate, combine, organize, and analyze coal characteristic data.

Ultimately, COAL DATA will facilitate industry efforts to match U.S. coal producers and coal consumers in both the domestic and export market to aid in the penetration of new technologies, including those related to the beneficiation and co-production of critical minerals and other materials. COAL DATA will become a useful tool for future coal research initiatives, including efforts at improving production efficiency, infrastructure, coal transport network efficiency, and fostering the development of new markets for coal.

Additional effort is underway at NETL's Research and Innovation Center (RIC) for development of a systematic data methodology to assess the REE concentration in coal and related sedimentary strata for predicting REE concentration and extractability (see Appendix I). The outcome of this effort will be the delivery of a novel, data-driven assessment tool that can be used to predict the occurrence of promising REE-bearing deposits associated with coal bearing sedimentary strata, and for areas with enough data, quantify predicted REE resource volumes. The effort is aimed at supporting the

⁴ <https://netl.doe.gov/sites/default/files/IG-American-Coal-Database.pdf>

development of technologies that lead to the commercialization of domestic REE deposits.

The primary deliverable from the NETL RIC project is the Unconventional Rare Earth Element and Critical Mineral (URC) ML/AI tool. This method, a strategic resource assessment method for REE's in sedimentary systems, enabled by a tool that is enhanced with "smart data" capabilities to (1) determine areas of prospectivity and (2) ultimately assess if REE occur in adequate concentrations and volumes to support commercial extraction from U.S. basins. Underpinning the assessment approach will be a methodical and logical synthesis of three-dimensional controls on the coal-REE geologic system, based on existing geoscience literature validation efforts.⁵ The URC tool being developed will be evaluated with other peer-reviewed methodologies to aid in the understanding of CMM resources. This effort will be coordinated with ongoing research being conducted through the United States Geological Survey (USGS). The USGS Energy and Minerals Mission Area conducts research and assessments on the location, quantity and quality of mineral and energy resources, including the EarthMRI Program. CORE-CM will complement efforts being conducted through the USGS.

iii. Research and Development Community Benefits Plan (April 2023)

DOE is committed to investing in research and development (R&D) innovations that deliver benefits to the American public and leads to commercialization of technologies and products that foster sustainable, resilient, and equitable access to clean energy. Further, DOE is committed to supporting the development of more diverse, equitable, inclusive, and accessible workplaces to help maintain the nation's leadership in science and technology.

To support the goal of building a clean and equitable energy economy, projects funded under this Funding Opportunity Announcement are expected to (1) advance diversity, equity, inclusion, and accessibility (DEIA); (2) contribute to energy equality; and (3) invest in America's workforce. To ensure these objectives are met, applications must include a R&D Community Benefits Plan (R&D Community Benefits Plan) that addresses the three objectives stated above. See Section IV, "Application and Submission Information, R&D Community Benefits Plan" and the "R&D Community

⁵ <https://edx.netl.doe.gov/dataset/ree-and-coal-open-geodatabase-geocube-collection>

Benefits Plan” Appendix H for more information on the R&D Community Benefits Plan content requirements.

C. Objectives/Areas of Interest

The FOA consists of 8 regions that span the United States, including Puerto Rico. For this FOA, each region (See Figure 1) represents an Area of Interest (AOI) in which R&D studies will be completed. The 8 regions spanning the United States were delineated using existing geographic data (e.g., geologic and physiographic provinces) and DOE carbon storage/hydrogen hub regions. All AOIs have the same objectives: the difference is in the physical Region, which is identified by the map in Figure 1.

The vision of the Carbon Ore, Rare Earth, and Critical Minerals (CORE-CM) Initiative is to catalyze regional economic growth and job creation by realizing the full potential value of natural resources, such as coal, throughout the United States. It has been designed to address the upstream and midstream critical minerals and materials (CMM) supply chain and downstream manufacturing of valuable, nonfuel, carbon-based products, to accelerate the realization of full potential for unconventional and secondary sources of CMM and carbon ore across the United States. Feedstocks that could be considered for domestic production to enhance national and economic security of CMM include fossil fuel energy and similar waste streams, such as coal waste and by-products, oil and gas produced waters, active mineral mines tailings and byproducts, and brines produced as part of carbon sequestration efforts. They can also be used as sources of carbon for production of valuable, nonfuel, carbon-based products (CBPs).

The primary objective of this FOA is to competitively award R&D projects to coalition teams (see FOA section III.B. Eligible Applicants) that consist of partners such as private industry; university; local, state, and federal government; local communities; and Tribes and Tribal organizations who will develop and implement strategies that enable each specific U.S. region to realize its full economic potential for producing CMM and valuable, nonfuel, carbon-based products by these acts:

- (1) Carry out/Expand CORE-CM assessments to regions (Figure 1) to understand CMM resource potential on a larger footprint.
- (2) Formulate and implement strategies to integrate and leverage regional infrastructure, industries and businesses to spur economic growth by utilizing the regions’ CMM and Carbon Ore resources and waste streams. This includes formulating strategies that address regional infrastructure needs, economic challenges and supply chain gaps.
- (3) Develop and implement plans for stakeholder outreach and education that are

Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.

Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include

FOA name and number in subject line.

necessary to support CORE-CM economic development activities across a given region, with particular focus on community and environmental justice and meaningful tribal engagement.

- (4) Prepare and start implementing a workforce development plan for the training of the next generation of technicians, skilled workers, and STEM professions for securing domestic CMM and component production.
- (5) Develop and start implementing plans for technology innovation centers that will be operated by regional-specific public-private partnerships to provide a centralized and consistent platform to develop and validate CORE-CM technologies.
- (6) By way of working groups with other DE-FOA-0003077 awardees and NETL/DOE staff and support contractors, develop best practice guides and similar documents. The areas for working groups include (but may not be limited to):
 - a. Resource Characterization
 - b. Infrastructure
 - c. Environmental Justice and Social Responsibility
 - d. Technology Innovation Center
- (7) Collaborate with adjacent regions/AOIs and with working groups (described in 6) to develop best methods to access and coordinate technologies, transportation, and infrastructure when similar technologies/materials are being researched.
- (8) Develop datasets meaningful to a DOE effort to develop a U.S. nationwide prospectus on critical minerals from unconventional resources and contribute to the drafting of region-specific portions of the prospectus.

Figure 1: Nationwide map of CORE-CM Regions.

Nationwide CORE-CM Regions (Each Region is an Area of Interest (AOI))

1. Eastern Coastal Area (including Puerto Rico)

Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.

Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.

2. Appalachian Mountain
3. Upper Midwest and Illinois Basin
4. Great Plains and Interior Highlands
5. Gulf Coast and Permian Basin
6. Rocky Mountain
7. Pacific Coast & Basin and Range (including Hawaii)
8. Alaska and Pacific Northwest

An applicant interested in proposing work in more than one region (AOI) will be required to submit a separate application for each region (AOI).

i. Areas of Interest 1-8 (See Figure 1)

AOI-1 – Regional study of Eastern Coastal area and Puerto Rico

AOI-2 – Regional study of Appalachian Mountain

AOI-3 – Regional study of Upper Midwest and Illinois Basin

AOI-4 – Regional study of Great Plains and Interior Highlands

AOI-5 – Regional study of Gulf Coast and Permian Basin

AOI-6 – Regional study of Rocky Mountain

AOI-7 – Regional study of Pacific Coast & Basin and Range (including Hawaii)

AOI-8 – Regional study of Alaska and Pacific Northwest

The planned R&D provides a regional scale understanding of critical minerals prospectivity and provides insight into the potential materials that may be sourced from domestic secondary and unconventional feedstocks.

Applicants should refer to nationwide datasets through [(i.e., U.S. Geological Survey (USGS), Office of Surface Mining Reclamation and Enforcement (OSMRE), and state geologic survey] and the U.S. Environmental Protection Agency (EPA) to better understand available data and determine gaps that may be filled through their proposed work in DE-FOA-0003077. - CORD database with ash transportation [Carbon Ore Resources Database \(CORD\) - Submissions - EDX \(doe.gov\)](https://edx.netl.doe.gov/dataset/cord)⁹

Successful Applicants under DE-FOA-0003077 will gain access to relevant basin data collected during Phase 1 (DE-FOA-0002364) of the CORE-CM program. This data will be accessible through the NETL EDX CORE-CM workspace. To gain an understanding of what data was proposed to be examined at the basin level, see Appendix J.

Regional groupings will build on existing basin-level analyses (if previously completed) and others including but not limited to USGS analysis to aid in the development of nationwide critical mineral distribution and supply chains from unconventional and secondary feedstocks. The work will contribute to the development of a framework that addresses economic and supply chain barriers, leads to pilot scale demos, and broadened scope to include advanced carbon or critical mineral bearing material products.

It is anticipated that recipients funded by DOE under this FOA will form and manage regional-specific coalitions to accomplish these activities. DOE discourages use of exclusive agreements, so that subrecipients and contractors proposed in financial assistance applications not selected for award will have flexibility to participate on selected projects under mutually beneficial terms.

Coalitions are strongly encouraged to integrate expertise and stakeholders across the entire CORE-CM value chain for their region, including but not limited to, resource characterization, mining, mineral recovery, mineral processing, CMM separation, and purification, and manufacturing intermediate and end-use products. Coalition membership (see FOA section III.B. Eligible Applicants) is strongly encouraged to consist of, but not necessarily be limited to:

- Relevant subject matter experts (potentially including geologists, engineers, scientists, social scientists, and entrepreneurs)
- Mining companies
- Accredited mining schools and other academic institutions, including two-year institutions, Historically Black Colleges and Universities (HBCUs), Tribal colleges and Minority Serving Institutions (MSIs)
- Relevant manufacturers and businesses
- Training and workforce development organizations
- National Laboratories
- Federal and state agencies
- Local agencies/communities

⁹ <https://edx.netl.doe.gov/dataset/cord>

Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.

- Non-profit/non-governmental stakeholders
- Indian Tribes
- Other non-profit

Additionally, DOE strongly encourages inclusion of State Geological Surveys in the regional coalitions.

The focus of DE-FOA-0003077 is the Regional Assessment of CORE-CM Resources or Characterization work, and a majority of the effort should be focused on Tasks 2 and 3 (Primarily Task 3, sampling and characterization) below.

Specific tasks expected (but not limited to) for each region/AOI are listed below:

1) Project Management and Planning

Develop a plan for Coalitions and Teaming Partners for the region and with surrounding regions.

2) Regional Resource Assessment and initial planning

The **Regional Resource Assessment** will be a high-level prospective assessment and will serve as the foundation for future data and information refinements of the regional REE- and CM-containing resources. The effort will serve as a primary evaluation identifying the most promising resources within each U.S. Region.

CORE-CM projects will conduct a **Regional Resource Assessment**. Each regional assessment will address resources and volumes in the following categories including but not limited to:

- Coal and sedimentary rock associated with coal beds,
- Sedimentary hosted minerals
- Coal ash (ponded materials; combustion by products),
- Refuse, preparation plant, or mining waste (coal; other ores),
- Acid mine drainage (coal; other ores),
- Produced water (petroleum industry by-products, carbon storage produced brines, and other produced waters), and
- Other region-specific resources that could enhance supply and economics that may include but not be limited to gasifier char materials, drill cuttings, and the like.

The **Regional Resource Assessment** will address previous and, if applicable, ongoing

Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.

studies that identify and characterize possible resources, CMM concentration and mineral phase, mode of occurrence, and endowment volumes within each of the above categories using best practice-methodologies. Teaming with State Geologic Surveys and the USGS to gain access to existing cores and data associated with each region is strongly encouraged for this activity.

The **Regional Resource Assessment** will include but not limited to:

- A review and assessment of prior state-of-the art (SOTA) CMM data as well as, if applicable, ongoing studies, that will address how these data were/are being obtained.
- Identification of the carbon ore-based resources and/or other resources, their location within the region, and quantitative estimates of each resource contained within the region.
- Identification of reusable waste streams (coal ash, refuse, acid mine drainage, etc.), or other CMM-containing waste streams (including industrial and mineral processing waste streams), their location within the region, and estimates of the quantity of each material contained within each region.
- The results of a gap analysis that addresses the potential need for additional field sampling activities to adequately reflect the region's resources.
- A description of the requirements, processes, and methodologies for acquiring additional field materials and performing respective characterization analysis of resource materials in each U.S. Region.
- These data should be collected in (Attachment 1) and in a digital, visual representation of data available for CMM (such as GIS).

Develop and formulate characterization-based strategies to fill information and data gaps in the assessments of CMM bearing materials and waste sources at a regional scale. Development of a characterization and data acquisition plan that includes the collection of mineral phase/mineral systems level data for CMM bearing materials in the region.

- Review/Assess (State of the art) SOTA CMM Data on a regional scale to include quantitative element-level data that are expanded to the mineral phase/mineral system level.
- Collect CMM regional data from characterization studies, or existing Federal and State sources into digital, visual representation. Data sources include United States Geological Survey (USGS) COAL QUAL data with trace element data. Work with mining companies and industrial entities to incorporate private datasets on CMM abundance in the region.
- Organization of existing and collected data into a geoscientific framework

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

that enables qualitative and semi-quantitative characterization of factors and trends in CMM enrichment and mineral phase occurrence across the region. CMM data shall be placed within a geologic context, to the best of the ability of the Recipient given the completeness of the archived and collected metadata. Available well log and core geologic data shall be compiled to provide and highlight regional stratigraphic and structural context. *CORE-CM Resource Assessment Data Sheet/template* (Excel .xlsx) - Please see Appendix I and Attachment 1.

3) Regional Assessment of CORE-CM Resources, Sampling, and Characterization

A regional assessment of CORE-CM resource types will be completed. The assessment will include the integration of basinal data (as available) and will be expanded by regional assessment and characterization of CMM. CORE-CM projects will complete a broad overview of regional resources by assessment and characterization of contained CMM. The assessment will include leveraging existing and new field characterization data, development of analytical geological models, identification of information gaps to fill those gaps and inform future R&D on resource recovery. Resource Characterization and assessment should include, but not be limited to:

- Coal and sedimentary rock associated with coal beds,
- Sedimentary hosted minerals,
- Coal ash (ponded materials; combustion by products),
- Refuse, preparation plant, or mining waste (coal; other ores),
- Acid mine drainage (coal; other ores),
- Oil and Gas produced water, including petroleum industry by-products, carbon storage produced brines, or other waters, and
- Other region-specific resources that could enhance supply and economics that may include but not be limited to gasifier char materials, drill cuttings, and the like.

Recipients will provide NETL with a detailed digital catalog of samples collected which includes photos and appropriate metadata, this log should include but is not limited to *CORE-CM Resource Assessment Data Sheet / Attachment 1*. Refer to the Statement of Project Objectives Template, Deliverables Section (see Appendix D). Drill cores collected under this FOA are eligible for storage and archive at the USGS Core Resource Center ([Core Research Center | U.S. Geological Survey \(usgs.gov\)](https://www.usgs.gov/core-research-center)¹⁰) through an agreement with NETL. Cores sent to USGS should be unique and not

¹⁰ <https://www.usgs.gov/core-research-center>

overlap with existing core that is currently in the Center. Other samples collected such as powders, hand/grab samples and the like, shall be archived at the awardees institution and be available upon request by DOE/NETL for 10 years.

Coal, sedimentary rock, and sedimentary-hosted minerals

Develop and utilize a robust and systematic method for collecting core scale characterization data that focus on the contextual and spatial attributes of CMM occurrence across the region of interest. Using a strategic and geologically informed sampling and analysis plan for coal and sedimentary rock cores from new exploration core drilling efforts or using existing core from federal and state geological surveys to collect data that are representative of differing geographic, stratigraphic, and sedimentary deposit types (as described in Montross et al., 2022¹¹). This includes basic geologic history, lithostratigraphy of sedimentary and coal layers, core logging geochemistry, quantification of critical mineral occurrence, and mapping of mineralization zones from core- to mine- to regional-scale. Include data obtained from studies of existing core held in repositories managed by USGS or state agencies ([Links to Core Repositories | U.S. Geological Survey \(usgs.gov\)](#))¹² or well data held by state agencies for wells drilled in their state ([Links to State Well Data | U.S. Geological Survey \(usgs.gov\)](#))¹³. Existing core samples of interest and newly acquired core are eligible for analysis by NETL using a multi-sensor core logging and CT scanning at the NETL Morgantown site ([NETL Core logging and Geoimaging](#))¹⁴.

Data shall be compiled for visualization using geospatial analysis programs (ESRI ArcGIS or similar), digitization of core data and logs of material properties (lithology, grain size, elemental chemistry, mineral phase) using core analysis/logging software, or stratigraphy (Petrel or similar) that can be used for correlation across the region of interest and for extrapolation across regions to aid in the development of a nationwide prospectus for CMM from secondary and unconventional sources.

The goal of this effort is to systematically collect key data to achieve a foundation of spatially and geologically constrained data that demonstrates the occurrence and

¹¹ Montross, S. N., Bagdonas, D., Paronish, T., Bean, A., Gordon, A., Creason, C. G., ... & Rose, K. (2022). On a unified core characterization methodology to support the systematic assessment of rare earth elements and critical minerals bearing unconventional carbon ores and sedimentary strata. *Minerals*, 12(9), 1159. [Minerals | Free Full-Text | On a Unified Core Characterization Methodology to Support the Systematic Assessment of Rare Earth Elements and Critical Minerals Bearing Unconventional Carbon Ores and Sedimentary Strata \(mdpi.com\)](#)

¹² <https://www.usgs.gov/core-research-center/links-core-repositories>

¹³ <https://www.usgs.gov/programs/core-research-center/links-state-well-data>

¹⁴ https://netl.doe.gov/sites/default/files/rdfactsheet/R-D178_4.pdf

prospectivity of CMM across the region of interest that can be used for basin/regional analysis and modeling.

Mine waste/refuse/Coal ash (ponded, combustion by products)

Identification and mapping of locations, volumetric quantity, and geochemical characterization of material.

AMD or produced water (e.g., from Oil and Gas Production or carbon storage efforts)

Identification and mapping of locations, quantity (flow, discharge) and geochemical characterization of fluids.

Other

Region specific resources that could enhance supply economics such as, but not limited to gasifier char materials, Petroleum refinery wastes, Steel slag, and Red mud/bauxite residue. Identification and mapping of location, geochemical characterization, and volume of resource material.

CORE-CM projects will assess regional waste streams (including wastes and by-products associated with CMM mining) that could be reused as feedstocks, or consumables in processes that produce REE, CM and-or valuable, non-fuel, carbon-based products. The assessment will include acquiring existing data, identification of information gaps, development, and implementation of R&D plans to fill those gaps and enable future projects within the region. The strategies for reuse of waste streams should identify the challenges and potential solutions needed to realize the above and/or alternate waste stream reuse opportunities.

With respect to coal sediments, validated CMM geologic models will be developed that include structural and stratigraphic frameworks, paleo depositional environments, and post-depositional processes. The geologic model will be extrapolated across the region and may include newly generated CMM assay information as well as coal chemistry and geochemistry information needed to develop a reasonable, more informed research plan. Assays that can be directly associated with specific stratigraphic clay intervals should additionally be addressed and included in the geologic model. If available, other geophysical data such as well logs, seismic and geochemical information, etc., should be identified. The predictive capability of the resource assessment geological models shall include sensitivity analysis, confidence testing, and validation. Model assumptions will be included where it is not clear.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

All field sample characterization analyses generated under resulting awards DE-FOA-0003077 for each respective U.S. Regional area will be assimilated by award recipients into one excel template that is provided by NETL (see template, Attachment 1). Once submitted to NETL as a deliverable, the data will be uploaded into NETL's CMM EDX website (see Appendix I). Well logging information should be provided in .csv form in the EDX workspace. This information may also be utilized by NETL's RIC personnel to develop parallel and potentially collaborative predictive geologic models (see Appendix I). Selected information will be made publicly available, similar to data obtained for all projects performed in the NETL CMM portfolio.

Sample data collected will be uploaded into private EDX space at minimum every 6 months. This data will be recorded using the CORE-CM data template (*FOA 3077 CORE-CM Resource Assessment*, Attachment 1)

Award recipients will work with NETL-led efforts to contribute to developing a DOE-led national prospectus for unconventional CMM resources. The main effort is for the collection and recording of samples in the AOI (Region) for this work. Please see [National Critical Minerals Data Dashboard¹⁵](#) (doe.gov) and [Unlocking the Potential of Unconventional Critical Mineral Resources Story Map - Submissions - EDX¹⁶](#) (doe.gov) for an idea of the base for a national prospectus.

Award recipients will review existing SOTA technologies to identify possible methods for processing and recovering CMM from different feedstocks that are present in the region.

4) Regional overview for Infrastructure, Industries, and Business that includes site strategies.

CORE-CM projects will formulate strategies to address infrastructure, accessibility, regulatory compliance, and permitting on a regional scale. Based on the [Energy Infrastructure and Resources Maps | U.S. Energy Atlas \(eia.gov\)¹⁷](#) for Infrastructure, Industries, and business assessment, the formulation of strategies to integrate and leverage regional infrastructure, industries and businesses to spur economic growth by utilizing the regions CORE-CM resources as well as other minerals and waste

¹⁵ <https://www.osti.gov/dataexplorer/biblio/dataset/1962402-national-critical-minerals-data-dashboard>

¹⁶ <https://edx.netl.doe.gov/dataset/unlocking-the-potential-of-unconventional-critical-mineral-resources-story-map>

¹⁷ <https://atlas.eia.gov/pages/energy-maps>

Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.

streams. Strategies should address the regional infrastructure needs, economic challenges and identify supply chain gaps.

An evaluation using a decision-based matrix will be conducted to down select from regional overview and identify and prioritize sites for consideration for a more detailed analysis. This analysis should include:

- Existing regional industries and businesses, their energy needs and infrastructure.
- Regional infrastructure available to active mines, coal, or waste streams and transport these materials to regional locations for further processing.
- Currently available or needed CMM mining and raw material refining infrastructure.
- Additional information that may be needed to complete the analysis of the technologies and infrastructure available to active mines, coal, coal by-products, waste streams, or alternate source materials, and transport these materials to current (or future) facilities that refine these raw resource materials into feedstock materials.
- *Accessing such a facility that is located outside the boundary of the region of interest (AOI), may be the most economical approach when considering infrastructure, facilities and permitting. Therefore, when considering how to perform this analysis, Regions are encouraged to consider if there are facilities that are located in proximity to their regions of interest (AOI) and are encouraged to work with and communicate with bordering regions.*

The results of the **Regional Strategies for Infrastructure, Industries and Business Assessment** effort will serve as the basis for the development of an initial **Regional Business Commercialization Plan**. The **Regional Infrastructure, Industries and Business Assessment** will begin development through the collaborative effort and expertise of coalition members across various technology supply chains. As a commercialization plan, effort may address:

- The integration of current and possible future industries that utilize (or may potentially utilize) coal, coal-based resources and regional wastes as process feedstock materials; or that utilize CMM as materials incorporated into intermediate products such as magnets, batteries, sensors, electrolyzers, lasers, phosphors, fluorescents, catalysts and the like; or that further integrate these intermediate products into end products such as industrial gas and wind turbines, sonar and satellite communication and guidance systems, structural aircraft components, frictionless bearings, smart missiles and the like.

Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.

- The potential economic impact and challenges of not only producing CMM and valuable, nonfuel, carbon products within each specific U.S. region, but also transport requirements for the development of environmentally safe and sustainable projects, businesses and industries.
- Infrastructure needs, potential business/industry integration, economic challenges and supply chain gaps that need to be addressed to promote economic growth and create jobs.
- Critical needs to realize the full economic value of the region's resources for producing and utilizing CMM and valuable, nonfuel, coal products, and/or alternate non-coal-based resource materials.

5) Stakeholder Outreach and Education

CORE-CM Projects will develop a regional plan for stakeholder outreach, education, and preparation of a workforce development and community engagement plan for CORE-CM resources in the region. This encompasses training (or retraining/uptraining) of the next generation of technicians, skilled workers, and STEM professionals, including scientists and engineers, for securing domestic feedstocks and material component production. The plans shall include integration of accredited mining schools and other academic institutions, local and regional training and workforce development organizations, and National Laboratories within the region being proposed. The plan will address training needs and plan to develop and implement training for (1) technicians, (2) skilled workers, and (3) STEM professionals (including scientists and engineers). Plans for stakeholder outreach should include exploring potential collaborations with other R&D projects funded by DOE that are relevant to the CORE-CM Initiative, especially if those projects have a nexus with the region of interest. Plans for collaborations between CORE-CM projects and other DOE-funded and/or U.S. Government-funded projects could expedite technology transfer and commercialization.

The **Stakeholder Outreach and Education Plan** should include (but is not limited to):

- Workforce training and education that should be ongoing during the project outside of the awardee coalition team and should encompass the entire region. Separate quarterly reports are required for community engagement, outreach, and tribal engagement.
- Open workshops and forums to engage and disseminate information to stakeholder industries, such as mining companies, power plant operators, oil and natural gas companies, and entrepreneurs throughout the region, as well as to the general public and potential future workforce personnel, addressing

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

technical and non-technical challenges of CORE-CM projects being conducted in their region.

- Open workshops and forums that address technology transfer between regional businesses and industries. This is viewed as being essential to ensure that the full potential of the region's coal-based and alternate material resources can be realized.
- Engagement with Tribal, Federal, state, local governments, and non-profit/non-governmental groups to provide information on technology development, environmentally sustainable pathways and economic potential within their region for production CMM and valuable, non-fuel, carbon products.

6) Technology Innovation Center (TIC) Plans

CORE-CM coalitions will formulate/refine plans and develop a roadmap to implementation for technology innovation centers that will be developed and operated by regional public-private partnerships. The technology innovation centers will provide a centralized and consistent platform to develop and validate CORE-CM technologies at laboratory-scale or larger, including technologies that utilize advanced manufacturing techniques.

Examples that the TIC Roadmap should consider (but are not limited to):

- Identification of potential partnerships with other entities for conducting future small-scale R&D projects for innovative waste stream material technology and/or test facility development.
- Innovative waste stream material technology development that may include potential co-production as well as process development. For example:
 - Extraction and recovery of CMM for manufacturing and supply chain needs.
 - Utilization of sulfuric acid generated from coal-based acid mine drainage as the chemical leaching media to extract CMM feedstock material.
 - The challenges and potential solutions needed to realize the above.
- The recipient will submit a summary of environmental justice considerations of the proposed TIC. The following issues will be addressed:
 - Indicate the relationship between the amount of resources used and the amount of product formed.
 - What are the associated near-term and legacy environmental impacts of secondary and unconventional mineral recovery when using particular feedstocks.

Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.

Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include

FOA name and number in subject line.

- How the planned technology remediates legacy environmental impacts of the energy industry, including environmental impacts, future land use associated with the use of mine waste products in the region.
- The project's waste management strategy and the anticipated impacts of residual waste on local residents.
- How the project incorporates a plan to ensure community and stakeholder input and engagement from underserved communities, which include persons of color; members of religious minorities; lesbian, gay, bisexual, transgender, and queer (LGBTQ+) persons; persons with disabilities; persons who live in rural areas; and persons otherwise adversely affected by persistent poverty or inequality.

Technology Innovation Center Plans will be developed that discuss the potential type of technology innovation center that is envisioned for the region-specific CORE-CM Initiative. This plan will discuss how the technology innovation centers will potentially integrate the regions natural resources, infrastructure, industrial needs, and waste stream reuse opportunities.

To some degree, the technology innovation centers may be (but are not required to be) modeled after:

- The National Coal Council (NCC), Carbon Advanced Material, Manufacturing and Production (CAMP) Centers with expansion to include CMM.
- The National Carbon Capture Center (NCCC) providing a host site for field validation and scale-up of processing and purification technologies.

Coalitions will begin to address, if applicable, the establishment, focus, organizational involvement and potential management of technology innovation centers within their region. Each technology innovation center will advance the unique characteristics of its geographic location, its contained coal and non-coal-based resources, as well as existing or potential future business and industrial opportunities, and the like.

The primary purpose of technology innovation centers will be:

- To accelerate research that will enable commercial deployment of advanced processing and production of CMM and valuable, nonfuel, coal products.
- To support engagement of public-private partnerships and regional industries to advance new and innovative technology development as well as the potential for new product production.
- To advance opportunities for the education and training of the next

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

generation of technicians, skilled workers and STEM professionals.

Technology innovation centers will include, but not be limited to, advancements in the areas of mining, mineral recovery, beneficiation, processing and purification for domestic production of CMM and on valuable, nonfuel, carbon products based on regional industries, manufacturing capabilities and products.

Develop a regional plan to identify partnerships with industry and other stakeholders who represent a variety of industries and institutions. This plan should include opportunities to engage potential partners through project meetings and through the Technology Innovation Center (TIC).

Award recipients will create plans for technology innovation centers (TIC) that will be developed and operated by regional public-private partnerships to provide a centralized and consistent platform to develop and validate regional CORE-CM technologies. Virtual TICs may be considered as a viable option for different regions.

7) CORE-CM Closed Workgroups

Participate in DOE-led closed Working Groups with other CORE-CM Recipients as required during the term of the project, including attendance at related workshops led by NETL/DOE staff or contractor personnel. Meetings may be held in conjunction with annual mandatory Project Review Meetings with an approximate length of 1-2 days. Up to two additional in-person meetings outside of the annual Project Review Meeting may be held during the project performance period. Other, regular meetings associated with CORE-CM working groups will be held virtually.

The project shall include communication, data sharing, and lessons learned with Recipients of other awards under DE-FOA-0003077, and NETL researchers/staff and support contractors. This will be facilitated through CORE-CM specific closed working groups that include, but are not limited to Resource Characterization, Infrastructure, Technology Innovation Centers, and Environmental Justice and Social Responsibility. The Recipient will participate and provide meaningful contributions to the objectives/deliverables of each of the working groups.

Participation in working groups include activities such as (but not limited to):

- CORE-CM projects will contribute and refine a Best Practices document for resource characterization and assessment, including sampling collection strategies and methodologies, and assessment methodologies.
- Development of data standardization methods capable of being used across all regions and to aid in the population of a federated database for organized

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

and safe storage of CMM sensitive information. This includes formulation of regional data collection strategies to ensure coverage across each region. And can be combined with nationwide coverage to aid in the development of a nationwide prospectus on unconventional CMM resources in the U.S. The main sources of existing CMM data¹⁸ contains significant gaps. Data collection planning will identify sampling gaps and work with companies to strategically sample CMM- materials at mines (i.e., partings, floor, and roof samples), oil and gas water treatment facilities, and waste processing plants and other potential CMM resources.

- Refining a methodology (matrix) for assessing the “grade” of the resource endowment (e.g., relative importance of concentration, ease of extraction, etc.).
- Create a site regulatory compliance and permitting guide (or best practices document) for regional or multi-state sites for different resource/feedstock types.
- Refine best practices guide for community engagement.
- Coordination with NETL/DOE staff, including site support contractors, for the completion of working group objectives (i.e., participation in development of resource matrix, best practices manual, etc.).

8) Critical Materials Collaborative (CMC)

All selected projects will be required to participate as a member of the Critical Materials Collaborative, which is a coalition of DOE offices, federal agencies & federally funded R&D programs to:

- Align the DOE research portfolio to achieve climate goals and crosscutting science and technology (S&T) objectives;
- Support crosscutting RD&D related to critical minerals and materials;
- Accelerate the adoption and deployment of innovative technologies;
- Nurture and expand the innovation ecosystem; and
- Facilitate scientific and technical exchange and discussion.

The Recipient’s Principal investigators (PIs) or a member of their research team are expected to participate in coordination efforts including, but not limited to, an in-person annual symposium, approximately bi-monthly virtual coordination meetings,

and periodically give a presentation on research progress. There are no membership fees associated with participation in the CMC.

ii. Teaming Partner List

DOE is compiling a “Teaming Partner List” to facilitate the formation of new project teams for this FOA. The Teaming Partner List allows organizations who may wish to participate on an application to express their interest to other applicants and to explore potential partnerships.

Updates to the Teaming Partner List will be available on NETL eXCHANGE. The Teaming Partner List will be regularly updated to reflect new teaming partners who provide their organization’s information.

SUBMISSION INSTRUCTIONS: View the Teaming Partner List by visiting the NETL eXCHANGE homepage and clicking on “Teaming Partners List” within the left-handed navigation pane. This page allows users to view published Teaming Partner Lists. To join the Teaming Partner List, submit a request within NETL eXCHANGE. Select the appropriate Teaming Partner List from the drop-down menu, and fill in the following information: Investigator Name, Organization Name, Organization Type, Area of Interest, Background and Capabilities, Website, Contact Address, Contact Email, and Contact Phone.

DISCLAIMER: By submitting a request to be included on the Teaming Partner List, the requesting organization consents to the publication of the above-referenced information. By facilitating the Teaming Partner List, DOE is not endorsing, sponsoring, or otherwise evaluating the qualifications of the individuals and organizations that are self-identifying themselves for placement on this Teaming Partner List. DOE will not pay for the provision of any information, nor will it compensate any applicants or requesting organizations for the development of such information.

D. Applications Specifically Not of Interest

The following types of applications will be deemed nonresponsive and will not be reviewed or considered (See Section III, Eligibility Information; Responsiveness Criteria):

- Submissions that fall outside the technical parameters specified in Section I.C of this “Funding Opportunity Description; Objectives/Areas of Interest” of the FOA.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

- Submissions for proposed technologies that are not based on sound scientific principles (e.g., violates the laws of thermodynamics).
- Physical construction of a Technology Innovation Center.
- Process design or technology development and testing except for geologic deposit models. This includes metallurgical and chemical separations and recovery R&D and technology development which does not fall within the scope of this FOA.
 - Bench scale chemical leaching/digestion for mineral phase level characterization and occurrence is acceptable.
- An application exceeding the identified DOE funding level.
- An application exceeding the project narrative 30-page count, including cover page, table of contents, charts, graphs, maps, photographs, tables, and other pictorial presentations, when printed using standard 8.5" by 11" paper with 1- inch margins (top, bottom, left, and right) double-spaced with a font not smaller than 11 point

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
 Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
 FOA name and number in subject line.*

II. Award Information

A. Type of Application

DOE will accept only new applications under this announcement.

B. Type of Award Instrument

DOE anticipates awarding cooperative agreements under this funding opportunity announcement (See Section VI, “Award Administration Information; Statement of Substantial Involvement”).

C. Award Overview

i. Estimated Funding, Number of Awards, Anticipated Award Size, and Maximum DOE Share

DOE expects to make Federal funding available for new awards under this FOA as follows:

Areas of Interest	Estimated Federal Funding (\$M)	Anticipated No. of Awards	Anticipated Individual Award Size			Maximum DOE Share of Award (\$M)
			DOE Share \$M/%	Cost Share \$M/%	Total \$M	
1	\$7.5M	1	\$7.5M/80%	\$1.875M/20%	\$9.375M	\$7.5M
2	\$7.5M	1	\$7.5M/80%	\$1.875M/20%	\$9.375M	\$7.5M
3	\$7.5M	1	\$7.5M/80%	\$1.875M/20%	\$9.375M	\$7.5M
4	\$7.5M	1	\$7.5M/80%	\$1.875M/20%	\$9.375M	\$7.5M

DOE may issue awards in one, multiple or none of the areas of interests.

Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.

APPLICATIONS WHICH EXCEED THE “MAXIMUM DOE SHARE OF AWARD” SPECIFIED ABOVE WILL BE CONSIDERED NONCOMPLIANT (SEE SECTION III, “ELIGIBILITY INFORMATION; COMPLIANCE CRITERIA”). DOE WILL NOT REVIEW OR CONSIDER NONCOMPLIANT APPLICATIONS.

DOE may establish more than one budget period for each award and fund only the initial budget period(s). Funding for all budget periods, including the initial budget period, is not guaranteed. Funding for all awards and future budget periods are contingent upon the availability of funds appropriated by Congress for the purpose of this program and the availability of future-year budget authority.

Project continuation will be contingent upon satisfactory performance and go/no-go decision review. At the go/no-go decision points, DOE will evaluate project performance, project schedule adherence, meeting milestone objectives, compliance with reporting requirements, and overall contribution to the program goals and objectives. As a result of this evaluation, DOE will make a determination to continue the project, re-direct the project, or discontinue funding the project.

ii. Estimated Project Period of Performance

Estimated Project Period of Performance

DOE anticipates making awards with an estimated project period of performance of thirty-six (36) months, or three (3) years. The project will occur over two (2) budget periods. The first budget period (BP1) is envisioned to be eighteen (18) to twenty-one (21) months and be focused on assessment and characterization of the respective region. A Go/No-Go decision point will be required to move into the second budget period (BP2), which will carry through the remaining fifteen (15) to eighteen (18) months of the award. A majority of the Characterization data will be required to be submitted to NETL at the time of the decision point to move into BP2. Work in BP2 is envisioned to expand into other tasks based on characterization of the region, though Characterization is likely to span both BPs. The length of each BP may be modified for each region if sufficient reasoning is provided.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

III. Eligibility Information

A. General

To be considered for substantive evaluation, an applicant's submission must meet the criteria set forth below. If the application does not meet these initial requirements, it will be considered non-responsive, removed from further evaluation, and ineligible for any award.

B. Eligible Applicants

i. Domestic Entities

The proposed prime recipient and subrecipient(s) must be domestic entities. The following types of domestic entities are eligible to participate as a prime recipient or subrecipient of this FOA:

1. Institutions of higher education;
2. For-profit entities;
3. Non-profit entities; and
4. State and local governmental entities, and Indian Tribes.

To qualify as a domestic entity, the entity must be organized, chartered or incorporated (or otherwise formed) under the laws of a particular state or territory of the United States; have majority domestic ownership and control; and have a physical place of business in the United States.

DOE/NNSA FFRDCs are eligible to apply for funding as a subrecipient, but are not eligible to apply as a prime recipient. **NETL is not eligible for award under this announcement and may not be proposed as a subrecipient on another entity's application. An application that includes NETL as a prime recipient or subrecipient will be considered non-responsive.**

Non-DOE/NNSA FFRDCs are eligible to participate as a subrecipient but are not eligible to apply as a prime recipient.

Federal agencies and instrumentalities (other than DOE) are eligible to participate as a subrecipient, but are not eligible to apply as a prime recipient.

Entities banned from doing business with the United States government, such as entities debarred, suspended, or otherwise excluded from or ineligible for participating in Federal programs, are not eligible.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

Nonprofit organizations described in Section 501(c)(4) of the Internal Revenue Code of 1986 that engaged in lobbying activities after December 31, 1995, are **not** eligible to apply for funding.

ii. Foreign Entities

In limited circumstances, DOE may approve a waiver to allow a foreign entity to participate as a prime recipient or subrecipient. A foreign entity may submit a Full Application to this FOA, but the Full Application must be accompanied by an explicit written waiver request. Likewise, if the applicant seeks to include a foreign entity as a subrecipient, the applicant must submit a separate explicit written waiver request in the Full Application for each proposed foreign subrecipient.

The "Waiver Requests: Foreign Entity Participation as the Prime Recipient and Performance of Work in the United States" Appendix lists the information that must be included in a foreign entity waiver request. The applicant does not have the right to appeal DOE's decision concerning a waiver request.

C. Cost Sharing

i. Cost Share Requirements

The cost share must be at least 20% of the total allowable costs for research and development projects (i.e., the sum of the Government share, including FFRDC/NL costs if applicable, and the recipient share of allowable costs equals the total allowable cost of the project) and must come from non-Federal sources unless otherwise allowed by law. See 2 CFR part 200.306 as supplemented by 2 CFR part 910.130 for the applicable cost sharing requirements.

DOE understands that projects selected under this FOA may require the use of existing data. For purposes of this FOA, DOE will consider data that is commercially available at an established market price to be an allowable cost under the project (either as DOE share or non-federal cost share) but DOE will not consider in-kind data (e.g., data, owned by an entity, that is not routinely sold commercially but is instead donated to the project and assigned a value) to be an allowable cost under the project, including as Recipient cost share. Estimation methods used by the Recipient to assign a value to in-kind data cannot be objectively verified by DOE and therefore will

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

not be accepted by DOE as an allowable cost under any project selected from this FOA. Consequently, DOE will not recognize in-kind data costs in any resulting approved DOE budget.

To assist applicants in calculating proper cost share amounts, DOE has included a cost share information sheet and sample cost share calculation in the “Cost Share Information” Appendix of this FOA.

ii. Legal Responsibility

Applicants will be bound by the cost share proposed in their applications and incorporated into their award.

The cost share requirement applies to the project as a whole, including work performed by members of the project team other than the Prime Recipient. The Prime Recipient is legally responsible for paying the entire cost share. The Prime Recipient’s cost share obligation is expressed in the Assistance Agreement as a static amount in U.S. dollars (cost share amount) and as a percentage of the Total Project Cost (cost share percentage). If the funding agreement is terminated prior to the end of the project period, the Prime Recipient is required to contribute at least the cost share percentage of total expenditures incurred through the date of termination.

The Prime Recipient is solely responsible for managing cost share contributions by the Project Team and enforcing cost share obligation assumed by Project Team members in subawards or related agreements.

iii. Cost Share Allocation

Each Project Team is free to determine how best to allocate the cost share requirement among the team members. The amount contributed by individual Project Team members may vary, as long as the cost share requirement for the project as a whole is met.

iv. Cost Share Types and Allowability

Every cost share contribution must be allowable under the applicable Federal cost principles, as described in Section IV, “Application and Submission Information; Funding Restrictions”. In addition, cost share must be verifiable upon submission of the Full Application. Cost share may be provided in the form of cash or cash equivalents, or in-kind contributions. Cost share must

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

come from non-federal sources (unless otherwise allowed by law), such as project participants, state or local governments, or other third-party financing. DOE Loan Guarantee, cannot be leveraged by applicants to provide the required cost share or otherwise support the same scope that is proposed under a project.

Cost share may be provided by the prime recipient, subrecipients, or third parties (entities that do not have a role in performing the scope of work). Vendors/contractors may not provide cost share. Any partial donation of goods or services is considered a discount and does not count towards cost share.

Cash contributions include, but are not limited to: personnel costs, fringe costs, supply and equipment costs, indirect costs and other direct costs.

In-kind contributions are those where a value of the contribution can be readily determined, verified and justified but where no actual cash is transacted in securing the good or service comprising the contribution. Allowable in-kind contributions include but are not limited to: the donation of volunteer time or the donation of space or use of equipment.

Project teams may use funding or property received from state or local governments to meet the cost share requirement, so long as Federal Government did not provide the funding to the state or local government.

The Recipient may not use the following sources to meet its cost share obligations including, but not limited to:

- Revenues or royalties from the prospective operation of an activity beyond the project period;
- Proceeds from the prospective sale of an asset of an activity;
- Federal funding or property (e.g., Federal grants, equipment owned by the Federal Government); or
- Expenditures that were reimbursed under a separate Federal Program.

Project Teams may not use the same cash or in-kind contributions to meet cost share requirements for more than one project or program.

Cost share contributions must be specified in the project budget, verifiable from the Prime Recipient's records, and necessary and reasonable for proper and efficient accomplishment of the project. As all sources of cost share are

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

considered part of total project cost, the cost share dollars will be scrutinized under the same Federal regulations as Federal dollars to the project. Every cost share contribution must be reviewed and approved in advance by the Contracting Officer and incorporated into the project budget before the expenditures are incurred.

Applicants are encouraged to refer to 2 CFR 200.306 as supplemented by 2 CFR 910.130 for additional cost sharing requirements.

Please refer to the “Cost Share Information” Appendix of the FOA.

v. Cost Share Verification

Applicants are required to provide written assurance of their proposed cost share contributions in their Full Applications.

Upon selection for award negotiations, applicants are required to provide additional information and documentation regarding their cost share contributions. Please refer to the “Cost Share Information” Appendix of the FOA.

vi. Cost Share Contributions by FFRDCs

Because FFRDCs and NLs are funded by the Federal Government, costs incurred by FFRDCs and NLs generally may not be used to meet the cost share requirement. FFRDCs and NLs may contribute cost share only if the contributions are paid directly from the contractor’s Management Fee or another non-Federal source. In such instance, the FFRDC and NLs must certify in writing that the cost share comes from non-Federal sources.

D. Compliance Criteria

A review of all submitted documents and information is performed to determine if the submissions are in compliance with the FOA requirements. **All submitted information and documents must meet all Compliance Criteria listed below to be eligible for review or the submission will be considered noncompliant. DOE will NOT review or consider noncompliant submissions.**

Full Applications are deemed compliant if:

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

- The Full Application complies with the maximum DOE share of the individual award size in Section II, “Award Information; Award Overview” of the FOA;
- The Full Application complies with the content and form requirements in Section IV, “Application and Submission Information; Form and Content Requirements,” and Section IV, “Application and Submission Information; Full Applications” of the FOA; and
- The applicant successfully uploaded all required documents and clicked the “Submit” button in NETL eXCHANGE at <https://NETL-Exchange.energy.gov> by the deadline stated in the FOA. DOE will not extend the submission deadline for applicants that fail to submit required information by the applicable deadline due to server/connection congestion.

DOE will not review or consider submissions submitted through means other than NETL eXCHANGE, submissions submitted after the applicable deadline, or incomplete submissions.

E. Responsiveness Criteria

A review of all submitted documents and information is performed to determine if the submissions are responsive to the FOA requirements. **All submitted information and documents must meet all of the Responsiveness Criteria listed below to be eligible for review or the submission will be considered non-responsive. DOE will NOT review or consider non-responsive submissions.**

Full Applications are deemed responsive if:

- The application meets the technical requirements as described in the “Objectives/Areas of Interest” contained in Section I, “Funding Opportunity Description” of the FOA; and
- The Applicant/application meets the Eligibility Criteria in Section III, “Eligibility Information” of the FOA.

Only compliant/responsive applications will be eligible for a comprehensive merit review.

F. Number of Submittals Eligible for Review

Applicants may submit **more than** one Full Application to this FOA. Each application must describe a unique, scientifically distinct project, and they must be in different AOI’s.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

G. Questions Regarding Eligibility

DOE will not make eligibility determinations for potential applicants prior to the date on which applications to this FOA must be submitted. The decision whether to submit an application in response to this FOA lies solely with the applicant.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov .
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

IV. Application and Submission Information

A. Form and Content Requirements

All submissions must conform to the following form and content requirements, including maximum page limits (described below) and must be submitted as specifically stated. **Applications which do not meet ALL of the form and content requirements listed below will be considered noncompliant (See Section III, “Eligibility Information; Compliance Criteria”). DOE will NOT review or consider noncompliant applications.** DOE will not review or consider submissions submitted through means other than specifically stated in the FOA, submissions submitted after the applicable deadline, and incomplete submissions. DOE will not extend deadlines for applicants who fail to submit required information and documents by the applicable deadline due to server/connection congestion.

Full Applications must conform to ALL of the following requirements in order to be considered compliant:

- Each must be submitted in Adobe PDF format unless stated otherwise.
- Each must be written in English.
- All pages must be formatted to fit on 8.5 x 11 inch paper with margins not less than one inch on every side. Use Times New Roman typeface, a black font color, and a font size of 11 point or larger (except in figures or tables, which may be 10 point font). A symbol font may be used to insert Greek letters or special characters, but the font size requirement still applies. References must be included as footnotes or endnotes in a font size of 10 or larger. Footnotes and endnotes are counted toward the maximum page requirement.
- Each submission must not exceed the specified maximum page limit (described below) when printed using the formatting requirements set forth above and double-spaced (or **single** spaced where specified). The maximum page limitation includes the cover page, references, charts, graphs, data, maps, photographs, other pictorial presentations, and other reference material the applicant may include its submission.
- A control number will be issued when an applicant begins the NETL eXCHANGE application process. The control number must be included with all application documents. Specifically, the control number must be prominently displayed on the upper right corner of the header of every page and included in the file name (i.e., Control Number_Applicant Name_Full Application).

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

Full Applications which do not conform to ALL of the requirements listed above will be considered noncompliant (See Section III, “Eligibility Information; Compliance Criteria”). DOE will not review or consider noncompliant submissions.

Applicants are responsible for meeting the submission deadline. Applicants are strongly encouraged to submit their Full Applications at least 48 hours in advance of the submission deadline. Under normal conditions (i.e., at least 48 hours in advance of the submission deadline), applicants should allow at least 1 hour to submit a Full Application. Once the Full Application is submitted in NETL eXCHANGE, applicants may revise or update that submission until the expiration of the applicable deadline. If changes are made, the applicant must resubmit the Full Application, before the applicable deadline.

DOE urges applicants to carefully review their Full Applications and to allow sufficient time for the submission of required information and documents. All Full Applications that pass the initial eligibility review will undergo comprehensive technical merit review according to the criteria identified in Section V, “Application Review Information; Review Criteria” of the FOA.

i. Additional Information on NETL eXCHANGE

NETL eXCHANGE is designed to enforce the deadlines specified in this FOA. The “Apply” and “Submit” buttons will automatically disable at the defined submission deadlines.

Applicants who experience technical difficulties with submission **PRIOR** to the FOA deadline should contact the NETL eXCHANGE helpdesk for assistance NETL-ExchangeSupport@hq.doe.gov.

ii. NETL eXCHANGE File Size Limitation

The maximum file size that can be uploaded to the NETL eXCHANGE website is 50MB. Files in excess of 50MB cannot be uploaded, and hence cannot be submitted for review. If a file exceeds 50MB but is still within the maximum page limit specified in the FOA, it must be broken into parts and denoted to that effect. For example:

Control Number_Applicant Name_Project_Part 1
Control Number_Applicant Name_Project_Part 2, etc.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

DOE will not accept late submissions that resulted from technical difficulties due to uploading files that exceed 50MB.

B. Full Applications

Applicants must submit a Full Application by the specified due date and time to be considered for funding under this FOA. Applicants must complete the mandatory forms and any applicable optional forms (e.g., SF-LLL- Disclosure of Lobbying Activities) in accordance with the instructions on the forms and the additional instructions below. Files that are attached to the forms must be in Adobe Portable Document Format (PDF) unless otherwise specified in this announcement.

i. Application Package

Application forms and instructions are available on NETL eXCHANGE at <https://NETL-Exchange.energy.gov>. To access application forms and instructions go to NETL eXCHANGE and select the appropriate funding opportunity announcement number.

ii. Content and Form of Full Application

DOE will not review or consider ineligible Full Applications (see Section III, “Eligibility Information; Compliance Criteria” of the FOA).

Each Full Application must be limited to a **single** area of interest. Concepts or technologies unrelated to the specific area of interest should not be consolidated into a single Full Application.

Full Applications must conform to the following requirements:

Submission	Components	Format	File Name
Full Application (PDF, unless stated otherwise)	SF-424	Form	ControlNumber_LeadOrganization_App424
	Location(s) of Work	Microsoft Excel	ControlNumber_LeadOrganization_LOW
	Project Narrative (30 page limitation, see chart below for further instruction)	PDF	ControlNumber_LeadOrganization_Project
	Summary for Public Release (1 page limit)	PDF	ControlNumber_LeadOrganization_Summary
	Project Management Plan (15-page limit see chart below for further instruction)	PDF	ControlNumber_LeadOrganization_PMP
	Resume	PDF	ControlNumber_LeadOrganization_Resume

	Potentially Duplicative Funding	PDF	ControlNumber_LeadOrganization_PDFN

Detailed guidance on the content and form of each component is listed below.

Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.

iii. SF-424 Application for Federal Assistance

Applicants must complete the SF-424 – Application for Federal Assistance, which is available on NETL eXCHANGE at <https://NETL-eXCHANGE.energy.gov>. The list of certifications and assurances in Field 21 can be found at <https://www.energy.gov/management/financial-assistance-forms-and-information-applicants-and-recipients>, under Certifications and Assurances.

Note: The dates and dollar amounts on the SF-424 are for the complete project period of performance and not just the first project year, first phase, or other subset of the project period. Save the SF-424 in a single PDF file using the following convention for the title: “ControlNumber_LeadOrganization_App424”.

iv. Location(s) of Work

Applicants must complete the Locations of Work Documentation, available on NETL eXCHANGE at <https://NETL-Exchange.energy.gov/>. The applicant must complete the supplied template by listing the city, state, and zip code + 4 digits for each location where project work will be performed by the prime recipient or subrecipient(s). Save the completed template as a Microsoft Excel file using the following convention for the title: “Control Number_LeadOrganization_LOW”.

v. Project Narrative File – Mandatory Other Attachment

The Project Narrative File must be submitted in Adobe PDF format. The project narrative must not exceed 30 pages, including cover page, table of contents, footnotes/endnotes, charts, graphs, maps, photographs, and other pictorial presentations, when printed using standard 8.5" by 11" paper with 1 inch margins (top, bottom, left, and right) **double** spaced. The font must not be smaller than 11 point. The **Identification of Potential Conflicts of Interest or Bias in Selection of Reviewers, and Bibliography sections are NOT included in the project narrative page limitation**. Do not include any Internet addresses (URLs) that provide information necessary to review the application. See Section VIII, “Other Information; Treatment of Application Information” for instructions on how to mark proprietary application information.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

Submissions that exceed the maximum page limits indicated above will be considered noncompliant and DOE will not review or consider the submission (See Section III, “Eligibility Information; Compliance Criteria”).

Save the Project Narrative in a single PDF file using the following convention for the title: “ControlNumber_LeadOrganization_Project”.

The project narrative (30 page limitation) must include:

SECTION	MAXIMUM PAGE LIMIT* (if applicable)	DESCRIPTION
Cover Page	Included in the page limitation (1-page maximum)	The cover page should include the project title, the specific FOA area of interest being addressed, the Applicant’s name, and the names of all team member organizations. In addition, provide the Applicant’s technical and business points of contact along with e-mail addresses and telephone numbers, names of project manager, Senior/Key personnel and their organizations. The cover page should also include the federal and non-federal share of costs associated with each team member’s proposed effort. Applicants should ensure the cost information is consistent with the submitted budget justification(s). A sample Project Narrative Cover Page available on NETL eXCHANGE at https://NETL-eXCHANGE.energy.gov/ .
Table of Contents	Included in the page limitation	Applicant to capture, at a minimum, all of the required sections identified in this table.
Project Objectives	Included in the page limitation	This section should provide a clear, concise statement of the specific objectives/aims of the proposed project. Buy America Requirements for Infrastructure Projects: Within the first two (2) pages of the Narrative, include a short statement on whether the project will involve the construction, alteration, and/or repair of infrastructure in the United States. See the “Required Use of American Iron, Steel, Manufactured Products, and Construction Materials – Buy America Requirements for Infrastructure Projects” Appendix for applicable definitions and other information to inform this statement.
Merit Review Criterion Discussion	Included in the page limitation	The section should be formatted to address each of the merit review criterion and sub-criterion listed in Section V, “Application Review Information; Review Criteria”. Provide sufficient information so that reviewers will be able to evaluate the

Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.

SECTION	MAXIMUM PAGE LIMIT* (if applicable)	DESCRIPTION
		application in accordance with these merit review criteria. DOE/NNSA WILL EVALUATE AND CONSIDER ONLY THOSE APPLICATIONS THAT ADDRESS SEPARATELY EACH OF THE MERIT REVIEW CRITERION AND SUB-CRITERION.
Statement of Project Objectives	Included in the page limitation	The project narrative must contain a single, detailed Statement of Project Objectives that addresses how the project objectives will be met. The Statement of Project Objectives must contain a clear, concise description of all activities to be completed during project performance. It is therefore required that it shall not contain proprietary or confidential business information. The Statement of Project Objectives is generally less than 10 pages in total for the proposed work. Applicants shall prepare the Statement of Project Objectives in the format provided in the "Statement of Project objectives Template" Appendix of the FOA.
Relevance and Outcomes/Impacts	Included in the page limitation	This section should explain the relevance of the effort to the objectives in the program announcement and the expected outcomes and/or impacts. The justification for the proposed project should include a clear statement of the importance of the project in terms of the utility of the outcomes and the target community of beneficiaries.
Roles of Participants	Included in the page limitation	For multi-organizational or multi-investigator projects, describe the roles and the work to be performed by each participant/investigator, business agreements between the applicant and participants, and how the various efforts will be integrated and managed.
Multiple Principal Investigators	Included in the page limitation	The applicant, whether a single organization or team/partnership/consortium, must indicate if the project will include multiple PIs. This decision is solely the responsibility of the applicant. If multiple PIs will be designated, the application must identify the Contact PI/Project Coordinator and provide a "Coordination and Management Plan" that describes the organization structure of the project as it pertains to the designation of multiple PIs. This plan should, at a minimum, include: - process for making decisions on scientific/technical direction; - publications; - intellectual property issues; - communication plans; - procedures for resolving conflicts; and - PIs' roles and administrative, technical, and scientific responsibilities for the project.

Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.

SECTION	MAXIMUM PAGE LIMIT* (if applicable)	DESCRIPTION
Facilities and Other Resources	Included in the page limitation	Identify the facilities (e.g., office, laboratory, computer, etc.) to be used at each performance site listed and, if appropriate, indicate their capacities, pertinent capabilities, relative proximity, and extent of availability to the project. Describe only those resources that are directly applicable to the proposed work. Provide any information describing the other resources available to the project such as machine and electronics shops.
Equipment	Included in the page limitation	List important items of equipment already available for this project and, if appropriate, note the location and pertinent capabilities of each. If you are proposing to acquire equipment, describe comparable equipment, if any, already at your organization and explain why it cannot be used.
Project Discussion	Included in the page limitation	- A list, a discussion of, and detail of Teaming Partners. As part of the teaming partner list, indicate team members that have committed, and anticipated partners (or anticipated types of partners that can be pursued during the project and a plan for teaming with these partners). Please indicate what types of expertise or outcome is expected from team/partners. This can be indicated by write up or table form. - Listing of feedstocks that will be targeted for sampling and characterization in region.
Identification of Potential Conflicts of Interest or Bias in Selection of Reviewers	<u>Not</u> included in the page limitation	Provide the following information in this section: - Collaborators and Co-editors: List in alphabetical order all persons, including their current organizational affiliation, who are, or who have been, collaborators or co-authors with you on a research project, book or book article, report, abstract, or paper during the 48 months preceding the submission of this application. Also, list any individuals who are currently, or have been, co-editors with you on a special issue of a journal, compendium, or conference proceedings during the 24 months preceding the submission of this application. If there are no collaborators or co-editors to report, state "None." - Graduate and Postdoctoral Advisors and Advisees: List the names and current organizational affiliations of your graduate advisor(s) and principal postdoctoral sponsor(s) during the last 5 years. Also, list the names and current organizational affiliations of your graduate students and postdoctoral associates.
Bibliography	<u>Not</u> included in the page limitation	If applicable: Provide a bibliography for any references cited in the Project Narrative section. This section must include only bibliographic citations.

Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.

*As indicated above, a maximum page limit has been established for the project narrative so when the project narrative sections identified in the table above as included in the page limitation are totaled together (including the cover page, table of contents, footnotes/endnotes, charts, graphs, maps, photographs, and other pictorial presentations) it should not exceed **30** pages. Full Applications which do not conform to ALL of the requirements listed above will be considered noncompliant (See Section III, "Eligibility Information; Compliance Criteria"). DOE will not review or consider noncompliant submissions.

vi. Summary for Public Release File (April 2023)

The project summary/abstract must contain a one-page summary of the proposed activity suitable for dissemination to the public. It should be a self-contained document that identifies the name of the applicant, the project director/principal investigator(s), the project title, the objectives of the project, a description of the project, including methods to be employed, the potential impact of the project (i.e., benefits, outcomes), major participants (for collaborative projects), and the project's commitments and goals described in the Community Benefits Plan. This document must not include any proprietary or sensitive business information as the Department may make it available to the public after selections. The project summary must not exceed one (1) page when printed using standard 8.5" by 11" paper with 1" margins (top, bottom, left and right) **double** spaced with font no smaller than 11 point. Save the Summary for Public Release in a single PDF file using the following convention for the title: "ControlNumber_LeadOrganization_Summary".

vii. Project Management Plan

The Project Management Plan (PMP) must not exceed 15 pages including cover page, table of contents, footnotes/endnotes, charts, graphs, maps, photographs, and other pictorial presentations, when printed using standard 8.5" by 11" paper with 1" margins (top, bottom, left and right) **double** spaced with font no smaller than 11 point. Applicants shall prepare the PMP in the format provided in the "Project Management Plan Template" Appendix of the FOA. Save the PMP in a single PDF file using the following convention for the title: "ControlNumber_LeadOrganization_PMP".

viii. Resume File (April 2023)

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

Provide a resume for each key person proposed, including subawardees and consultants if they meet the definition of key person. A key person is any individual who contributes in a substantive, measurable way to the execution of the project. The biographical information for each resume must not exceed 3 pages when printed on 8.5" by 11" paper with 1 inch margins (top, bottom, left, and right) **single** spaced with font no smaller than 11 point and should include the following information, if applicable:

- Contact Information;
- Education and Training. Undergraduate, graduate and postdoctoral training, provide institution, major/area, degree and year.
- Research and Professional Experience. Beginning with the current position list, in chronological order, professional/academic positions with a brief description. List all current academic, professional, or institutional appointments, foreign or domestic, at the applicant institution or elsewhere, whether or not remuneration is received, and, whether full-time, part-time, or voluntary;
- Awards and honors;
- Publications. Provide a list of up to 10 publications most closely related to the proposed project. For each publication, identify the names of all authors (in the same sequence in which they appear in the publication), the article title, book or journal title, volume number, page numbers, year of publication, and website address if available electronically. An abbreviated style such as the Physical Review Letters (PRL) convention for citations (list only the first author) may be used for publications with more than 10 authors;
- Patents, copyrights, and software systems developed may be provided in addition to or substituted for publications.
- Synergistic Activities. List no more than 5 professional and scholarly activities related to the effort proposed.
- There should be no lapses in time over the past ten years or since age 18, whichever time period is shorter.

As an alternative to a resume, it is acceptable to use the biographical sketch format approved by the National Science Foundation (NSF). The biographical sketch format may be generated by the Science Experts Network Curriculum Vita (SciENCv), a cooperative venture maintained at <https://www.ncbi.nlm.nih.gov/sciency>, and is also available at https://www.nsf.gov/bfa/dias/policy/researchprotection/commonform_biographicalsketch.pdf. The use of a format required by another agency is intended to reduce the administrative burden to researchers by promoting the use of common formats.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

Save the resumes in a single PDF file using the following convention for the title: "ControlNumber_LeadOrganization_Resume".

ix. SF-424A Budget Information – Non-Construction Programs

You must provide a separate budget for each year of support requested and a cumulative budget for the total project period of performance. Use the SF 424 A Excel, "Budget Information - Non Construction Programs" form on the DOE Financial Assistance Forms Page at

<https://www.energy.gov/management/financial-assistance-forms-and-information-applicants-and-recipients> under DOE budget forms.

You may request funds under any of the Object Class Categories as long as the item and amount are necessary to perform the proposed work, meet all the criteria for allowability under the applicable Federal cost principles, and are not prohibited by the funding restrictions in this announcement (See Section IV, "Application and Submission Information; Funding Restrictions"). Save the information in a single file named "SF424A.xls or xlsx," and click on "Add Optional Other Attachment" to attach.

x. Budget Justification

Applicants must complete the Budget Justification workbook, which is available on NETL eXCHANGE at <https://NETL-eXCHANGE.energy.gov>. Applicants must complete each tab of the Budget Justification workbook for the project, including all work to be performed by the prime recipient and its subrecipients and contractors. Although the data requested is mandatory, the use of the budget justification workbook is not. Applicants should include costs associated with the Buy America Requirements for Infrastructure projects, Community Benefits Plan, required annual audits and incurred cost proposals in their proposed budget documents. Such costs may be reimbursed as direct or indirect costs.

The "Instructions and Summary" included with the Budget Justification workbook will auto-populate as the applicant enters information into the workbook. Applicants must carefully read the "Instructions and Summary" tab provided within the Budget Justification workbook. In addition, applicants must carefully read and note each "Instructions" contained within each individual tab of the Budget Justification workbook. **As stipulated within the Budget Justification workbook, all direct costs must be identified by specific task. All cost should include the basis of cost and justification of**

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

need, as applicable. Of specific note is the necessity to identify personnel costs for each individual proposed for all tasks to which they are assigned. Note EXAMPLES provided within each tab for further clarification.

DOE understands that projects selected under this FOA may require the use of existing data. For purposes of this FOA, DOE will consider data that is commercially available at an established price to be an allowable cost under the project (either as DOE share or non-federal cost share) but DOE will not consider in-kind data (e.g., data, owned by an entity, that is not routinely sold commercially but is instead donated to the project and assigned a value) to be an allowable cost under the project, including as recipient cost share. Estimation methods used by the recipient to assign a value to in-kind data cannot be objectively verified by DOE and therefore will not be accepted by DOE as an allowable cost under any project selected from this FOA. Consequently, DOE will not recognize in-kind data costs in any resulting approved DOE budget.

Save the completed budget justification workbook as a single Microsoft Excel file using the following convention for the title: “Control Number_LeadOrganization_Budget_Justification”.

xi. Subrecipient Budget Justification (if applicable)

Applicants must provide a separate detailed budget justification for each subrecipient that is expected to perform work estimated to be more than \$250,000 or 25 percent of the total work effort (whichever is less). The budget justification must include the same justification information described in the “Budget Justification” section above. Save each subrecipient budget justification in a single Microsoft Excel file using the following naming convention for the title “ControlNumber_LeadOrganization_Subrecipient_Budget_Justification”.

xii. Budget for DOE/NNSA FFRDC/NLs or non-DOE/NNSA FFRDC/NLs, (if applicable)

If proposed, FFRDC/NLs will be treated as subrecipients for applicants. Therefore, prepare the budgets utilizing rates appropriate for such an arrangement. You must provide a separate detailed budget justification for each FFRDC/NL proposed that is expected to perform work estimated to be more than \$250,000 or 25 percent of the total work effort (whichever is less). The level of detail to be included in the FFRDC/NL budget justification (if

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

applicable) must be commensurate with that provided by the applicant. Save the FFRDC/NL budget in a single PDF file using the following convention for the title: "Control Number_LeadOrganization_FFRDC_Budget". Use up to 10 letters of the FFRDC/NL name (e.g., ControlNumber_LeadOrganization_Ianl_Budget or ControlNumber_LeadOrganization_lincoln_Budget).

If a DOE/NNSA FFRDC/NL is to perform a portion of the work, the Department's Strategic Partnership Projects program in accordance with the requirements of DOE Order 481.1 Strategic Partnership Projects (SPP) [formerly known as "Work for Others" (WFO)] must be used. This order and the applicable terms and conditions are available at <https://www.directives.doe.gov/directives-documents/400-series/0481.1-BOrder-e-chg1-ltdchg>. Subawards to other FFRDCs will utilize the terms and conditions of the sponsoring agency.

xiii. Authorization for DOE/NNSA FFRDC/NLs or non-DOE/NNSA FFRDCs/NLs (if applicable)

The cognizant contracting officer for the DOE/NNSA FFRDC/NL or the non-DOE/NNSA Federal agency sponsoring the FFRDC must authorize in writing the use of the FFRDC on the proposed project, and this authorization, as specified in Section III, "Eligibility Information" of the FOA, must be submitted with the application. The use of a FFRDC must be consistent with the contractor's authority under its award. Save the FFRDC/NL authorization in a single PDF file using the following convention for the title: "Control Number_LeadOrganization_FFRDC_Auth". Use up to 10 letters of the FFRDC/NL name (e.g., ControlNumber_LeadOrganization_Ianl_Auth.pdf or ControlNumber_LeadOrganization_lincoln_Auth.pdf).

xiv. Environmental Questionnaire

The applicant must submit an environmental questionnaire providing for the work of the entire project. The applicant is also responsible for submitting a separate environmental questionnaire for each proposed subrecipient performing at a different location. The environmental questionnaire is available at https://netl.doe.gov/sites/default/files/2018-02/451_1-1-3.pdf. Save the questionnaire in a single PDF file named "ControlNumber_LeadOrganization_Env" (or "ControlNumber_LeadOrganization_Env-FILL IN TEAM MEMBER" if more than one questionnaire is submitted).

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

NOTE: If selected for award and if a subrecipient's location is not known at the time of application, a subsequent environmental questionnaire will be needed prior to them beginning work at an alternate location.

xv. Cost Share Commitment Letters (if applicable)

Cost share commitment letters are required from any party (other than the organization submitting the application) proposing to provide all or part of the required cost share (including subrecipients). The letter should state the party is committed to providing a specific minimum dollar amount of cost share, identify the type of proposed cost share (e.g., cash, services, and/or property) to be contributed, and be signed by the person authorized to commit the expenditure of funds by the entity. The applicant should submit the letter(s) in PDF format. Save this information in a single PDF file named "Control Number_LeadOrganization_CSCL".

xvi. SF-LLL: Disclosure of Lobbying Activities

Recipients and Subrecipients may not use any Federal funds to influence or attempt to influence, directly or indirectly, congressional action on any legislative or appropriation matters.

Recipients and subrecipients are required to complete and submit SF-LLL, "Disclosure of Lobbying Activities" (<https://www.grants.gov/web/grants/forms/sf-424-individual-family.html>) to ensure that non-federal funds have not been paid and will not be paid to any person for influencing or attempting to influence any of the following in connection with the application:

- An officer or employee of any federal agency;
- A member of Congress;
- An officer or employee of Congress; or
- An employee of a member of Congress.

Save the SF-LLL in a single PDF file using the following naming convention for the title "ControlNumber_LeadOrganization_SF-LLL".

xvii. Waiver Requests (if applicable) (April 2023)

i. Foreign Entity Participation

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

For projects selected under this FOA, all recipients and subrecipients must qualify as domestic entities. See Section III, “Eligibility Information; Eligible Applicants”. To request a waiver of this requirement, the applicant must submit an explicit waiver request in the Full Application. The “Waiver Requests: Foreign Entity Participation as the Prime Recipient and Performance of Work in the United States” appendix lists the information that must be included in a waiver request.

ii. Foreign Work Waiver Request

As set forth in Section IV, “Application and Submission Information; Performance of Work in the United States (Foreign Work Waiver), all work for projects selected under this FOA must be performed in the United States. To request a waiver of this requirement, the applicant must submit an explicit waiver request in the Full Application. The “Waiver Requests: Foreign Entity Participation and Performance of Work in the United States appendix lists the information that must be included in a foreign work waiver request.

Save the Waivers in a single PDF file using the following naming convention for the title “ControlNumber_LeadOrganization_FN_Waiver.pdf”.

xviii. Data Management Plan

Applicants are required to submit a Data Management Plan as part of their Full Application. The Data Management Plan is a document that outlines the proposed plan for data sharing or preservation. Submission of this plan is required with the full application, and failure to submit the plan may result in rejection of the application without further consideration. Applicants shall prepare the Data Management Plan in the format provided in the “Data Management Plan” appendix of this FOA. Save the Data Management Plan in a single PDF file named “ControlNumber_LeadOrganization_DMP”.

xix. R&D Community Benefits Plan (April 2023)

The R&D Community Benefits Plan must set forth the applicant’s approach to ensuring the Federal investments advance the following three (3) objectives: (1) advance diversity, equity, inclusion and accessibility (DEIA); (2) contribute to energy equity; and (3) invest in America’s workforce. The below sections set forth the content requirements for the R&D Community Benefits Plan, which addresses each of the foregoing objectives. Applicants must address all three (3) sections.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

The applicant's R&D Community Benefits Plan must include at least one Specific, Measurable, Attainable, Realistic, and Timely (SMART) milestone per budget period to measure progress on the proposed actions. The R&D Community Benefits Plan will be evaluated as part of the technical review process.

If a project is selected for award, the selectee is responsible for developing a Community Benefits Outcomes and Objectives (CBOO) document. DOE will incorporate the Community Benefits Outcomes and Objectives <or> CBOO into the award and the recipient must implement its Community Benefits Outcomes and Objectives <or> CBOO when carrying out its project. Public transparency around the plan and SMART commitments ensure accountability. As such, DOE plans to make the content of each CBOO available publicly. In addition, DOE will evaluate the recipient's progress during the award period of performance, including as part of the Go/No-Go review process.

The plan should be specific to the proposed project and not a restatement of organizational policies. Applicants should describe the future implications or a milestone-based plan for identifying future implications of their research on energy equity, including, but not limited to, benefits for the U.S. workforce. These impacts may be uncertain, occur over a long period of time, and/or have many factors within and outside the specific proposed research. Applicants are encouraged to describe the influencing factors and the most likely workforce and energy equity implications of the proposed research if the research is successful. While some guidance and example activities are provided in the "R&D Community Benefits Plan Guidance" appendix, applicants are encouraged to leverage promising practices and develop a plan that is tailored for their project.

The Applicant's R&D Community Benefits Plan must address the following three (3) sections:

1) Diversity, Equity, Inclusion, and Accessibility (DEIA):

To building a clean and equitable energy economy, it is important that there are opportunities for people of all racial, ethnic, socioeconomic and geographic backgrounds, sexual orientation, gender identity, persons with disabilities, and those re-entering the workforce from incarceration. This section of the plan must demonstrate how DEIA is incorporated in the technical project objectives. The plan must identify the specific action the applicant would undertake that integrated into the research goals and project teams. Submitting an institutional DEIA plan without specific integration into the project will be deemed insufficient.

2) Energy Equity:

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

This section must articulate the applicant's consideration of long-term equity implications of the research. It must identify how the specific project integrates equity considerations into the project design to support equitable outcomes should the innovation be successful. Like cost reductions and commercialization plans, the R&D Community Benefits Plan requires description of the equity implications of the innovation.

3) Workforce Implications:

This section must articulate the applicant's consideration of long-term workforce impacts and opportunities for the research. It must identify how the project is designed and executed to include an understanding of the future workforce needs should the resulting innovations be successful.

See the "R&D Community Benefits Plan Guidance" appendix for additional guidance.

The R&D Community Benefits Plan must not exceed 5 pages. Save this plan in a single PDF file named "ControlNumber_LeadOrganization_CBP".

xx. Current and Pending Support (April 2023)

Current and pending support is intended to allow the identification of potential duplication, overcommitment, potential conflicts of interest or commitment, and all other sources of support. As part of the application, the principal investigator and all senior/key personnel at the applicant and subrecipient level must provide a list of all sponsored activities, awards, and appointments, whether paid or unpaid; provided as a gift with terms or conditions or provided as a gift without terms or conditions; full-time, part-time, or voluntary; faculty, visiting, adjunct, or honorary; cash or in-kind; foreign or domestic; governmental or private-sector; directly supporting the individual's research or indirectly supporting the individual by supporting students, research staff, space, equipment, or other research expenses. All connections with foreign government-sponsored talent recruitment programs must be identified in current and pending support.

For every activity, list the following items:

- The sponsor of the activity or the source of funding;
- The award or other identifying number;
- The title of the award or activity. If the title of the award or activity is not descriptive, add a brief description of the research being performed that would identify any overlaps or synergies with the proposed research;

Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.

Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include

FOA name and number in subject line.

- The total cost or value of the award or activity, including direct and indirect costs and cost share. For pending proposals, provide the total amount of requested funding;
- The award period (start date through end date); and
- The person-months of effort per year being dedicated to the award or activity.

To identify overlap, duplication of effort, or synergistic efforts, append a description of the other award or activity to the current and pending support.

Details of any obligations, contractual or otherwise, to any program, entity, or organization sponsored by a foreign government must be provided on request to either the applicant institution or DOE. Supporting documents of any identified source of support must be provided to DOE on request, including certified translations of any document.

PIs and senior/key personnel must provide a separate disclosure statement listing the required information above regarding current and pending support. Each individual must sign and date their respective disclosure statement and include the following certification statement:

I, [Full Name and Title], certify to the best of my knowledge and belief that the information contained in this Current and Pending Support Disclosure Statement is true, complete and accurate. I understand that any false, fictitious, or fraudulent information, misrepresentations, half-truths, or omissions of any material fact, may subject me to criminal, civil or administrative penalties for fraud, false statements, false claims or otherwise. (18 U.S.C. §§ 1001 and 287, and 31 U.S.C. §§ 3729-3733 and 3801-3812). I further understand and agree that (1) the statements and representations made herein are material to DOE's funding decision, and (2) I have a responsibility to update the disclosures during the project period of performance of the award should circumstances change which impact the responses provided above.

The information may be provided in the approved common disclosure format available at

https://www.nsf.gov/bfa/dias/policy/researchprotection/commonform_cps.pdf.

Save this plan in a single PDF file named
"ControlNumber_LeadOrganization_CPS.pdf".

Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.

Definitions:

Current and pending support – (a) All resources made available, or expected to be made available, to an individual in support of the individual's RD&D efforts, regardless of (i) whether the source is foreign or domestic; (ii) whether the resource is made available through the entity applying for an award or directly to the individual; or (iii) whether the resource has monetary value; and (b) includes in-kind contributions requiring a commitment of time and directly supporting the individual's RD&D efforts, such as the provision of office or laboratory space, equipment, supplies, employees, or students. This term has the same meaning as the term Other Support as applied to researchers in NSPM-33: For researchers, Other Support includes all resources made available to a researcher in support of and/or related to all of their professional RD&D efforts, including resources provided directly to the individual or through the organization, and regardless of whether or not they have monetary value (e.g., even if the support received is only in-kind, such as office/laboratory space, equipment, supplies, or employees). This includes resource and/or financial support from all foreign and domestic entities, including but not limited to, gifts provided with terms or conditions, financial support for laboratory personnel, and participation of student and visiting researchers supported by other sources of funding.

Foreign Government-Sponsored Talent Recruitment Program – An effort directly or indirectly organized, managed, or funded by a foreign government, or a foreign government instrumentality or entity, to recruit science and technology professionals or students (regardless of citizenship or national origin, or whether having a full-time or part-time position). Some foreign government-sponsored talent recruitment programs operate with the intent to import or otherwise acquire from abroad, sometimes through illicit means, proprietary technology or software, unpublished data and methods, and intellectual property to further the military modernization goals and/or economic goals of a foreign government. Many, but not all, programs aim to incentivize the targeted individual to relocate physically to the foreign state for the above purpose. Some programs allow for or encourage continued employment at United States research facilities or receipt of federal research funds while concurrently working at and/or receiving compensation from a foreign institution, and some direct participants not to disclose their participation to United States entities. Compensation could take many forms including cash, research funding, complimentary foreign travel, honorific titles, career advancement

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

opportunities, promised future compensation, or other types of remuneration or consideration, including in-kind compensation.

Senior/Key Personnel – An individual who contributes in a substantive, meaningful way to the scientific development or execution of a research, development and demonstration (RD&D) project proposed to be carried out with DOE award.¹⁹

xxi. Transparency of Foreign Connections

Applicants must provide the following as it relates to the proposed recipient and subrecipients. Include a separate disclosure for the applicant and each proposed subrecipient. U.S. National Laboratories, domestic government entities, and institutions of higher education are only required to respond to items 1, 2 and 9, and if applying as to serve as the prime recipient, must provide complete responses for project team members that are not U.S. National Laboratories, domestic government entities, or institutions of higher education.

1. Entity name, website address, and physical address;
2. The identity of all owners, principal investigators, project managers, and senior/key personnel who are a party to any *Foreign Government-Sponsored Talent Recruitment Program* of a foreign country of risk (i.e., China, Iran, North Korea, and Russia);
3. The existence of any joint venture or subsidiary that is based in, funded by, or has a foreign affiliation with any foreign country of risk;
4. Any current or pending contractual or financial obligation or other agreement specific to a business arrangement, or joint venture-like arrangement with an enterprise owned by a foreign state or any foreign entity;
5. Percentage, if any, that the proposed recipient or subrecipient has foreign ownership or control;
6. Percentage, if any, that the proposed recipient or subrecipient is wholly or partially owned by an entity in a foreign country of risk;
7. Percentage, if any, of venture capital or institutional investment by an entity that has a general partner or individual holding a leadership role in such entity who has a foreign affiliation with any foreign country of risk;

¹⁹ Typically, these individuals have doctoral or other professional degrees, although individuals at the masters or baccalaureate level may be considered senior/key personnel if their involvement meets this definition. Consultants, graduate students, and those with a postdoctoral role also may be considered senior/key personnel if they meet this definition.

8. Any technology licensing or intellectual property sales to a foreign country of risk, during the 5-year period preceding submission of the proposal;
9. Any foreign business entity, offshore entity, or entity outside the United States related to the proposed recipient or subrecipient;
10. Complete list of all directors (and board observers), including their full name, citizenship and shareholder affiliation, date of appointment, duration of term, as well as a description of observer rights as applicable;
11. Complete capitalization table for your entity, including all equity interests (including LLC and partnership interests, as well as derivative securities). Include both the number of shares issued to each equity holder, as well as the percentage of that series and all equity on a fully diluted basis. Identify the principal place of incorporation (or organization) for each equity holder. If the equity holder is a natural person, identify the citizenship(s). If the recipient or subrecipient is a publicly traded company, provide the above information for shareholders with an interest greater than 5%;
12. A summary table identifying all rounds of financing, the purchase dates, the investors for each round, and all the associated governance and information rights obtained by investors during each round of financing; and
13. An organization chart to illustrate the relationship between your entity and the immediate parent, ultimate parent, and any intermediate parent, as well as any subsidiary or affiliates. Identify where each entity is incorporated.

DOE reserves the right to request additional or clarifying information based on the information submitted.

Save the Transparency of Foreign Connections information in a single PDF file using the following convention for the title:

"ControlNumber_LeadOrganization_TFC."

xxii. Potentially Duplicative Funding Notice

If the applicant or project team member has other active awards of federal funds, the applicant must determine whether the activities of those awards potentially overlap with the activities set forth in its application to this FOA. If there is a potential overlap, the applicant must notify DOE in writing of the potential overlap and state how it will ensure any project funds (i.e., recipient cost share and federal funds) will not be used for identical cost items under

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

multiple awards. Likewise, for projects that receive funding under this FOA, if a recipient or project team member receives any other award of federal funds for activities that potentially overlap with the activities funded under the DOE award, the recipient must promptly notify DOE in writing of the potential overlap and state whether project funds from any of those other federal awards have been, are being, or are to be used (in whole or in part) for one or more of the identical cost items under the DOE award. If there are identical cost items, the recipient must promptly notify the DOE Contracting Officer in writing of the potential duplication and eliminate any inappropriate duplication of funding.

Save the Potentially Duplicative Funding Notice in a single PDF file named "ControlNumber_LeadOrganization_PDFN.pdf".

C. Post Selection Information Requests (April 2023)

If selected for award negotiations, DOE reserves the right to require that selected applicants provide additional or clarifying information regarding the application submissions, the project, the project team, the award requirements, and any other matters related to anticipated award. The following is a non-exhaustive list of examples of information that may be required:

- Personnel proposed to work on the project and collaborating organizations (See Section VI, "Award Administration Information; Participants and Collaborating Organizations");
- Current and Pending Support (See Section VI, "Award Administration Information; Current and Pending Support");
- Indirect cost information;
- Other budget information;
- Name and phone number of the Designated Responsible Employee for complying with national policies prohibiting discrimination (See 10 CFR 1040.5);
- Listing of Protected Data and Unlimited Rights Data, if applicable;
- Representation of Limited Rights Data and Restricted Software, if applicable;
- Updated Commitment Letters from Third Parties Contributing to Cost Share, if applicable;
- Updated Environmental Questionnaire, if applicable;
- Foreign National Participation;
- Information for the DOE Office of Civil Rights to process assurance reviews under 10 CFR 1040;

D. Submission Dates and Times

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

All required submissions must be submitted in NETL eXCHANGE as specifically stated in the announcement no later than 5 p.m. ET on the dates provided on the cover page of this FOA. **APPLICATIONS RECEIVED AFTER THE DEADLINE WILL NOT BE REVIEWED OR CONSIDERED FOR AWARD.**

E. Intergovernmental Review

This program is not subject to Executive Order 12372 - Intergovernmental Review of Federal Programs.

F. Other Submission and Registration Requirements

i. Registration Requirements

There are several one-time actions before submitting an application in response to this FOA, and it is vital that applicants address these items as soon as possible. Some may take several weeks, and failure to complete them could interfere with an applicant's ability to apply to this FOA, or to meet the negotiation deadlines and receive an award if the application is selected. These requirements are as follows:

1. NETL Funding Opportunity Exchange (eXCHANGE)

Register and create an account on NETL eXCHANGE at <https://NETL-eXCHANGE.energy.gov>. This account will allow the user to apply to any open NETL FOAs that are currently in NETL eXCHANGE.

To access NETL eXCHANGE, potential applicants must have a Login.gov account. As part of the eXCHANGE registration process, new users will be directed to create an account in Login.gov. Please note that the email address associated with Login.gov must match the email address associated with the eXCHANGE account. For more information, refer to the eXCHANGE Multi-Factor Authentication (MFA) Quick Guide in the Manuals section of eXCHANGE.

Each organization or business unit, whether acting as a team or a single entity, should use only one account as the contact point for each submission. Applicants should also designate backup points of contact. This step is required to apply to this FOA. The eXCHANGE registration does not have a delay; however, the remaining registration requirements

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

below could take several weeks to process and are necessary for a potential applicant to receive an award under this FOA.

2. System for Award Management

Register with the SAM at <https://www.sam.gov>. Designating an Electronic Business Point of Contact (EBiz POC) is an important step in SAM registration. The EBiz POC is used for entity verification with other systems. Please update your SAM registration annually.

3. FedConnect

Register in FedConnect at <https://www.fedconnect.net>. Registration is required to receive notification that a funding agreement has been executed by the Contracting Officer and to obtain a copy of the executed funding agreement, if applicable. Only individuals who are designated as EBiz POC in SAM can create a new company account. For more information about registration requirements, review the FedConnect *Ready, Set, Go!* guide at https://www.fedconnect.net/FedConnect/Marketing/Documents/FedConnect_Ready_Set_Go.pdf.

4. Grants.gov

Register in Grants.gov at <https://www.grants.gov> to receive automatic updates about this FOA. Please note that Full Applications will not be accepted through Grants.gov.

ii. Electronic Authorization of Applications and Award Documents

Submission of an application and supplemental information under this FOA through electronic systems used by the DOE, including NETL eXCHANGE and FedConnect, constitutes the authorized representative's approval and electronic signature.

G. Funding Restrictions (April 2023)

Funding for all awards and future budget periods are contingent upon the availability of funds appropriated by Congress for the purpose of this program and the availability of future-year budget authority.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

Costs must be allowable, allocable and reasonable in accordance with the applicable federal cost principles referenced in 2 CFR part 200 as supplemented by 2 CFR part 910. Pursuant to 2 CFR 910.352, the cost principles in the Federal Acquisition Regulations (48 CFR 31.2) apply to for-profit entities. The cost principles contained in 2 CFR Part 200, Subpart E apply to all entities other than for-profits.

H. Pre-Award Costs

Recipients may charge to an award resulting from this announcement pre-award costs that were incurred within the ninety (90) calendar day period immediately preceding the effective date of the award, if the costs are allowable in accordance with the applicable Federal cost principles referenced in 2 CFR part 200 as supplemented by 2 CFR part 910 [DOE Financial Assistance Regulation]. Recipients must obtain the prior approval of the contracting officer for any pre-award costs that are for periods greater than this 90-day calendar period.

Pre-award costs are incurred at the applicant's risk. DOE is under no obligation to reimburse such costs if for any reason the applicant does not receive an award or if the award is made for a lesser amount than the applicant expected.

I. Pre-Award Costs Related to National Environmental Policy Act (NEPA) Requirements

DOE's decision whether and how to distribute Federal funds under this FOA is subject to NEPA. Applicants should carefully consider and should seek legal counsel or other expert advice before taking any action related to the proposed project that would have an adverse effect on the environment or limit the choice of reasonable alternatives prior to DOE completing the NEPA review process.

DOE does not guarantee or assume any obligation to reimburse pre-award costs incurred prior to receiving written authorization from the Contracting Officer. If the applicant elects to undertake activities that DOE determines may have an adverse effect on the environment or limit the choice of reasonable alternatives prior to receiving such written authorization from the Contracting Officer, the applicant is doing so at risk of not receiving Federal funding for the project and such costs may not be recognized as allowable cost share. Nothing contained in the pre-award cost reimbursement regulations or any pre-award costs approval letter from the Contracting Officer override these NEPA requirements to obtain the written authorization from the Contracting Officer prior to taking any action that may have an adverse effect on the environment or limit the choice of reasonable alternatives. Likewise, if a project is selected for negotiation of award, and the Prime Recipient

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

elects to undertake activities that are not authorized for Federal funding by the Contracting Officer in advance of DOE completing a NEPA review, the Prime Recipient is doing so at risk of not receiving Federal Funding and such costs may not be recognized as allowable cost share.

J. Performance of Work in the United States (Foreign Work Waiver) (April 2023)

i. Requirement

All work performed under DOE awards issued under this FOA must be performed in the United States. The prime recipient must flow down this requirement to its subrecipients.

ii. Failure to Comply

If the prime recipient fails to comply with the Performance of Work in the United States requirement, DOE may deny reimbursement for the work conducted outside the United States and such costs may not be recognized as allowable recipient cost share. The prime recipient is responsible should any work under this award be performed outside the United States, absent a waiver, regardless of whether the work is performed by the prime recipient, subrecipients, contractors or other project partners.

iii. Waiver

To seek a foreign work waiver, the applicant must submit a written waiver request to DOE. The “Waiver Requests: Foreign Entity Participation and Performance of Work in the United States” Appendix lists the information that must be included in a request for a foreign work waiver.

It is noted that direct labor associated with foreign travel to attend or present at a scientific/technical conference or consortium that has been approved by DOE does not require a waiver.

K. Foreign Travel

Foreign Travel is allowed under this FOA with DOE/NETL prior approval.

If international travel is proposed for your project, please note that your organization must comply with the International Air Transportation Fair Competitive Practices Act of 1974 (49 USC 40118), commonly referred to as the “Fly America

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

Act,” and implementing regulations at 41 CFR 301-10.131 through 301-10.143. The law and regulations require air transport of people or property to, from, between, or within a country other than the United States, the cost of which is supported under this award, to be performed by or under a cost-sharing arrangement with a U.S. flag carrier, if service is available.

L. Equipment and Supplies

To the greatest extent practicable, all equipment and products purchased with funds made available under this FOA should be American-made. This requirement does not apply to used or leased equipment.

M. Buy America Requirements for Infrastructure Projects (April 2023)

Pursuant to the Build America Buy America Act, subtitle IX of the Infrastructure Investment and Jobs Act²⁰, more commonly known as the Bipartisan Infrastructure Law (BIL) (Buy America, or “BABA”), Federally assisted projects that involve infrastructure work, undertaken by applicable recipient types, require that:

- all iron, steel, and manufactured products used in the infrastructure work are produced in the United States; and
- all construction materials used in the infrastructure work are manufactured in the United States.

Whether a given project must apply this requirement is project-specific and dependent on several factors, such as the recipient’s entity type, whether the work involves “infrastructure,” as that term is defined in Section 70914 of the Bipartisan Infrastructure Law, and whether the infrastructure in question is publicly owned or serves a public function.

Applicants are strongly encouraged to consult the “Required Use of American Iron, Steel, Manufactured Products, and Construction Materials-Buy America Requirement for Infrastructure Projects” Appendix of this FOA to determine whether their project may have to apply this requirement, both to make an early determination as to the need of a waiver, as well as to determine what impact, if any, this requirement may have on the proposed project’s budget.

²⁰ Infrastructure Investment and Jobs Act, Public Law 117-58 (November 15, 2021).
<https://www.congress.gov/bill/117th-congress/house-bill/3684>.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

Please note that, based on the implementation guidance from the Office of Management and Budget (OMB) issued on October 25, 2023, the Buy America requirements of the BIL do not apply to DOE projects in which the prime recipient is a for-profit entity; the requirements only apply to projects whose prime recipient is a “non-Federal entity,” e.g., a State, local government, Indian tribe, Institution of Higher Education, or nonprofit organization. Subawards should conform to the terms of the prime award from which they flow; in other words, for-profit prime recipients are not required to flow down these Buy America requirements to subrecipients, even if those subrecipients are non-Federal entities as defined above. Conversely, prime recipients which are non-Federal entities must flow the Buy America requirements down to all subrecipients, even if those subrecipients are for-profit entities. Finally, for all applicants—both non-Federal entities and for-profit entities—DOE is including a Program Policy Factor that the Selection Official may consider in determining which Full Applications to select for award negotiations that considers whether the applicant has made a commitment to procure U.S. iron, steel, manufactured products, and construction materials in its project.

The DOE financial assistance agreement will require each recipient: (1) to fulfill the commitments made in its application regarding the procurement of U.S.-produced products and (2) to fulfill the commitments made in its application regarding the procurement of other key component metals and manufactured products domestically that are deemed available in sufficient and reasonably available quantities or of a satisfactory quality at the time of award negotiation. Applicants may seek waivers of these requirements in very limited circumstances and for good cause shown. Further details on requesting a waiver can be found in The “Required Use of American Iron, Steel, Manufactured Products, and Construction Materials – Buy America Requirements for Infrastructure Projects” Appendix and the terms and conditions of an award

Applicants are strongly encouraged to consult the “Required Use of American Iron, Steel, Manufactured Products, and Construction Materials – Buy America Requirements for Infrastructure Projects” Appendix and 2 CFR 184 for more information.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

V. Application Review Information

A. Review Criteria

i. Compliance/Responsiveness Review

Prior to a comprehensive merit evaluation, DOE will (1) perform a compliance review to determine that submissions are timely and the information required by the FOA has been submitted (form and content requirements); and (2) perform a responsiveness review to determine that the Applicant is eligible for an award and the proposed project is responsive to the objectives of the FOA. Applications that fail the compliance and responsiveness review will not be forwarded for merit review and will be eliminated from further consideration.

ii. Full Application Merit Review Criteria

The following evaluation criteria will be utilized by the Technical Evaluation Committee and Federal Merit Review Panel members in conducting their evaluations of applications subjected to comprehensive merit review.

Merit Review Criterion 1: Scientific and Technological Merit (25%)

- Thoroughness of the description of the proposed technology and degree to which the proposed technology or methodology meets the stated objectives of the FOA;
- Degree to which the Applicant comprehensively advances arguments and provides details that clearly distinguishes the proposed R&D and why it is needed now relative to prior work;
- Overall quality and feasibility of the proposed concept; the degree to which the proposed work is based on sound scientific and engineering principles;
- The proposed project's ability to address the regional and national potential for recovery of REE and other CMM from secondary and unconventional sources; and
- The degree to which the application presents an awareness of and/or access to available data, samples, and other information related to the project's objectives.

Merit Review Criterion 2: Technical Approach and Understanding (40%)

- Adequacy and feasibility of the Applicant's approach to achieving the objectives of the FOA;

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

- Feasibility, appropriateness, rationale, and completeness of the proposed Statement of Project Objectives, such that there is a logical progression of work;
- The adequacy and completeness of the Project Management Plan (PMP) in establishing baselines (technical scope, budget, schedule) and in managing project performance relative to those baselines; defining the actions that will be taken when these baselines must be revised; and identification of project risks and strategies for mitigation;
- Demonstrated plan for the development of partnerships in the region of interest and commitment to engage with adjacent regions to ensure coverage across the nation.;
- Adequacy of the plan to: develop best practices manuals; to participate in crosscutting work groups; to support the development of a national prospectus; and to provide data acquired during the project to the EDX.

Merit Review Criterion 3: Technical and Management Capabilities (25%)

- Demonstrated experience of the applicant and partnering organizations in the technology areas addressed in the application and in managing projects of similar size, scope, and complexity;
- Demonstrated plan and list of Teaming Partners in the region;
- Credentials, capabilities, and experience of key personnel and partnering organizations;
- Clarity and likely effectiveness of the project organization, including sub-recipients or partners, to successfully complete the project;
- Adequacy and availability of proposed personnel, facilities, and equipment to perform project tasks; and
- Development of an effective Data Management Plan.

Criterion 4: R&D Community Benefits Plan (10%)

Diversity, Equity, Inclusion, and Accessibility (DEIA)

- Clear articulation of the project's goal related to diversity, equity, inclusion, and accessibility;
- Quality of the project's DEIA goals, as measured by the goals' depth, breadth, likelihood of success, inclusion of appropriate and relevant SMART milestones, and overall project integration;
- Degree of applicant's commitment and ability to track progress towards meeting each of the diversity, equity, inclusion, and accessibility goals; and

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

- Extent of engagement of organizations that represent disadvantaged communities as a core element of their mission.

Energy Equity

- Clear workplan tasks, staffing, research, and timeline for engaging energy equity stakeholders and/or evaluating the possible near and long-term implications of the project for the benefit of the American public; including but not limited to the public health and public prosperity benefits;
- Approach, methodology, and expertise articulated in the plan for addressing energy equality and justice issues associated with the technology innovation; and
- Likelihood that the plan will result in improved understanding of distributional public benefits and costs related to the innovation if successful.

Workforce Implications

- Clear and comprehensive workplan tasks, staffing, research, and timeline for engaging workforce stakeholders and/or evaluating the possible near and long-term implications of the project for the United States workforce;
- Approach to document the knowledge, skills, and abilities of the workforce required for successful commercial deployment of innovations resulting from this research; and
- Likelihood that the plan will result in improved understanding of the workforce implications related to the innovation if successful.

Budget Information Evaluation Criteria

- The budget evaluation, which is not point scored, will be conducted to determine the following:
 - Reasonableness, allowability, and allocation of the proposed cost and cost share.
 - Completeness and adequacy of the supporting documentation for the cost estimate.
 - Alignment and agreement of the SOPO tasks to the budget, and adequacy of associated supporting documentation.
- Correspondence between the budget estimate and the magnitude of the work proposed.

The Selection Official (SO) may consider the results of this evaluation when making selections.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

Environmental Evaluation Criteria

The Applicant must submit an environmental questionnaire providing for the work of the entire project. The Applicant is also responsible for submitting a separate environmental questionnaire for each proposed subrecipient performing at a different location. The environmental questionnaire is available at [NETL F 451.1-1/3 \(doe.gov\)](https://netl.doe.gov/sites/default/files/netl-file/Environmental%20Questionnaire%20-%20BIL%2040101d.pdf)²¹.

NOTE: If selected for award and if a subrecipient's location is not known at the time of application, a subsequent environmental questionnaire will be needed prior to them beginning work at an alternate location.

The SO may consider the results of this evaluation when making selections.

B. Other Selection Factors

i. Program Policy Factors

In addition to the above criteria, the Selection Official may consider the following program policy factors in determining which Full Applications to select for award negotiations:

- It may be desirable to select for award a project, or group of projects, that represent a diversity of technical approaches and methods under this FOA or the overall program.
- It may be desirable to support complementary and/or similar projects which, when taken together, will best achieve the program's research goals and objectives.
- It may be desirable that different kinds and sizes of organizations be selected for award in order to provide a balanced programmatic effort and a variety of technical perspectives under this FOA or the overall program. For example, it may be desirable to select a project, or group of projects, that exhibit team member diversity, with participants including but not limited to those from MSIs (e.g. HBCUs/OMIs)²².

²¹ <https://netl.doe.gov/sites/default/files/netl-file/Environmental%20Questionnaire%20-%20BIL%2040101d.pdf>

²² Minority Serving Institutions (MSIs), including HBCUs/OMIs as educational entities recognized by the Office of Civil Rights (OCR), U.S. Department of Education, and identified on the OCR's Department of Education U.S. accredited postsecondary minorities' institution list. See <https://www2.ed.gov/about/offices/list/ocr/edlite-minorityinst.html>.

- In order to best achieve the program’s research goals and objectives, it may be desirable to select for award a project or group of projects with a broad or specific geographic distribution under this FOA or the overall program.
- It may be desirable to select a project, or group of projects, if such a selection will optimize use of available funds.
- It may be desirable to select a project, or group of projects, if such a selection presents lesser schedule risk, lesser budget risk, lesser technical risk, and/or lesser environmental risks. Environmental risk includes, but is not limited to, an adverse impact to air, soil, water, or increase in overall cradle to grave greenhouse gas footprint (carbon dioxide equivalent, CO₂e).
- It may be desirable to select an entity located in an urban and economically distressed area including a Qualified Opportunity Zone (QOZ) or to select a project, or group of projects, if the proposed project(s) will occur in a QOZ or otherwise advance the goals of a QOZ, including spurring economic development and job creation in distressed communities throughout the United States.
- It may be desirable to select a project based on the degree to which the proposed project will employ procurement of U.S. iron, steel, manufactured products, and construction materials.
- It may be desirable to select a project based on the degree to which the proposed project, when compared to the existing DOE project portfolio and other projects to be selected from the subject FOA, contributes to the total portfolio meeting the goals reflected in the Community Benefits Plan criteria.

C. Other Review Requirements

i. Risk Assessment (May 2023)

Pursuant to 2 CFR 200.206, DOE will conduct an additional review of the risk posed by applications submitted under this FOA. Such risk assessment will consider:

- Financial stability;
- Quality of management systems and ability to meet the management standards prescribed in 2 CFR 200 as supplemented by 2 CFR 910;
- History of performance;
- Audit reports and findings; and

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

- The applicant's ability to effectively implement statutory, regulatory, or other requirements imposed on non-Federal entities.

DOE may make use of other publicly available information and the history of an applicant's performance under DOE or other federal agency awards.

Depending on the severity of the findings and whether the findings were resolved, DOE may elect not to fund the applicant.

In addition to this review, DOE must comply with the guidelines on government-wide suspension and debarment in 2 CFR 180, and must require non-Federal entities to comply with these provisions. These provisions restrict Federal awards, subawards and contracts with certain parties that are debarred, suspended or otherwise excluded from or ineligible for participation in Federal programs or activities.

Further, as DOE invests in critical infrastructure and funds critical and emerging technology areas, DOE also considers threats to United States research, technology, and economic security from undue foreign government influence when evaluating risk. If high risks are identified and cannot be sufficiently mitigated, DOE may elect to not fund the applicant. As part of the research, technology, and economic security risk review, DOE may contact the applicant and/or proposed project team members for additional information to inform the review.

ii. Recipient Responsibility and Qualifications (May 2023)

DOE, prior to making a Federal award with a total amount of Federal share greater than the simplified acquisition threshold, is required to review and consider any responsibility and qualification information about the applicant that is in entity information domain in SAM.gov (see 41 U.S.C. 2313).

The applicant, at its option, may review information in the entity information domain in SAM.gov and comment on any information about itself that a federal awarding agency previously entered and is currently in the entity information domain in SAM.gov.

DOE will consider any written comments by the applicant, in addition to the other information in the entity information domain in SAM.gov, in making a judgment about the applicant's integrity, business ethics, and record of performance under Federal awards when completing the review of risk

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

posed by applicants as described in 2 CFR 200.206 - Federal awarding agency review of risk posed by applicants.

D. Review and Selection Process

i. Merit Review

Applications that pass the compliance/responsiveness review will be subjected to a merit review in accordance with the Merit Review Criteria listed in the FOA and the guidance provided in the "Merit Review Guide for Financial Assistance and Unsolicited Proposals." This guide is available at <https://energy.gov/management/financial-assistance>.

ii. Selection

The Selection Official may consider the merit review, program policy factors, and risk reviews, and the amount of funds available in arriving at selections for this FOA.

iii. Discussions and Award

The Government may enter into discussions with a selected applicant for any reason deemed necessary, including but not limited to: (1) the budget is not appropriate or reasonable for the requirement; (2) only a portion of the application is selected for award; (3) the Government needs additional information to determine that the recipient is capable of complying with the requirements in 2 CFR part 200 as supplemented by 2 CFR part 910 [DOE Financial Assistance Regulation]; and/or (4) special terms and conditions are required. Failure to resolve satisfactorily the issues identified by the Government will preclude award to the applicant.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

VI. Award Administration Information

A. Notices

i. Ineligible Submissions

Ineligible Full Applications will not be further reviewed or considered for award. The Contracting Officer will send a notification letter by email to the technical and administrative points of contact designated by the applicant in NETL eXCHANGE. The notification letter will state the basis upon which the Full Application is ineligible and not considered for further review.

ii. Full Application Notifications

DOE will notify applicants of its determination via a notification letter by email to the technical and administrative points of contact designated by the applicant in NETL eXCHANGE. The notification letter will inform the applicant whether or not its Full Application was selected for award negotiations. Alternatively, DOE may notify one or more applicants that a final selection determination on particular Full Applications will be made at a later date, subject to the availability of funds or other factors.

(a) Successful Applicants

Receipt of a notification letter selecting a Full Application for award negotiations does not authorize the applicant to commence performance of the project. If an application is selected for award negotiations, it is not a commitment by DOE to issue an award. Applicants do not receive an award until award negotiations are complete and the Contracting Officer executes the funding agreement, accessible by the Prime Recipient in FedConnect.

The award negotiation process may take up to 60 days. Applicants must designate a primary and a backup point-of-contact in NETL eXCHANGE with whom DOE will communicate to conduct award negotiations. The applicant must be responsive during award negotiations (i.e., provide requested documentation) and meet the negotiation deadlines. If the applicant fails to do so or if award negotiations are otherwise unsuccessful, DOE will cancel the award negotiations and rescind the selection. DOE reserves the right to terminate award negotiations at any time for any reason.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

Please refer to Section IV, “Application and Submission Information; Pre-Award Costs” of the FOA for guidance on pre-award costs.

(b) Unsuccessful Applicants

DOE shall promptly notify in writing each applicant whose application has not been selected for negotiation or award. This notice will explain why the application was not selected.

(c) Alternate Selection Determinations

In some instances, an applicant may receive a notification that its application was not selected for award and DOE designated the application to be an alternate. As an alternate, DOE may consider the Full Application for Federal funding in the future. A notification letter stating the Full Application is designated as an alternate does not authorize the applicant to commence performance of the project. DOE may ultimately determine to select or not select the Full Application for award negotiations.

(d) Notice of Award

An Assistance Agreement issued by the Contracting Officer is the authorizing award document. It normally includes either as an attachment or by reference: (1) Special Terms and Conditions; (2) Applicable program regulations, if any; (3) Application, which includes the project description and budget, as approved by DOE; (4) 2 CFR part 200 as supplemented by 2 CFR part 910; (5) National Policy Assurances To Be Incorporated As Award Terms; (6) Budget Summary; (7) Federal Assistance Reporting Checklist and Instructions, which identifies the reporting requirements; (8) Intellectual Property; (9) Federal-wide Research Terms and Conditions; (10) Agency Specific Requirements; and (11) any award specific terms and conditions.

B. Administrative and National Policy Requirements

i. Award Administrative Requirements

The administrative requirements for DOE grants and cooperative agreements are contained in 2 CFR Part 200 as supplemented by 2 CFR Part 910.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

DOE Special Terms and Conditions for Use in Most Grants and Cooperative Agreements.

The DOE Special Terms and Conditions for Use in Most Grants and Cooperative Agreements are located at

<https://www.energy.gov/management/financial-assistance-forms-and-information-applicants-and-recipients> under Award Terms.

National Policy Requirements. The National Policy Assurances that are incorporated as a term and condition of award are located at:

<https://www.energy.gov/management/financial-assistance-forms-and-information-applicants-and-recipients>.

Intellectual Property Provisions. The standard DOE financial assistance intellectual property provisions applicable to the various types of recipients are located at:

<https://energy.gov/gc/standard-intellectual-property-ip-provisions-financial-assistance-awards>.

ii. Unique Entity Identifier Requirements and System for Award Management (April 2023)

Each applicant (unless the applicant is an individual or federal awarding agency that is excepted from those requirements under 2 CFR 25.110(b) or (c), or has an exception approved by the federal awarding agency under 2 CFR 25.110(d)) is required to: (1) Be registered in the SAM at <https://www.sam.gov> before submitting its application; (2) provide a valid UEI number in its application; and (3) continue to maintain an active SAM registration with current information at all times during which it has an active federal award or an application or plan under consideration by a federal awarding agency. DOE may not make a federal award to an applicant until the applicant has complied with all applicable UEI and SAM requirements and, if an applicant has not fully complied with the requirements by the time DOE is ready to make a federal award, the DOE will determine that the applicant is not qualified to receive a federal award and use that determination as a basis for making a federal award to another applicant.

NOTE: Due to the high demand of UEI requests and SAM registrations, entity legal business name and address validations are taking longer than expected to process. Entities should start the UEI and SAM registration process as soon as possible. If entities have technical difficulties with the UEI validation or SAM registration process, they should utilize the **HELP** feature on **SAM.gov**. SAM.gov will work entity service tickets in the order in which they

Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.

Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include

FOA name and number in subject line.

are received and asks that entities not create multiple service tickets for the same request or technical issue. Additional entity validation resources can be found here: [GSAFSD Tier 0 Knowledge Base - Validating your Entity](#).

iii. Uniform Commercial Code (UCC) Financing Statements

Per 2 CFR 910.360 (Real Property and Equipment) when a piece of equipment is purchased by a for-profit recipient or subrecipient with Federal Funds (federal and/or non-federal), and when the Federal share of the financial assistance agreement is more than \$1,000,000, the recipient or subrecipient must:

Properly record, and consent to the Department's ability to properly record if the recipient fails to do so, Uniform Commercial Code (UCC) financing statement(s) for all equipment in excess of \$5,000 purchased with project funds. These financing statement(s) must be approved in writing by the contracting officer prior to the recording, and they shall provide notice that the Recipient's title to all equipment (not real property) purchased with Federal funds under the financial assistance agreement is conditional pursuant to the terms of this section, and that the Government retains an undivided reversionary interest in the equipment. The UCC financing statement(s) must be filed before the Contracting Officer may reimburse the recipient for the Federal share of the equipment unless otherwise provided for in the relevant financial assistance agreement. The recipient shall further make any amendments to the financing statements or additional recordings, including appropriate continuation statements, as necessary or as the contracting officer may direct.

Note: All costs associated with filing UCC financing statements, UCC financing statement amendments, and UCC financing statement terminations, are allowable and allocable costs to be charged to the Federal award.

iv. Foreign National Participation (April 2023)

All applicants selected for an award under this FOA and project participants (including subrecipients and contractors) who anticipate involving foreign nationals in the performance of an award, may be required to provide DOE with specific information about each foreign national to satisfy requirements for foreign national participation. A "foreign national" is defined as any person who is not a United States citizen by birth or naturalization. The volume and type of information collected may depend on various factors associated with the award. DOE concurrence may be required before a

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

foreign national can participate in the performance of any work under an award.

DOE may elect to deny foreign national's participation in the award. Likewise, DOE may elect to deny a foreign national's access to a DOE sites, information, technologies, equipment, programs or personnel.

v. Export Control (April 2023)

The United States government regulates the transfer of information, commodities, technology, and software considered to be strategically important to the United States to protect national security, foreign policy, and economic interests without imposing undue regulatory burdens on legitimate international trade. There is a network of federal agencies and regulations that govern exports that are collectively referred to as "Export Controls". All recipients and subrecipients are responsible for ensuring compliance with all applicable United States Export Control laws and regulations relating to any work performed under a resulting award.

The selected applicant must immediately report to DOE any export control indictments, charges, violations, or offenses, at the prime or subrecipient level, and in the case of violations or offenses, provide corrective action(s) to prevent future violations or offenses. The selected applicant must also immediately report export control investigations potentially implicating any technologies or equipment under an application or resulting award.

vi. Statement of Federal Stewardship

DOE will exercise normal Federal stewardship in overseeing the project activities performed under DOE Awards. Stewardship Activities include, but are not limited to, conducting site visits; reviewing performance and financial reports; providing assistance and/or temporary intervention in usual circumstances to correct deficiencies that develop during the project; assuring compliance with terms and conditions; and reviewing technical performance after project completion to ensure that the project objectives have been accomplished.

vii. Statement of Substantial Involvement

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

Cooperative agreements will be awarded under this announcement. There will be substantial involvement between the DOE and the Recipient during performance of this Cooperative Agreement.

Recipient's Responsibilities. The Recipient is responsible for:

- Performing the activities supported by this award in accordance with the Project Management Plan, including providing the required personnel, facilities, equipment, supplies and services;
- Managing and controlling project activities in accordance with established processes and procedures to ensure tasks and subtasks are completed within schedule and budget constraints defined by the current Project Management Plan;
- Implementing an approach to identify, analyze, and respond to project risks that is commensurate with the complexity of the project;
- Defining and revising approaches and plans, submitting the plans to DOE for review, and incorporating DOE comments;
- Coordinating related project activities with subrecipients and external suppliers, including contractors, to ensure effective integration of all work elements;
- Attending annual project review meetings and reporting project status;
- Participating in peer review evaluations of the project, or peer review evaluations of the program that their project supports;
- Submitting technical reports and publicly releasable documents that incorporate DOE comments;
- Presenting the project results at appropriate technical conferences or meetings as directed by the DOE Project Officer;
- Archive sample materials (e.g., hand samples, core sections, aliquots from waste streams) of REE and CM bearing materials and products for DOE access during conduct of this FOA and 5 years after the end of the award;
- Access of drill core material at the request of DOE/NETL;
- Submitting materials characterization information to DOE for use in a private workspace on NETL's Energy Data eXchange (EDX) website, future public release of selected data is anticipated; and
- Collection and formatting of data and information for contribution to DOE-NETL nationwide prospectus for CMM from unconventional resources, including coal, coal waste, AMD, and produced water. Data curation and management requirements will be discussed with DOE-NETL during award negotiations.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

It is noted that DOE is investing in the CORE-CM Initiative projects to provide technical assistance to stakeholders interested in developing CMM projects.

DOE Responsibilities. DOE has the right to intervene in the conduct or performance of project activities for programmatic reasons. Intervention includes the interruption or modification of the conduct or performance of project activities. Suspension or termination of the cooperative agreement under 2 CFR part 200, as supplemented by 2 CFR part 910 (DOE Financial Assistance Regulations) does not constitute intervention in the conduct or performance of project activities.

DOE is responsible for:

- Reviewing in a timely manner project plans, including project management, testing and technology transfer plans, and recommending alternate approaches, if the plans do not address critical programmatic issues;
- Participating in project management planning activities, including risk analysis, to ensure DOE's program requirements or limitations are considered in performance of the work elements;
- Conducting annual project review meetings to ensure adequate progress and that the work accomplishes the program and project objectives. Recommending alternate approaches or shifting work emphasis, if needed;
- Providing substantial involvement to ensure that project results address critical system and programmatic goals established by the DOE Office of Fossil Energy and Carbon Management, in coordination with DOE's Critical Minerals and Materials program;
- Promoting and facilitating technology transfer activities, including disseminating program results through presentations and publications;
- Serving as scientific/technical liaison between awardees and other program or industry staff; and
- Reviewing and concurring with ongoing technical performance to ensure that adequate progress has been obtained within the current Budget Period authorized by DOE before work can commence on subsequent Budget Periods.

viii. Environmental Review in Accordance with National Environmental Policy Act (NEPA)

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

DOE's decision whether and how to distribute federal funds under this FOA is subject to the National Environmental Policy Act (42 USC 4321, *et seq.*). NEPA requires Federal agencies to integrate environmental values into their decision-making processes by considering the potential environmental impacts of their proposed actions. For additional background on NEPA, please see DOE's NEPA website, at <http://nepa.energy.gov/>.

While NEPA compliance is a Federal agency responsibility and the ultimate decisions remain with the Federal agency, all recipients selected for an award will be required to assist in the timely and effective completion of the NEPA process in the manner most pertinent to their proposed project. If DOE determines certain records must be prepared to complete the NEPA review process (e.g., biological evaluations or environmental assessments), the recipient may be required to prepare the records and the costs to prepare the necessary records may be included as part of the project costs.

ix. Conference Spending

The recipient shall not expend **any** funds on a conference not directly and programmatically related to the purpose for which the grant or cooperative agreement was awarded that would defray the cost to the United States Government of a conference held by any Executive branch department, agency, board, commission, or office for which the cost to the United States Government would otherwise exceed \$20,000, thereby circumventing the required notification by the head of any such Executive Branch department, agency, board, commission, or office to the Inspector General (or senior ethics official for any entity without an Inspector General), of the date, location, and number of employees attending such conference.

x. Indemnity

Awards resulting from this FOA will contain the following provision reminding Recipients of DOE's rights of indemnification.

The Recipient shall indemnify the Government and its officers, agents, or employees for any and all liability, including litigation expenses and attorneys' fees, arising from suits, actions, or claims of any character for death, bodily injury, or loss of or damage to property or to the environment, resulting from the project, except to the extent that such liability results from the direct fault or negligence of Government officers, agents or employees, or to the extent such liability may be covered by applicable allowable costs provisions.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

xi. Go/No-Go Review

Each project selected under this FOA will be subject to a periodic project evaluation referred to as a Go/No-Go Review. At the Go/No-Go decision points, DOE will evaluate project performance, project schedule adherence, meeting milestone objectives, compliance with reporting requirements, and overall contribution to the DOE program goals and objectives. Federal funding beyond the Go/No Go decision point (continuation funding), is contingent on (1) the availability of funds appropriated by Congress for the purpose of this program; (2) the availability of future-year budget authority; (3) recipient's technical progress compared to the Milestone Summary Table stated in Attachment 1 of the award; (4) recipient's submittal of required reports; (5) recipient's compliance with the terms and conditions of the award; (6) DOE's Go/No-Go decision; (7) the recipient's submission of a continuation application; and (8) written approval of the continuation application by the Contracting Officer.

As a result of the Go/No Go Review, DOE may, at its discretion, authorize the following actions: (1) continue to fund the project, contingent upon the availability of funds appropriated by Congress for the purpose of this program and the availability of future-year budget authority; (2) recommend redirection of work under the project; (3) place a hold on federal funding for the project, pending further supporting data or funding; or (4) discontinue funding the project because of insufficient progress, change in strategic direction, or lack of funding.

The Go/No-Go decision is distinct from a non-compliance determination. In the event a recipient fails to comply with the requirements of an award, DOE may take appropriate action, including but not limited to, redirecting, suspending or terminating the award.

xii. Interim Conflict of Interest Policy for Financial Assistance

The DOE interim Conflict of Interest Policy for Financial Assistance (COI Policy)²³ is applicable to all non-Federal entities applying for, or that receive, DOE funding by means of a financial assistance award (e.g., a grant, cooperative agreement, or technology investment agreement) and, through the implementation of this policy by the entity, to each Investigator who is

²³ DOE's interim COI Policy can be found at <https://www.energy.gov/management/department-energy-interim-conflict-interest-policy-requirements-financial-assistance>.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

planning to participate in, or is participating in, the project funded wholly or in part under the DOE financial assistance award. The term “Investigator” means the PI and any other person, regardless of title or position, who is responsible for the purpose, design, conduct, or reporting of a project funded by DOE or proposed for funding by DOE. Recipients must flow down the requirements of the interim COI Policy to any subrecipient non-Federal entities. Further, for DOE funded projects, the recipient must include all financial conflicts of interest (FCOI) (i.e., managed and unmanaged/ unmanageable) in their initial and ongoing FCOI reports.

It is understood that non-Federal entities and individuals receiving DOE financial assistance awards will need sufficient time to come into full compliance with DOE’s interim COI Policy. To provide some flexibility, DOE allows for a staggered implementation. **Specifically, prior to award, applicants selected for award negotiations must: ensure all Investigators complete their significant financial disclosures; review the disclosures; determine whether a FCOI exists; develop and implement a management plan for FCOIs; and provide DOE with an initial FCOI report that includes all FCOIs (i.e., managed and unmanaged/ unmanageable).** Recipients will have 180 days from the date of the award to come into full compliance with the other requirements set forth in DOE’s interim COI Policy. **Prior to award, the applicant must certify that it is, or will be within 180 days of the award, compliant with all requirements in the interim COI Policy.**

xiii. Participants and Collaborating Organizations

If selected for award negotiations, the selected applicant must submit a list of personnel who are proposed to work on the project, both at the recipient and subrecipient level and a list of proposed collaborating organizations within 30 days after the applicant is notified of the selection. Recipients will have an ongoing responsibility to notify DOE of changes to the personnel and collaborating organizations, and submit updated information during the life of the award.

xiv. Current and Pending Support

If selected for award negotiations, within 30 days of the selection notice, the selectee must submit 1) current and pending support disclosures and resumes for any new PIs or senior/key personnel and 2) updated disclosures if there have been any changes to the current and pending support submitted with the application. Throughout the life of the award, the Recipient has an ongoing responsibility to submit 1) current and pending

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

support disclosure statements and resumes for any new PI and senior/key personnel and 2) updated disclosures if there are changes to the current and pending support previously submitted to DOE. Also See Section IV, "Application and Submission Information; Current and Pending Support".

xv. U.S. Competitiveness

A primary objective of DOE's multibillion-dollar research, development and demonstration investments is to cultivate new research and development ecosystems, manufacturing capabilities, and supply chains for and by U.S. industry and labor. Therefore, in exchange for receiving taxpayer dollars to support an applicant's project, the applicant must agree to the following U.S. Competitiveness Provision as part of an award under this FOA.

U.S. Competitiveness

The Recipient agrees that any products embodying any subject invention or produced through the use of any subject invention will be manufactured substantially in the United States unless the Recipient can show to the satisfaction of DOE that it is not commercially feasible. In the event DOE agrees to foreign manufacture, there will be a requirement that the Government's support of the technology be recognized in some appropriate manner, e.g., alternative binding commitments to provide an overall net benefit to the U.S. economy. The Recipient agrees that it will not license, assign or otherwise transfer any subject invention to any entity, at any tier, unless that entity agrees to these same requirements. Should the Recipient or other such entity receiving rights in the invention(s): (1) undergo a change in ownership amounting to a controlling interest, or (2) sell, assign, or otherwise transfer title or exclusive rights in the invention(s), then the assignment, license, or other transfer of rights in the subject invention(s) is/are suspended until approved in writing by DOE. The Recipient and any successor assignee will convey to DOE, upon written request from DOE, title to any subject invention, upon a breach of this paragraph. The Recipient will include this paragraph in all subawards/contracts, regardless of tier, for experimental, developmental or research work.

Please note that a subject invention is any invention conceived or first actually reduced to practice in performance of work under an award. An invention is any invention or discovery which is or may be patentable. The recipient shall ensure that these requirements also apply to subrecipients.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

As noted in the U.S. Competitiveness Provision, if any entity cannot meet the requirements of the U.S. Competitiveness Provision, the entity may request a modification or waiver of the U.S. Competitiveness Provision. For example, the entity may propose modifying the language of the U.S. Competitiveness Provision in order to change the scope of the requirements or to provide more specifics on the application of the requirements for a particular technology. As another example, the entity may request that the U.S. Competitiveness Provision be waived in lieu of a net benefits statement or U.S. manufacturing plan. The statement or plan would contain specific and enforceable commitments that would be beneficial to the U.S. economy and competitiveness. Examples of such commitments could include manufacturing specific products in the U.S., making a specific investment in a new or existing U.S. manufacturing facility, keeping certain activities based in the U.S. or supporting a certain number of jobs in the U.S. related to the technology. DOE may, in its sole discretion, determine that the proposed modification or waiver promotes commercialization and provides sufficient U.S. economic benefits, and grant the request. If granted, DOE will modify the award terms and conditions for the requesting entity accordingly. If not granted, the requesting entity must continue to perform according to the existing terms and conditions. More information and guidance on the waiver and modification request process can be found in the DOE Financial Assistance Letter on this topic.

The U.S. Competitiveness Provision is implemented by DOE pursuant to a Determination of Exceptional Circumstances (DEC) under the Bayh-Dole Act and DOE Patent Waivers. See Section VIII, "Other Information; Intellectual Property Developed Under This Program" of this FOA for more information on the DEC and DOE Patent Waiver.

xvi. Fraud, Waste and Abuse (April 2023)

The mission of the DOE Office of Inspector General (OIG) is to strengthen the integrity, economy and efficiency of the Department's programs and operations including deterring and detecting fraud, waste, abuse and mismanagement. The OIG accomplishes this mission primarily through investigations, audits, and inspections of DOE activities to include grants, cooperative agreements, loans, and contracts.

The OIG maintains a Hotline for reporting allegations of fraud, waste, abuse, or mismanagement. To report such allegations, please visit <https://www.energy.gov/ig/ig-hotline>.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

Additionally, recipients of DOE awards must be cognizant of the requirements of 2 CFR § 200.113 Mandatory disclosures:

The non-Federal entity or applicant for a Federal award must disclose, in a timely manner, in writing to the Federal awarding agency or pass-through entity all violations of Federal criminal law involving fraud, bribery, or gratuity violations potentially affecting the Federal award. Non-Federal entities that have received a Federal award including the term and condition outlined in appendix XII of 2 CFR Part 200 are required to report certain civil, criminal, or administrative proceedings to SAM. Failure to make required disclosures can result in any of the remedies described in § 200.339. (See also 2 CFR part 180, 31 U.S.C. 3321, and 41 U.S.C. 2313.) [85 FR 49539, Aug. 13, 2020]

Applicants and subrecipients (if applicable) are encouraged to allocate sufficient costs in the project budget to cover the costs associated for personnel and data infrastructure needs to support performance management and program evaluation needs including but not limited to independent program and project audits to mitigate risks for fraud, waste, and abuse.

xvii. Human Subjects Research (April 2023)

Research involving human subjects, biospecimens, or identifiable private information conducted with DOE funding is subject to the requirements of DOE Order 443.1C, Protection of Human Research Subjects, 45 CFR Part 46, Protection of Human Subjects (subpart A which is referred to as the “Common Rule”), and 10 CFR Part 745, Protection of Human Subjects. Additional information on the DOE Human Subjects Research Program can be found at: <https://science.osti.gov/ber/human-subjects>.

xviii. Real Property and Equipment

Real property and equipment purchased with project funds (federal share and recipient cost share) are subject to the requirements at 2 CFR 200.310, 200.311, 200.313, and 200.316 (non-Federal entities, except for-profit entities) and 2 CFR 910.360 (for-profit entities). For projects selected for award under this FOA, the recipient may (1) take disposition action on the real property and equipment; or (2) continue to use the real property and equipment after the conclusion of the award period of performance, with Contracting Officer approval.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

The recipient's written Request for Continued Use must identify the property and include: a summary of how the property will be used (must align with the authorized project purposes); a proposed use period, (e.g., perpetuity, until fully depreciated, or a calendar date where the recipient expects to submit disposition instructions); acknowledgement that the recipient shall not sell or encumber the property or permit any encumbrance without prior written DOE approval; current fair market value of the property; and an Estimated Useful Life or depreciation schedule for equipment.

When the property is no longer needed for authorized project purposes, the recipient must request disposition instructions from DOE. For-profit entity disposition requirements are set forth at 2 CFR 910.360. Property disposition requirements for other non-federal entities are set forth in 2 CFR 310-200.316.

C. Reporting

i. Reporting Requirements

Reporting requirements are identified on the Federal Assistance Reporting Checklist and Instructions, DOE F 4600.2, attached to the award agreement. A sample checklist is available at:
<https://www.netl.doe.gov/sites/default/files/netl-file/4600.2-FE.pdf>.

ii. Subaward and Executive Reporting

Prime Recipients awarded a new Federal financial assistance award greater than or equal to \$30,000 as of October 1, 2010 are subject to Federal Funding and Transparency Act of 2006 (FFATA) sub-award reporting requirements as outlined in 2 CFR Chapter 1, Part 170 REPORTING SUB- AWARD AND EXECUTIVE COMPENSATION INFORMATION.

The FFATA Subaward Reporting System (FSRS) is the reporting tool Federal prime awardees (i.e. prime contractors and prime grants recipients) use to capture and report subaward and executive compensation data regarding their first-tier subawards to meet the FFATA reporting requirements. Prime awardees must register with the new FSRS database and report the required data on their first tier subawardees/subrecipient at <https://www.fsrs.gov>.

Prime awardees must report the executive compensation for their own executives as part of their registration profile in the System for Award

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

Management (SAM). The sub-award information entered in FSRS will then be displayed on <https://www.usaspending.gov/> associated with the prime award furthering Federal spending transparency.

Applicants must ensure they have the necessary processes and systems in place to comply with the reporting requirements should they receive funding.

iii. Additional Reporting Requirements

Every six (6) months from the date of the start of the period of performance all regional assessment data in *CORE-CM Resource Assessment form* (Attachment 1) will be uploaded into a private CORE-CM workspace in EDX. At each six (6) month interval all new data will be uploaded. All sample and characterization data will be uploaded prior to the end of the project period of performance.

D. Applicant Representations and Certifications

i. Lobbying Restrictions

By accepting funds under this award, the Prime Recipient agrees that none of the funds obligated on the award shall be expended, directly or indirectly, to influence Congressional action on any legislation or appropriation matters pending before Congress, other than to communicate to Members of Congress as described in 18 U.S.C. §1913. This restriction is in addition to those prescribed elsewhere in statute and regulation.

ii. Nondisclosure and Confidentiality Agreements Representations

In submitting an application in response to this FOA the applicant represents that:

It **does not and will not** require its employees or contractors to sign internal nondisclosure or confidentiality agreements or statements prohibiting or otherwise restricting its employees or contractors from lawfully reporting waste, fraud, or abuse to a designated investigative or law enforcement representative of a Federal department or agency authorized to receive such information.

Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.

It **does not and will not** use any Federal funds to implement or enforce any nondisclosure and/or confidentiality policy, form, or agreement it uses unless it contains the following provisions:

- 1) “These provisions are consistent with and do not supersede, conflict with, or otherwise alter the employee obligations, rights, or liabilities created by existing statute or Executive order relating to (1) classified information, (2) communications to Congress, (3) the reporting to an Inspector General of a violation of any law, rule, or regulation, or mismanagement, a gross waste of funds, an abuse of authority, or a substantial and specific danger to public health or safety, or (4) any other whistleblower protection. The definitions, requirements, obligations, rights, sanctions, and liabilities created by controlling Executive orders and statutory provisions are incorporated into this agreement and are controlling.”

The limitation above shall not contravene requirements applicable to Standard Form 312, Form 4414, or any other form issued by a Federal department or agency governing the nondisclosure of classified information.

- 2) Notwithstanding the provision listed in paragraph (a), a nondisclosure or confidentiality policy form or agreement that is to be executed by a person connected with the conduct of an intelligence or intelligence-related activity, other than an employee or officer of the United States Government, may contain provisions appropriate to the particular activity for which such document is to be used. Such form or agreement shall, at a minimum, require that the person will not disclose any classified information received in the course of such activity unless specifically authorized to do so by the United States Government. Such nondisclosure or confidentiality forms shall also make it clear that they do not bar disclosures to Congress, or to an authorized official of an executive agency or the Department of Justice, that are essential to reporting a substantial violation of law.

iii. Corporate Felony Convictions and Tax Liabilities Representations (March 2014)

In submitting an application in response to this FOA the Applicant represents that:

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

(1) It is **not** a corporation that has been convicted of a felony criminal violation under any Federal law within the preceding 24 months; and

(2) It is **not** a corporation that has any unpaid Federal tax liability that has been assessed, for which all judicial and administrative remedies have been exhausted or have lapsed, and that is not being paid in a timely manner pursuant to an agreement with the authority responsible for collecting the tax liability.

For purposes of these representations the following definition applies:

A Corporation includes any entity that has filed articles of incorporation in any of the 50 states, the District of Columbia, or the various territories of the United States [but not foreign corporations]. It includes both for-profit and non-profit organizations.

VII. Questions/Agency Contacts

A. Questions

Upon the issuance of a FOA, NETL personnel are prohibited from communicating (in writing or otherwise) with applicants regarding the FOA except through the established question and answer process described below. Questions regarding this FOA must be submitted to DE-FOA-0003077@netl.doe.gov no later than three (3) business days prior to the application due date and time. Please note, feedback on individual concepts will not be provided through Q&A.

All questions and answers related to this FOA will be posted on NETL eXCHANGE at <https://NETL-Exchange.energy.gov>. **You must first select the FOA Number to view the questions and answers specific to this FOA.** NETL will attempt to respond to a question within three (3) business days unless a similar question and answer has already been posted on the website.

Questions related to the registration process and use of the NETL eXCHANGE website should be submitted to: NETL-ExchangeSupport@hq.doe.gov.

B. Agency Contact

Name:	Ashley Millender
E-mail:	DE-FOA-0003077@netl.doe.gov

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

VIII. Other Information

A. Modifications

Amendments to this FOA will be posted on NETL eXCHANGE and the Grants.gov systems. However, you will only receive an email when an amendment or a FOA is posted on these sites if you register for email notifications for this FOA in Grants.gov. DOE recommends that you register as soon after the release of the FOA as possible to ensure you receive timely notice of any amendments or other FOAs.

B. Government Right to Reject or Negotiate

DOE reserves the right, without qualification, to reject any or all applications received in response to this FOA and to select any application, in whole or in part, as a basis for negotiation and/or award.

C. Commitment of Public Funds

The Contracting Officer is the only individual who can make awards or commit the Government to the expenditure of public funds. A commitment by anyone other than the Contracting Officer, either express or implied, is invalid.

Funding for all awards and future budget periods are contingent upon the availability of funds appropriated by Congress for the purpose of this program and the availability of future-year budget authority.

D. Treatment of Application Information (April 2023)

Applicants should not include trade secret or business sensitive, proprietary, or otherwise confidential information in their application unless such information is necessary to convey an understanding of the proposed project or to comply with a requirement in the FOA. Applicants are advised to not include any critically sensitive proprietary detail.

If an application includes trade secret or business sensitive, proprietary, or otherwise confidential information, it is furnished to the Federal Government in confidence with the understanding that the information shall be used or disclosed only for evaluation of the application. Such information will be withheld from public disclosure to the extent permitted by law, including the Freedom of Information Act. Without assuming any liability for inadvertent disclosure, DOE will

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

seek to limit disclosure of such information to its employees and to outside reviewers when necessary for merit review of the application or as otherwise authorized by law. This restriction does not limit the Government's right to use the information if it is obtained from another source.

If an applicant chooses to submit business sensitive, trade secrets, proprietary, or otherwise confidential information, the applicant must provide **two copies** of t any document of the submission (e.g., Concept Paper, Full Application) that contains such information. The first copy should be marked "non-confidential" with the information believed to be confidential deleted. The second copy should be marked "confidential" and must clearly and conspicuously identify the business sensitive, trade secrets, proprietary, or otherwise confidential information and must be marked as described below. Failure to comply with these marking requirements may result in the disclosure of the unmarked information under the Freedom of Information Act or otherwise. The Government is not liable for the disclosure or use of unmarked information and may use or disclose such information for any purpose as authorized by law.

The cover sheet of the full application, and other applicant submission must be marked as follows and identify the specific pages business sensitive, trade secrets, proprietary, or otherwise confidential information:

Notice of Restriction on Disclosure and Use of Data:

Pages [list applicable pages] of this document may contain business sensitive, trade secrets, proprietary, or otherwise confidential information that is exempt from public disclosure. Such information shall be used or disclosed only for evaluation purposes or in accordance with a financial assistance between the submitter and the Government. The Government may use or disclose any information that is not appropriately marked or otherwise restricted, regardless of source. [End of Notice]

In addition, (1) the header and footer of every page that contains business sensitive, trade secrets, proprietary, or otherwise confidential information must be marked as follows: "Contains Business Sensitive, Trade Secrets, Proprietary, Otherwise Confidential Information Exempt from Public Disclosure," and (2) every line or paragraph containing such information must be clearly marked with double brackets or highlighting. DOE will make its own determination about the confidential status of the information and treat it according to its determination.

E. Evaluation and Administration by Non-Federal Personnel

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

In conducting the merit review, the Government may seek the advice of qualified non-Federal personnel as reviewers. The Government may also use non-Federal personnel to conduct routine, nondiscretionary administrative activities. The applicant, by submitting its application, consents to the use of non-Federal reviewers/administrators. Non-Federal reviewers must sign conflict of interest and non-disclosure agreements prior to reviewing an application. Non-Federal personnel conducting administrative activities must sign a non-disclosure agreement.

F. Intellectual Property Developed Under This Program (September 2021)

Patent Rights: The government will have certain statutory rights in an invention that is conceived or first actually reduced to practice under a DOE award. 42 U.S.C. 5908 provides that title to such inventions vests in the United States, except where 35 U.S.C. 202 provides otherwise for nonprofit organizations or small business firms. However, the Secretary of Energy may waive all or any part of the rights of the United States subject to certain conditions.

Class Patent Waiver: Pursuant to 10 CFR Part 784, the DOE has issued a class patent waiver that applies to this FOA. Under this class waiver, any domestic entity other than a domestic small business firm or domestic nonprofit organization may elect title to their subject inventions similar to the right provided to domestic small business firms and domestic nonprofit organization by law (see below). In order to avail itself of the class waiver, such an entity must agree, among other things, that any products embodying or produced through the use of a subject invention (first created or reduced to practice under this program) will be substantially manufactured in the United States, unless DOE agrees otherwise.

Right to Request Patent Waiver: A selected entity may request a waiver of all or any part of the rights of the United States in inventions conceived or first actually reduced to practice in performance of an agreement as a result of this announcement, in advance of or within 30 days after the effective date of the award. Even if such advance waiver is not requested or the request is denied, the recipient will have a continuing right under the award to request a waiver of the rights of the United States in identified inventions, i.e., individual inventions conceived or first actually reduced to practice in performance of the award. Any patent waiver that may be granted is subject to certain terms and conditions in 10 CFR 784 see <https://www.energy.gov/gc/services/technology-transfer-and-procurement/office-assistant-general-counsel-technology-transf-1> for further information.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

Domestic small businesses and domestic nonprofit organizations: Domestic small businesses and domestic nonprofit organizations will receive the patent rights clause at 37 CFR 401.14, i.e., the implementation of the Bayh-Dole Act. This clause permits domestic small business and domestic nonprofit organizations to retain title to subject inventions. Therefore, small businesses and nonprofit organizations do not need to request a patent waiver.

- DEC: On June 07, 2021, DOE approved a DETERMINATION OF EXCEPTIONAL CIRCUMSTANCES (DEC) UNDER THE BAYH-DOLE ACT TO FURTHER PROMOTE DOMESTIC MANUFACTURE OF DOE SCIENCE AND ENERGY TECHNOLOGIES. In accordance with this DEC, all awards, including sub-awards, under this FOA shall include the U.S. Competitiveness Provision in accordance with Section IV, “Application and Submission Information; U.S. Competitiveness” of this FOA. A copy of the DEC can be found at <https://www.energy.gov/gc/determination-exceptional-circumstances-decs>.
- Pursuant to 37 CFR § 401.4, any nonprofit organization or small business firm as defined by 35 U.S.C. 201 affected by any DEC has the right to appeal it by providing written notice to DOE within 30 working days from the time it receives a copy of the determination.
- DOE may issue and publish on the website above further DEC's prior to the issuance of awards under this FOA. DOE may require additional submissions or requirements as authorized by any applicable DEC.

Government Rights in Subject Inventions

Where prime recipients and subrecipients retain title to subject inventions, the United States government retains certain rights.

Government Use License

The United States government retains a nonexclusive, nontransferable, irrevocable, paid-up license to practice or have practiced for or on behalf of the United States any subject invention throughout the world. This license extends to contractors doing work on behalf of the government.

March-In Rights

The United States government retains march-in rights with respect to all subject inventions. Through “march-in rights,” the government may require a prime recipient or subrecipient who has elected to retain title to a subject invention (or their assignees or exclusive licensees), to grant a license for use of the invention to a third party. In addition, the government may grant licenses for use of the subject invention when a prime recipient, subrecipient, or their assignees and exclusive licensees refuse to do so.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

DOE may exercise its march-in rights only if it determines that such action is necessary under any of the four following conditions:

The owner or licensee has not taken or is not expected to take effective steps to achieve practical application of the invention within a reasonable time;

The owner or licensee has not taken action to alleviate health or safety needs in a reasonably satisfied manner;

The owner has not met public use requirements specified by federal statutes in a reasonably satisfied manner; or

The United States manufacturing requirement has not been met.

Any determination that march-in rights are warranted must follow a fact-finding process in which the recipient has certain rights to present evidence and witnesses, confront witnesses and appear with counsel and appeal any adverse decision. To date, DOE has never exercised its march-in rights to any subject inventions.

Subject Invention Utilization Reporting

To ensure that prime recipients and subrecipients holding title to subject inventions are taking the appropriate steps to commercialize subject inventions, DOE may require that each prime recipient holding title to a subject invention submit annual reports for 10 years from the date the subject invention was disclosed to DOE on the utilization of the subject invention and efforts made by prime recipient or its licensees or assignees to stimulate such utilization. The reports must include information regarding the status of development, date of first commercial sale or use, gross royalties received by the prime recipient, and such other data and information as DOE may specify.

Rights in Technical Data: Normally, the government has unlimited rights in technical data created under a DOE agreement. Delivery or third-party licensing of proprietary software or data developed solely at private expense will not normally be required except as specifically negotiated in a particular agreement to satisfy DOE's own needs or to ensure the commercialization of technology developed under a DOE agreement.

Copyright

The prime recipient and subrecipients may assert copyright in copyrightable works, such as software, first produced under the award without DOE approval. When copyright is asserted, the government retains a paid-up nonexclusive, irrevocable worldwide license to reproduce, prepare derivative works, distribute copies to the public, and to perform publicly and display publicly the copyrighted work. This license extends to contractors and others doing work on behalf of the government.

FOA name and number in subject line.

G. Energy Data eXchange (EDX) Requirements (December 2022)

The DOE is required to improve access to federally funded research results, proper archiving of digital data, and expanded discovery and reuse of research datasets per DOE and Executive Orders. The Energy Data eXchange (EDX) is a data laboratory developed and maintained by NETL to find, connect, curate, use, and re-use data to advance fossil energy and environmental research and development (R&D).

Data products generated under the resulting award will be required to be submitted in the EDX at <https://edx.netl.doe.gov/>. Data products include but are not limited to software code, tools, applications, webpages, portfolios, images, videos, and datasets.

EDX uses federation and web services to elevate visibility for publicly approved assets in the system, including connections with DOE's Office of Scientific and Technical Information (OSTI) systems, Data.gov, and Re3Data. This ensures compliance with federal requirements, while raising visibility for researcher's published data products to promote discoverability and reuse.

EDX supports a wide variety of file types and formats including: 1) data, 2) metadata, 3) software/tools, and 4) articles (provided that there is an accompanying Government use license). A partial list of file formats accepted by EDX is provided below, however, EDX is designed for flexibility and accepts all types of file formats.

- Common Data Product Submission Formats: ASC, AmiraMesh, AVI, CAD, CSV, DAT, DBF, DOC, DSV, DWG, GIF, HDF, HTML, JPEG2000, JPG, MOV, MPEG4, MSH/CAS/DAT, NetCDF, PDF, PNG, PostScript, PPT, RTF, Surface, TAB, TIFF, TIFF Stacks, TXT, XLS, SML, Xradio, ZIP, and others.
- Geographic Formats: APR, DBF, DEM, DLG, DRG, DXF, E00, ECW, GDB, GeoPDF, GeoTIFF, GML, GPX, GRID, IMG, KML, KMZ, MOB, MrSID, SHP, and others.

Information provided to EDX will be made publicly available, unless authorized under the resulting award. Additional information on EDX is available at <https://edx.netl.doe.gov/about>.

When data products are submitted to EDX, the data product will need to be registered with a digital object identifier (DOI) through OSTI to ensure more visibility in other search repositories (i.e., osti.gov, data.gov, Google Scholar, etc.). The OSTI DOI can be established through an application programming interface (API) by completing just a few additional fields.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

The Recipient or subrecipient should coordinate with the Project Manager on an annual basis to assess if there is data that should be submitted to EDX and identify the proper file formats prior to submission. All final data products shall be submitted to EDX by the Recipient prior to the completion of the project.

H. Notice Regarding Eligible/Ineligible Activities

Eligible activities under this program include those which describe and promote the understanding of scientific and technical aspects of specific energy technologies, but not those which encourage or support political activities such as the collection and dissemination of information related to potential, planned or pending legislation.

I. Notice of Right to Conduct a Review of Financial Capability

DOE reserves the right to conduct an independent third-party review of financial capability for applicants that are selected for negotiation of award (including personal credit information of principal(s) of a small business if there is insufficient information to determine financial capability of the organization).

J. Notice of Potential Disclosure Under Freedom of Information Act (FOIA)

Applicants should be advised that identifying information regarding all applicants, including applicant names and/or points of contact, may be subject to public disclosure under the Freedom of Information Act, whether or not such applicants are selected for negotiation of award.

K. Requirement for Full and Complete Disclosure

Applicants are required to make a full and complete disclosure of all information requested. Any failure to make a full and complete disclosure of the requested information may result in:

- The termination of award negotiations;
- The modification, suspension, and/or termination of a funding agreement;
- The initiation of debarment proceedings, debarment, and/or a declaration of ineligibility for receipt of Federal contracts, subcontracts, and financial assistance and benefits; and
- Civil and/or criminal penalties.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

L. Retention of Submissions

DOE expects to retain copies of all submissions. No submissions will be returned. By applying to DOE for funding, applicants consent to DOE's retention of their submissions.

M. Protected Personally Identifiable Information

In responding to this FOA, applicants must ensure that Protected Personally Identifiable Information (PII) is not included in the application documents. These documents will be used by the Merit Review Committee in the review process to evaluate each application. PII is defined by the Office of Management and Budget (OMB) as:

Any information about an individual maintained by an agency, including but not limited to, education, financial transactions, medical history, and criminal or employment history and information that can be used to distinguish or trace an individual's identity, such as their name, social security number, date and place of birth, mother's maiden name, biometric records, etc., including any other personal information that is linked or linkable to an individual.

This definition of PII can be further defined as: (1) Public PII and (2) Protected PII.

1. Public PII: PII found in public sources such as telephone books, public websites, business cards, university listing, etc. Public PII includes first and last name, address, work telephone number, email address, home telephone number, and general education credentials.

2. Protected PII: PII that requires enhanced protection. This information includes data that if compromised could cause harm to an individual such as identity theft.

Listed below are examples of Protected PII that applicants must not include in the application files listed above to be evaluated by the Merit Review Committee. This list is not all inclusive.

- Social Security Numbers in any form
- Place of Birth associated with an individual
- Date of Birth associated with an individual
- Mother's maiden name associated with an individual

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

- Biometric record associated with an individual
- Fingerprint
- Iris scan
- DNA
- Medical history information associated with an individual
- Medical conditions, including history of disease
- Metric information, e.g. weight, height, blood pressure
- Criminal history associated with an individual
- Employment history and other employment information associated with an individual
- Ratings
- Disciplinary actions
- Performance elements and standards (or work expectations) are PII when they are so intertwined with performance appraisals that their disclosure would reveal an individual's performance appraisal
- Financial information associated with an individual
- Credit card numbers
- Bank account numbers
- Security clearance history or related information (not including actual clearances held)

N. Annual Compliance Audits

If an institution of higher education, non-profit organization, or state/local government is a Prime Recipient or Subrecipient and has expended \$750,000 or more of Federal funds during the non-Federal entity's fiscal year, then a single or program-specific audit is required. For additional information, please refer to 2 C.F.R. § 200.501 and Subpart F.

If a for-profit entity is a Prime Recipient and has expended \$750,000 or more of DOE funds during the entity's fiscal year, an annual compliance audit performed by an independent auditor is required. For additional information, please refer to 2 C.F.R. § 910.501 and Subpart F.

Applicants and subrecipients (if applicable) should propose sufficient costs in the project budget to cover the costs associated with the audit. DOE will share in the cost of the audit at its applicable cost share ratio.

O. Accounting System

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

If your application is selected for negotiation toward award, you should have an accounting system that meets government standards for recording and collecting costs. Reference 2 CFR 200 Subpart D for the applicable standards. If you have not had prior government awards or a recent accounting system review, DOE may request that the Defense Contract Audit Agency (DCAA) or an independent auditor verify that the accounting system is acceptable. A resulting award may contain a Term and Condition that prohibits DOE reimbursement until the system is deemed acceptable.

P. Indirect Rates

Potential recipients and major subrecipients will need to demonstrate how indirect rates are developed using an acceptable government methodology or current rate agreement. The Prime Recipient and major subrecipients may be subject to a DCAA or independent auditor indirect rate review if there has not been a certified rate audit within the previous twelve months. Additionally, annual indirect cost reconciliations are required, as applicable.

Q. Prohibition on Certain Telecommunications and Video Surveillance Services or Equipment (April 2023)

As set forth in 2 CFR 200.216, recipients and subrecipients are prohibited from obligating or expending project funds (federal and recipient cost share) to procure or obtain; extend or renew a contract to procure or obtain; or enter into a contract (or extend or renew a contract) to procure or obtain equipment, services, or systems that uses covered telecommunications equipment or services as a substantial or essential component of any system, or as critical technology as part of any system. As described in Public Law 115-232, section 889, covered telecommunications equipment is telecommunications equipment produced by Huawei Technologies Company or ZTE Corporation (or any subsidiary or affiliate of such entities).

See Public Law 115-232, Section 889, 2 CFR 200.216, and 2 CFR 200.471 for additional information.

R. Prohibition Related to Foreign Government-Sponsored Talent Recruitment Programs (April 2023)

i. Prohibition

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

Persons participating in a Foreign Government-Sponsored Talent Recruitment Program of a Foreign Country of Risk are prohibited from participating in projects selected for Federal funding under this FOA. Should an award result from this FOA, the recipient must exercise ongoing due diligence to reasonably ensure that no individuals participating on the DOE-funded project are participating in a Foreign Government-Sponsored Talent Recruitment Program of a Foreign Country of Risk. Consequences for violations of this prohibition will be determined according to applicable law, regulations, and policy. Further, the recipient must notify DOE within five (5) business days upon learning that an individual on the project team is or is believed to be participating in a foreign government talent recruitment program of a foreign country of risk. DOE may modify and add requirements related to this prohibition to the extent required by law.

ii. Definitions

- 1) **Foreign Government-Sponsored Talent Recruitment Program.** An effort directly or indirectly organized, managed, or funded by a foreign government, or a foreign government instrumentality or entity, to recruit science and technology professionals or students (regardless of citizenship or national origin, or whether having a full-time or part-time position). Some foreign government-sponsored talent recruitment programs operate with the intent to import or otherwise acquire from abroad, sometimes through illicit means, proprietary technology or software, unpublished data and methods, and intellectual property to further the military modernization goals and/or economic goals of a foreign government. Many, but not all, programs aim to incentivize the targeted individual to relocate physically to the foreign state for the above purpose. Some programs allow for or encourage continued employment at U.S. research facilities or receipt of Federal research funds while concurrently working at and/or receiving compensation from a foreign institution, and some direct participants not to disclose their participation to U.S. entities. Compensation could take many forms including cash, research funding, complimentary foreign travel, honorific titles, career advancement opportunities, promised future compensation, or other types of remuneration or consideration, including in-kind compensation.
- 2) **Foreign Country of Risk.** DOE has designated the following countries as foreign countries of risk: Iran, North Korea, Russia, and China. This list is subject to change.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

S. Implementation of Executive Order 13798, Promoting Free Speech and Religious Liberty (November 2020)

States, local governments, or other public entities may not condition sub-awards in a manner that would discriminate, or disadvantage subrecipients based on their religious character.

T. Affirmative Action and Pay Transparency Requirements

All applicants must comply with all applicable federal labor and employment laws, including but not limited to Title VII of the Civil Rights Act of 1964, the Fair Labor Standards Act, the Occupational Safety and Health Act, and the National Labor Relations Act, which protects employees' right to bargain collectively and engage in concerted activities for the purpose of workers' mutual aid or protection.

All federally assisted construction contracts exceeding \$10,000 annually will be subject to the requirements of Executive Order 11246:

- (1) Recipients, subrecipients, contractors, and subcontractors are prohibited from discriminating in employment decisions on the basis of race, color, religion, sex, sexual orientation, gender identity, or national origin.
- (2) Recipients and contractors are required to take affirmative action to ensure that equal opportunity is provided in all aspects of their employment. This includes flowing down the appropriate language to all subrecipients, contractors, and subcontractors.
- (3) Recipients, subrecipients, contractors, and subcontractors are prohibited from taking adverse employment actions against applicants and employees for asking about, discussing, or sharing information about their pay or, under certain circumstances, the pay of their co-workers.

DOL's Office of Federal Contractor Compliance Programs (OFCCP) uses a neutral process to schedule compliance evaluations. Consult OFCCP's Technical Assistance Guide²⁴ to gain an understanding of the requirements and possible actions the recipients, subrecipients, contractors, and subcontractors must take.

²⁴ See OFCCP's Technical Assistance Guide at:

<https://www.dol.gov/sites/dolgov/files/ofccp/Construction/files/ConstructionTAG.pdf?msclkid=9e397d68c4b111ec9d8e6fecb6c710ec> Also see the National Policy Assurances <http://www.nsf.gov/awards/managing/rtc.jsp>

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

Additional guidance may also be found in the National Policy Assurances, produced by DOE.

U. Foreign Collaboration Considerations

- a. Consideration of new collaborations with foreign entities, organizations, and governments. The recipient will be required to provide DOE with advanced written notification of any potential collaboration with foreign entities, organizations, or governments in connection with its DOE-funded award scope. The recipient will then be required to await further guidance from DOE prior to contacting the proposed foreign entity, organization, or government regarding the potential collaboration or negotiating the terms of any potential agreement.
- b. Existing collaborations with foreign entities, organizations, and governments. The recipient will be required to provide DOE with a written list of all existing foreign collaborations in which has entered in connection with its DOE-funded award scope.
- c. Description of collaborations that should be reported. In general, a collaboration will involve some provision of a thing of value to, or from, the recipient. A thing of value includes but may not be limited to all resources made available to, or from, the recipient in support of and/or related to the DOE award, regardless of whether or not they have monetary value. Things of value also may include in-kind contributions (such as office/laboratory space, data, equipment, supplies, employees, students). In-kind contributions not intended for direct use on the DOE award but resulting in provision of a thing of value from or to the DOE award must also be reported. Collaborations do not include routine workshops, conferences, use of the recipient's services and facilities by foreign investigators resulting from its standard published process for evaluating requests for access, or the routine use of foreign facilities by awardee staff in accordance with the recipient's standard policies and procedures.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

IX. Appendices

Appendix A – Cost Share Information

Cost Sharing or Cost Matching

The terms “cost sharing” and “cost matching” are often used synonymously. Even the DOE Financial Assistance Regulations, 2 CFR 200.306, use both of the terms in the titles specific to regulations applicable to cost sharing. DOE almost always uses the term “cost sharing,” as it conveys the concept that non-federal share is calculated as a percentage of the Total Project Cost. An exception is the State Energy Program Regulation, 10 CFR 420.12, State Matching Contribution. Here “cost matching” for the non-federal share is calculated as a percentage of the Federal funds only, rather than the Total Project Cost.

How Cost Sharing Is Calculated

As stated above, cost sharing is calculated as a percentage of the Total Project Cost. FFRDC/NL costs must be included in Total Project Costs.

Example – 20% cost share

The following is an example of how to calculate cost sharing amounts for a project with \$1,000,000 in federal funds with a minimum 20% non-federal cost sharing requirement:

- Formula: Federal share (\$) divided by Federal share (%) = Total Project Cost
Example: \$1,000,000 divided by 80% = \$1,250,000
- Formula: Total Project Cost (\$) minus Federal share (\$) = Non-federal share (\$)
Example: \$1,250,000 minus \$1,000,000 = \$250,000
- Formula: Non-federal share (\$) divided by Total Project Cost (\$) = Non-federal share (%)
Example: \$250,000 divided by \$1,250,000 = 20%

What Qualifies For Cost Sharing

While it is not possible to explain what specifically qualifies for cost sharing in one or even a couple of sentences, in general, if a cost is allowable under the cost principles applicable to the organization incurring the cost and is eligible for reimbursement under an DOE grant or cooperative agreement, then it is allowable as cost share. Conversely, if the cost is not allowable under the cost principles and not eligible for reimbursement, then it is not allowable as cost share. In addition, costs may not be counted as cost share if they are paid by the Federal

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

Government under another award unless authorized by Federal statute to be used for cost sharing.

The rules associated with what is allowable as cost share are specific to the type of organization that is receiving funds under the grant or cooperative agreement, though are generally the same for all types of entities. The specific rules applicable to:

- FAR Part 31 for For-Profit entities, (48 CFR Part 31); and
- 2 CFR Part 200 Subpart E - Cost Principles for all other non-federal entities.

In addition to the regulations referenced above, other factors may also come into play such as timing of donations and length of the project period of performance. For example, the value of ten years of donated maintenance on a project that has a project period of performance of five years would not be fully allowable as cost share. Only the value for the five years of donated maintenance that corresponds to the project period of performance is allowable and may be counted as cost share.

Additionally, DOE generally does not allow pre-award costs for either cost share or reimbursement when these costs precede the signing of the appropriation bill that funds the award. In the case of a competitive award, DOE generally does not allow pre-award costs prior to the signing of the Selection Statement by the DOE Selection Official.

General Cost Sharing Rules on a DOE Award

1. Cash Cost Share – encompasses all contributions to the project made by the recipient or subrecipient(s), for costs incurred and paid for during the project. This includes when an organization pays for personnel, supplies, equipment for their own company with organizational resources. If the item or service is reimbursed for, it is cash cost share. All cost share items must be necessary to the performance of the project.
2. In-Kind Cost Share – encompasses all contributions to the project made by the recipient or subrecipient(s) that do not involve a payment or reimbursement and represent donated items or services. In-Kind cost share items include volunteer personnel hours, donated existing equipment, donated existing supplies. The cash value and calculations thereof for all In-Kind cost share items must be justified and explained in the Cost Share section of the project Budget Justification. All cost share items must be necessary to the performance of the project. If questions exist, consult your DOE contact before filling out the In-Kind cost share section of the Budget Justification.
3. Funds from other federal sources MAY NOT be counted as cost share. This prohibition includes FFRDC subrecipients. Non-federal sources include any source not originally derived

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

from federal funds. Cost sharing commitment letters from subrecipients must be provided with the original application.

4. Fee or profit, including foregone fee or profit, are not allowable as project costs (including cost share) under any resulting award. The project may only incur those costs that are allowable and allocable to the project (including cost share) as determined in accordance with the applicable cost principles prescribed in FAR Part 31 for For-Profit entities and 2 CFR Part 200 Subpart E - Cost Principles for all other non-federal entities.

DOE Financial Assistance Rules 2 CFR Part 200 as supplemented by 2 CFR Part 910

As stated above, the rules associated with what is allowable cost share are generally the same for all types of organizations. Following are the rules found to be common, but again, the specifics are contained in the regulations and cost principles specific to the type of entity:

(A) Acceptable contributions. All contributions, including cash contributions and third party in-kind contributions, must be accepted as part of the Prime Recipient's cost sharing if such contributions meet all of the following criteria:

- (1) They are verifiable from the recipient's records.
- (2) They are not included as contributions for any other federally-assisted project or program.
- (3) They are necessary and reasonable for the proper and efficient accomplishment of project or program objectives.
- (4) They are allowable under the cost principles applicable to the type of entity incurring the cost as follows:
 - a. For-profit organizations. Allowability of costs incurred by for-profit organizations and those nonprofit organizations listed in Attachment C to OMB Circular A-122 is determined in accordance with the for-profit cost principles in 48 CFR Part 31 in the Federal Acquisition Regulation, except that patent prosecution costs are not allowable unless specifically authorized in the award document. (v) Commercial Organizations. FAR Subpart 31.2—Contracts with Commercial Organizations
 - b. Other types of organizations. For all other non-federal entities, allowability of costs is determined in accordance with 2 CFR Part 200 Subpart E.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov.
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

(5) They are not paid by the Federal Government under another award unless authorized by Federal statute to be used for cost sharing or matching.

(6) They are provided for in the approved budget.

(B) Valuing and documenting contributions

(1) Valuing recipient's property or services of recipient's employees. Values are established in accordance with the applicable cost principles, which mean that amounts chargeable to the project are determined on the basis of costs incurred. For real property or equipment used on the project, the cost principles authorize depreciation or use charges. The full value of the item may be applied when the item will be consumed in the performance of the award or fully depreciated by the end of the award. In cases where the full value of a donated capital asset is to be applied as cost sharing or matching, that full value must be the lesser or the following:

- a. The certified value of the remaining life of the property recorded in the recipient's accounting records at the time of donation; or
- b. The current fair market value. If there is sufficient justification, the Contracting Officer may approve the use of the current fair market value of the donated property, even if it exceeds the certified value at the time of donation to the project. The Contracting Officer may accept the use of any reasonable basis for determining the fair market value of the property.

(2) Valuing services of others' employees. If an employer other than the recipient furnishes the services of an employee, those services are valued at the employee's regular rate of pay, provided these services are for the same skill level for which the employee is normally paid.

(3) Valuing volunteer services. Volunteer services furnished by professional and technical personnel, consultants, and other skilled and unskilled labor may be counted as cost sharing or matching if the service is an integral and necessary part of an approved project or program. Rates for volunteer services must be consistent with those paid for similar work in the recipient's organization. In those markets in which the required skills are not found in the recipient organization, rates must be consistent with those paid for similar work in the labor market in which the recipient competes for the kind of services involved. In either case, paid fringe benefits that are reasonable, allowable, and allocable may be included in the valuation.

(4) Valuing property donated by third parties.

- a. Donated supplies may include such items as office supplies or laboratory supplies. Value assessed to donated supplies included in the cost sharing or matching share must be reasonable and must not exceed the fair market value of the property at the time of the donation.
 - b. Normally only depreciation or use charges for equipment and buildings may be applied. However, the fair rental charges for land and the full value of equipment or other capital assets may be allowed, when they will be consumed in the performance of the award or fully depreciated by the end of the award, provided that the Contracting Officer has approved the charges. When use charges are applied, values must be determined in accordance with the usual accounting policies of the recipient, with the following qualifications:
 - i. The value of donated space must not exceed the fair rental value of comparable space as established by an independent appraisal of comparable space and facilities in a privately-owned building in the same locality.
 - ii. The value of loaned equipment must not exceed its fair rental value.
- (5) Documentation. The following requirements pertain to the recipient's supporting records for in-kind contributions from third parties:
- a. Volunteer services must be documented and, to the extent feasible, supported by the same methods used by the recipient for its own employees.
 - b. The basis for determining the valuation for personal services and property must be documented.

Appendix B – Waiver Requests: Foreign Entity Participation and Performance of Work in the United States

i. Waiver for Foreign Entity Participation as the Prime Recipient

As set forth in Section III, “Eligibility Information”, all Prime Recipients receiving funding under this FOA must be incorporated (or otherwise formed) under the laws of a State or territory of the United States. To request a waiver of this requirement, an applicant must submit an explicit waiver request in the Full Application.

Overall, the applicant must demonstrate to the satisfaction of DOE that it would further the purposes of this FOA and is otherwise in the economic interests of the United States to have a foreign entity serve as the Prime Recipient. A request to waive the *Foreign Entity Participation as the Prime Recipient* requirement must include the following:

- Entity name;
- The rationale for proposing a foreign entity to serve as the Prime Recipient;
- Country of incorporation; and the extent, if any, the entity is state owned or controlled;
- A description of the project’s anticipated contributions to the US economy;
 - How the project will benefit U.S. research, development and manufacturing, including contributions to employment in the U.S. and growth in new markets and jobs in the U.S.;
 - How the project will promote domestic American manufacturing of products and/or services;
- A description of how the foreign entity’s participation as the Prime Recipient is essential to the project;
- A description of the likelihood of Intellectual Property (IP) being created from the work and the treatment of any such IP;
- Countries where the work will be performed (Note: if any work is proposed to be conducted outside the U.S., the applicant must also complete a separate request for waiver of the Performance of Work in the United States requirement).

DOE may require additional information before considering the waiver request.

The applicant does not have the right to appeal DOE’s decision concerning a waiver request.

Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.

ii. Waiver for Performance of Work in the United States (Foreign Work Waiver Request)

As set forth in Section IV, “Application and Submission Information”, all work under DOE funding agreements must be performed in the United States. This requirement does not apply to the purchase of supplies and equipment, so a waiver is not required for foreign purchases of these items. However, the Prime Recipient should make every effort to purchase supplies and equipment within the United States. There may be limited circumstances where it is in the interest of the project to perform a portion of the work outside the United States. To seek a waiver of the Performance of Work in the United States requirement, the applicant must submit an explicit waiver request in the Full Application. A separate waiver request must be submitted for each entity proposing performance of work outside of the United States.

Overall, a waiver request must demonstrate to the satisfaction of DOE that it would further the purposes of this FOA and is otherwise in the economic interests of the United States to perform work outside of the United States. A request to waive the *Performance of Work in the United States* requirement must include the following:

- The rationale for performing the work outside the U.S. (“foreign work”);
- A description of the work and the percentage of the direct labor (including subrecipients) proposed to be performed outside the U.S.;
- An explanation as to how the foreign work is essential to the project;
- A description of the anticipated benefits to be realized by the proposed foreign work and the anticipated contributions to the US economy;
 - The associated benefits to be realized and the contribution to the project from the foreign work;
 - How the foreign work will benefit U.S. research, development and manufacturing, including contributions to employment in the U.S. and growth in new markets and jobs in the U.S.;
 - How the foreign work will promote domestic American manufacturing of products and/or services;
- A description of the likelihood of Intellectual Property (IP) being created from the foreign work and the treatment of any such IP;
- The total estimated cost (DOE and Recipient cost share) of the proposed foreign work;
- The countries in which the foreign work is proposed to be performed; and
- The name of the entity that would perform the foreign work, by country (if more than one foreign country is proposed).
- Information about the entity(ies) involved in the work proposed to be conducted outside the United States. (i.e., entity seeks a waiver and the entity(ies) that will conduct the work).

Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.

DOE may require additional information before considering the waiver request.

The applicant does not have the right to appeal DOE's decision concerning a waiver request.

Appendix C – Required Use of American Iron, Steel, Manufactured Products, and Construction Materials - Buy America Requirements for Infrastructure Projects

A. Definitions

For purposes of the Buy America Requirements, based both on statute and OMB Guidance Document dated October 25, 2023, the following definitions apply:

Construction Materials- The Buy America Preference applies to the following construction materials incorporated into infrastructure projects. Each construction material is followed by a standard for the material to be considered “produced in the United States.” Except as specifically provided, only a single standard should be applied to a single construction material.

(1) Non-ferrous metals. All manufacturing processes, from initial smelting or melting through final shaping, coating, and assembly, occurred in the United States.

(2) Plastic and polymer-based products. All manufacturing processes, from initial combination of constituent plastic or polymer-based inputs, or, where applicable, constituent composite materials, until the item is in its final form, occurred in the United States.

(3) Glass. All manufacturing processes, from initial batching and melting of raw materials through annealing, cooling, and cutting, occurred in the United States.

(4) Fiber optic cable (including drop cable). All manufacturing processes, from the initial ribboning (if applicable), through buffering, fiber stranding and jacketing, occurred in the United States. All manufacturing processes also include the standards for glass and optical fiber, but not for non-ferrous metals, plastic and polymer-based products, or any others.

(5) Optical fiber. All manufacturing processes, from the initial preform fabrication stage through the completion of the draw, occurred in the United States.

(6) Lumber. All manufacturing processes, from initial debarking through treatment and planning, occurred in the United States.

(7) Drywall. All manufacturing processes, from initial blending of mined or synthetic gypsum plaster and additives through cutting and drying of sandwiched panels, occurred in the United States.

(8) Engineered wood. All manufacturing processes from the initial combination of constituent materials until the wood product is in its final form, occurred in the United States.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

Infrastructure includes, at a minimum, the structures, facilities, and equipment for, in the United States, roads, highways, and bridges; public transportation; dams, ports, harbors, and other maritime facilities; intercity passenger and freight railroads; freight and intermodal facilities; airports; water systems, including drinking water and wastewater systems; electrical transmission facilities and systems; utilities; broadband infrastructure; and buildings and real property. Infrastructure includes facilities that generate, transport, and distribute energy.

Moreover, according to the OMB guidance document:

OMB also provides a definition of “infrastructure project” at 2 CFR 184.3. Section 184.4(d) explains that Federal agencies should interpret the term “infrastructure” broadly and consider the description provided in section 184.4(c) as illustrative and not exhaustive. Section 184.4(d) also explains that, when determining if a particular construction project of a type not listed in section 184.4(c) constitutes “infrastructure,” agencies should consider whether the project will serve a public function, including whether the project is publicly owned and operated, privately operated on behalf of the public, or is a place of public accommodation, as opposed to a project that is privately owned and not open to the public. Through this memorandum, OMB notes that projects with the former “public” qualities have greater indicia (or distinguishing features) of “infrastructure,” while projects with the latter “private” quality have fewer. As a result, projects consisting solely of the purchase, construction, or improvement of a private home for personal use, for example, would not constitute a public infrastructure project for purposes of BABA. Federal agencies are strongly encouraged to consult with OMB when making such determinations or if they are uncertain about the applicability of this guidance to any particular infrastructure program.

The Agency, not the applicant, will have the final say as to whether a given project includes infrastructure, as defined herein. Accordingly, in cases where the “public” nature of the infrastructure is unclear, but the other relevant criteria are met, DOE strongly recommends that applicants complete their full application with the assumption that Buy America requirements will apply to the proposed project.

Project means the construction, alteration, maintenance, or repair of infrastructure in the United States.

B. Buy America Requirements for Infrastructure Projects (“Buy America” requirements)

In accordance with section 70914 of the BIL, none of the project funds (includes federal share and recipient cost share) may be used for a project for infrastructure unless:

Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.

(1) all iron and steel used in the project are produced in the United States--this means all manufacturing processes, from the initial melting stage through the application of coatings, occurred in the United States;

(2) all manufactured products used in the project are produced in the United States—this means the manufactured product was manufactured in the United States; and the cost of the components of the manufactured product that are mined, produced, or manufactured in the United States is greater than 55 percent of the total cost of all components of the manufactured product, unless another standard for determining the minimum amount of domestic content of the manufactured product has been established under applicable law or regulation; and

(3) all construction materials²⁵ are produced in the United States—this means that all manufacturing processes for the construction material occurred in the United States.

The Buy America Requirements only apply to articles, materials, and supplies that are consumed in, incorporated into, or affixed to an infrastructure project. As such, it does not apply to tools, equipment, and supplies, such as temporary scaffolding, brought to the construction site and removed at or before the completion of the infrastructure project. Nor does the Buy America Requirements apply to equipment and furnishings, such as movable chairs, desks, and portable computer equipment, that are used at or within the finished infrastructure project, but are not an integral part of the structure or permanently affixed to the infrastructure project.

These requirements must flow down to all sub-awards, all contracts, subcontracts and purchase orders for work performed under the proposed project, except where the prime recipient is a for-profit entity. Based on guidance from the Office of Management and Budget (OMB), the Buy America requirements of the BIL do not apply to DOE projects in which the prime recipient is a for-profit entity; the requirements only apply to projects whose prime recipient is a State, local government, Indian tribe, Institute of Higher Education, or nonprofit organization.

For additional information related to the application and implementation of these Buy America requirements, please see OMB Memorandum M-24-02, issued October 25, 2023.

Note that for all applicants – both non-Federal entities and for-profit entities – DOE is including a Program policy Factor that the Selection Official may consider in determining which Full Applications to select for award negotiations that considers whether the applicant has made a commitment to procure U.S. iron, steel, manufactured products, and construction materials in its project.

²⁵ Excludes cement and cementitious materials, aggregates such as stone, sand, or gravel, or aggregate binding agents or additives.

C. Waivers

The DOE financial assistance agreement will require each recipient: (1) to fulfill the commitments made in its application regarding the procurement of U.S.-produced products and (2) to fulfill the commitments made in its application regarding the procurement of other key component metals and manufactured products domestically that are deemed available in sufficient and reasonable available quantities or of a satisfactory quality at the time of award negotiation.

In limited circumstances, DOE may waive the application of the Buy America Requirements where DOE determines that:

- (1) applying the Buy America requirements would be inconsistent with the public interest;
- (2) the types of iron, steel, manufactured products, or construction materials are not produced in the United States in sufficient and reasonably available quantities or of a satisfactory quality; or
- (3) the inclusion of iron, steel, manufactured products, or construction materials produced in the United States will increase the cost of the overall project by more than 25 percent.

If an applicant or recipient is seeking a waiver of the Buy America requirements, it may submit a waiver request after it has been notified of its selection for award negotiations. A waiver request must include:

- A detailed justification for the use of “non-domestic” iron, steel, manufactured products, or construction materials to include an explanation as to how the non-domestic item(s) is essential to the project
- A certification that the applicant or recipient made a good faith effort to solicit bids for domestic products supported by terms included in requests for proposals, contracts, and nonproprietary communications with potential suppliers;
- Applicant /Recipient name and Unique Entity Identifier (UEI)
- Total estimated project cost, DOE and cost-share amounts
- Project description and location (to the extent known)
- List and description of iron or steel item(s), manufactured goods, and construction material(s) the applicant or recipient seeks to waive from Domestic Content Procurement Preference requirement, including name, cost, country(ies) of origin (if known), and relevant Product Service Codes (PSC) and North American Industry Classification System (NAICS) code for each.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

- Waiver justification including due diligence performed (e.g., market research, industry outreach) by the applicant or recipient
- Anticipated impact if no waiver is issued

DOE may require additional information before considering the waiver request.

Waiver requests are subject to public comment periods of no less than 15 days and must be reviewed by the Made in America Office. There may be instances where an award qualifies, in whole or in part, for an existing waiver described at [DOE Buy America Requirement Waiver Requests](#)

The applicant does not have the right to appeal DOE's decision concerning a waiver request.

Appendix D – Statement of Project Objectives Template

REMINDER: APPLICANTS SHOULD DOUBLE SPACE THE STATEMENT OF PROJECT OBJECTIVES (INCLUDING THE REQUIRED SECTIONS INDICATED BELOW) IN ACCORDANCE WITH THE FORM AND CONTENT REQUIREMENTS IN SECTION IV, “APPLICATION AND SUBMISSION INFORMATION” AND REMOVE THIS BLOCK PRIOR TO SUBMISSION.

STATEMENT OF PROJECT OBJECTIVES

Title of Project

(Insert the title of the work to be performed. Be concise and descriptive)

This should be a standalone document that states the work to be conducted and should not include any proprietary/confidential information.

A. OBJECTIVES

Include one paragraph on the overall objective(s) of the work. Note: if the project will be performed in phases, include specific objective(s) for each phase of the work.

B. SCOPE OF WORK

This section should not exceed one-half page and should summarize the effort and approach to achieve the objective(s) of the work. Note: if the project will be performed in phases, includes specific scope statement(s) for each phase.

C. TASKS TO BE PERFORMED

This section provides a brief summary of the planned approach to this project. Tasks/subtasks, concisely written, should be provided in a logical sequence and should be divided into the phases of the project, as appropriate. In writing the Statement of Project Objectives (SOPO), avoid 1) the use of proper nouns to minimize SOPO modifications in the event of changes to the project team, facilities, etc.; 2) figures and equations; 3) references to other documents and publications; and 4) details about past work and discussion of technical background (which should be covered elsewhere in the application narrative).

Task 1.0 - Project Management and Planning (REQUIRED; APPLICANT INSERT THIS TASK)

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

Subtask 1.1 – Project Management Plan (REQUIRED; APPLICANT INSERT THE LANGUAGE PROVIDED BELOW IN QUOTES. SEE THE “PROJECT MANAGEMENT PLAN TEMPLATE” APPENDIX FOR FORMAT.)

“The Recipient shall manage and direct the project in accordance with a Project Management Plan to meet all technical, schedule and budget objectives and requirements. The Recipient will coordinate activities in order to effectively accomplish the work. The Recipient will ensure that project plans, results, and decisions are appropriately documented and project reporting and briefing requirements are satisfied.

The Recipient shall update the Project Management Plan 30 days after award and as necessary throughout the project to accurately reflect the current status of the project. Examples of when it may be appropriate to update the Project Management Plan include: (a) project management policy and procedural changes; (b) changes to the technical, cost, and/or schedule baseline for the project; (c) significant changes in scope, methods, or approaches; or (d) as otherwise required to ensure that the plan is the appropriate governing document for the work required to accomplish the project objectives.

Management of project risks will occur in accordance with the risk management methodology delineated in the Project Management Plan in order to identify, assess, monitor and mitigate technical uncertainties as well as schedule, budgetary and environmental risks associated with all aspects of the project. The results and status of the risk management process will be presented during project reviews and in quarterly progress reports with emphasis placed on the medium- and high-risk items.”

Subtask 1.2 – Develop a plan for coalitions and Teaming Partners for the region and with surrounding regions.

Task 2.0 – Regional Resource Assessment and Initial Planning.

A high-level prospective assessment that will serve as the foundation for future data and information refinements of the regional REE- and CM-containing resources. The effort will serve as a primary evaluation identifying the most promising resources within the Region.

Subtask 2.X – (Title)

Subtask descriptions should include a concise description of the work to be conducted for each subtask.

APPLICANT continue with sub-tasks as necessary.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

Task 3.0 – Regional Assessment of CORE-CM Resources, Sampling, and Characterization.

Complete and execute a plan and broad overview of regional resources by assessment and characterization of contained CMM. The assessment shall include leveraging existing and new field characterization data, development of analytical geological models, identification of information gaps to fill those gaps and inform future R&D on resource recovery.

Subtask 3.X – (Title)

Subtask descriptions should include a concise description of the work to be conducted for each subtask.

APPLICANT continue with sub-tasks as necessary.

Task 4.0 – Regional Overview for Infrastructure, Industries, and Business Including Site Strategies.

Formulate strategies to integrate and leverage regional infrastructure, industries and businesses to spur economic growth by utilizing the regions CORE-CM resources as well as other minerals and waste streams.

Subtask 4.X – (Title)

Subtask descriptions should include a concise description of the work to be conducted for each subtask.

APPLICANT continue with sub-tasks as necessary.

Task 5.0 – Stakeholder Outreach and Education.

Develop a regional plan for stakeholder outreach, education, and preparation of a workforce development and community engagement plan for CORE-CM resources in the region. This encompasses training (or retraining/uptraining) of the next generation of technicians, skilled workers, and STEM professionals, including scientists and engineers, for securing domestic feedstocks and material component production.

Subtask 5.X – (Title)

Subtask descriptions should include a concise description of the work to be conducted for each subtask.

APPLICANT continue with sub-tasks as necessary.

Task 6.0 – Technology Innovation Center (TIC) Plans.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

Formulate/refine plans and develop a roadmap to implementation for technology innovation centers that will be developed and operated by regional public-private partnerships.

Subtask 6.X – (Title)

Subtask descriptions should include a concise description of the work to be conducted for each subtask.

APPLICANT continue with sub-tasks as necessary.

Task 7.0 – CORE-CM Workgroups.

Participate in DOE-led closed Working Groups with other CORE-CM Recipients as required during the term of the project, including attendance at related workshops led by NETL/DOE staff or contractor personnel

Subtask 7.X – (Title)

Subtask descriptions should include a concise description of the work to be conducted for each subtask.

APPLICANT continue with sub-tasks as necessary.

Task 8.0 – Critical Materials Collaborative (CMC).

Participate as a member of the Critical Materials Collaborative, which is a coalition of DOE offices, federal agencies & federally funded R&D programs.

Subtask 8.X – (Title)

Subtask descriptions should include a concise description of the work to be conducted for each subtask.

APPLICANT continue with sub-tasks as necessary.

APPLICANT continue with tasks/sub-tasks as necessary. If the project is structured in Phases, clearly delineate which tasks/subtasks are in each Phase.

Task X.0 - (Title)

Task descriptions should include a concise description of the work to be conducted for each task. If the task includes subtasks, provide a general description of how each subtask is related to the overall scope of the task.

Subtask X.1 - (Title)

Subtask descriptions should include a concise description of the work to be conducted for each subtask.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

Subtask X.2 - (Title)

D. DELIVERABLES (Required: Applicant insert the Language provided below in quotes and continue to complete.)

“The periodic and final reports shall be submitted in accordance with the “Federal Assistance Reporting Checklist” and the instructions accompanying the checklist. In addition to the reports specified in the “Federal Assistance Reporting Checklist”, the Recipient must provide the following to the NETL Project Manager (identified in Block 15 of the Assistance Agreement as the Program Manager).”

Task / Subtask Number	Deliverable Title	Due Date
1.1	Project Management Plan	Update due 30 days after award. Revisions to the PMP shall be submitted as requested by the NETL Project Manager.
1.2	Coalitions and Teaming Partners list	Due 90 days after the start of the award. Revisions and updates shall be submitted as new partners are added.
1.X	Interim Report	Due 90 days prior to the end of BP1, at go/no-go decision point
1.X	Final Report	All written deliverables should be included as chapters or subdivisions of the Final Report.
2.X	Regional Resource Assessment, including gap analysis	Due 90 days prior to the end of BP1, at go/no-go decision point.
2.X	Technology Assessment and Field Development Plan	Due with Interim and Final Report.
3.X	Characterization and Data Acquisition Plan	Due 90 days after award start.
3.X	Regional Assessment of CORE-CM Resources, Sampling, and Characterization Plan	Due 90 days prior to the end of BP1, at go/no-go decision point. Updates to this plan can be made after this point and will be submitted to the NETL Project Manager.
3.X	Site Access Agreement (for each site accessed for sampling) and NEPA.	Due to NETL Project Manager prior to accessing the site to attain approval from NEPA. NETL F 451.1-1/3 (doe.gov)
3.X	FOA 3077 CORE-CM Resource Assessment Data Document (Attachment 1)	Due to be uploaded every 6 months from the start of the project, a (final) update is due 90 days before the end of the project. This information will be supplied in the format specified in Attachment 1 for uploading into NETL’s private Geospatial

Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.

		EDX Database, for use in the NETL RIC's Geologic Models.
3.X	Geologic Models including assumptions	Due with or prior to final report.
3.X	Resource Samples for Mineral Characterization and Analysis (Rock sample) – Detailed Inventory/Catalog	Due 90 days prior to the end of BP1, at go/no-go decision point and updated for final report. Recipients will provide NETL with a detailed inventory/catalog of all samples taken for this work. The samples should be single split CMM sample for each type of material or core sample assessed that reflects the representative samples of CMM concentration identified during conduct of the project effort. The quantity of sample material should be adequate for laboratory analysis. These samples will be stored and maintained by the recipient for 5 years after end of the project. NETL retains the right to request the sample within the 5 years. NETL will pay to ship the sample if they request it. Material Safety Data Sheets (MSDS) are required to accompany material supplied to NETL.
4.X	Results for Regional Strategies for Infrastructure, Industries, and Business Assessment	Due at Interim and Final Report
4.X	Regional Business Commercialization Plan	Due with final report.
5.X	Stakeholder Outreach Plan	Due 90 days prior to the end of BP1, at go/no-go decision point
5.X	Community Engagement, outreach and Tribal engagement report	Due after outreach activities as a part of quarterly reports. See reporting checklist. See Community Benefits Report template for community and labor engagement report template. Recipient Reporting for Projects Funded by the Investing in America Agenda Department of Energy ²⁶
5.X	Workforce Readiness Plan	The initial Plan is due 90 days prior to the end of BP1. Subsequent updates to the Plan are due with the final report.
6.X	Technology Innovation Center Roadmap	Due at Interim and Final Report

²⁶ This new resource, though created primarily for BIL-funded demonstration and deployment projects, may be useful for creating the report for this project.
<https://www.energy.gov/infrastructure/reporting-checklists>

Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.

7.X	Active Participation in Working Groups	To be completed in accordance with working group topics and goals.
8.X	Active Participation in Critical Materials Collaborative	To be completed in accordance with CMC group topics and goals.

APPLICANT continue to identify deliverables (other than those identified on the “Federal Assistance Reporting Checklist”) that will be delivered using the format provided in the table above. Ensure the delivery date to NETL is also identified. For examples: Delivery to NETL X months after completion of task/subtask X.

NOTE: If the application is selected for award, DOE may require the Recipient to include additional deliverables, provided that such deliverables are consistent with the budget, schedule, and scope of the project.

E. BRIEFINGS/TECHNICAL PRESENTATIONS (Required: Applicant insert the language provided below in quotes and continue to complete.)

“The Recipient shall prepare detailed briefings for presentation to the NETL Project Manager at their facility located in Pittsburgh, PA, Morgantown, WV, Albany, OR, or via WebEx. The Recipient shall make a presentation to the NETL Project Manager at a project kick-off meeting held within ninety (90) days of the project start date. At a minimum, annual briefings shall also be given by the Recipient to explain the plans, progress, and results of the technical effort and a final project briefing at the close of the project shall also be given.”

At the Applicant’s discretion, other briefings/presentations may be added to Section E of the SOPO.

NOTE: If the application is selected for award, DOE may require the Recipient to include additional briefings/presentations, provided that such briefings/presentations are consistent with the budget, schedule, and scope of the project.

Appendix E – Project Management Plan Template

REMINDER: APPLICANTS SHOULD DOUBLE SPACE THE PROJECT MANAGEMENT PLAN IN ACCORDANCE WITH THE FORM AND CONTENT REQUIREMENTS IN SECTION IV, “APPLICATION AND SUBMISSION INFORMATION AND REMOVE THIS BLOCK PRIOR TO SUBMISSION.

The Applicant’s Project Management Plan (PMP) is an approved document that defines how the Applicant will execute, monitor, and control the project to accomplish the objectives. The specific contents, level of detail, and inclusion of subsidiary planning documents are tailored according to the needs of the project. Consequently, every PMP will be different based on the risk, visibility, and/or complexity of the project and the Recipient's established processes, procedures, and systems.

Title Page:

PROJECT MANAGEMENT PLAN

{Insert Project Title}

{Date Prepared}

SUBMITTED BY

{Organization Name}
{Organization Address}
{City, State, Zip Code}

PRINCIPAL INVESTIGATOR

{Name}
{Phone Number}
{E-mail}

SUBMITTED TO

U.S. Department of Energy
National Energy Technology Laboratory

This plan should be formatted to include the following sections with each section to include the information as described below:

A. Executive Summary:

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

Provide a description of the project that includes the objective, project goals, and expected results. For purposes of the application, this information is included in the Project Narrative and should be simply copied to this document for completeness, so that the Project Management Plan is a stand-alone document.

B. Project Organization and Structure:

Provide the following information in this section:

- Organizational Chart(s): Include a complete project organizational chart and sub-organization charts (if applicable), accompanied by a discussion of how the organizational structure will facilitate the performance of the Tasks and achievement of the objectives described in the SOPO within the time frame specified in the application.
- Roles and Responsibilities of Participants: Provide a discussion of key project team members, and the capacity in which each team member will assist in achieving the overall objective(s) of the proposed project. For multi-organizational or multi-investigator projects, describe the roles to be performed by each participant/investigator within the context of the Task/subtask structure contained in the SOPO. Include descriptions of any business agreements or intellectual property issues between the applicant and other members of the project team, and how these agreements will be integrated and managed.
- Decision-making and Communication Strategy: Provide a discussion of how communication and decision-making will occur within the context of the organizational structure, with particular emphasis on scientific/technical direction and mechanisms for controlling project scope, cost, and schedule. Include a discussion of how the project team will communicate with DOE and external stakeholders during the performance of the project.
- Management Capabilities: Provide information relevant to the capabilities and experience of the PI and key project team members in managing technical projects of similar nature and complexity. If applicable, include examples that demonstrate the ability to successfully meet research objectives within scope, budget and schedule.

C. Risk Management Plan:

Provide a summary description of the proposed approach to identify, analyze, and respond to perceived risks associated with the proposed project. Project risk events are uncertain future events that, if realized, impact the success of the project. Risk is inherent to all projects regardless of complexity, cost, or visibility. An effective Risk Management Plan will identify perceived risks and explain mitigation strategies for each risk. At a minimum, the Risk Management Plan shall include the initial identification of significant financial, cost/schedule, technical/scope, management,

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

planning and oversight, ES&H, external factors, and management issues that have the potential to impede project progress and strategies to minimize impacts from those issues.

The following table format is provided but is not required:

Perceived Risks and Mitigation Strategies				
Perceived Risk	Risk Rating			Mitigation/Response Strategy
	Probability	Impact	Overall	
	(Low, Med, High)			
Financial Risks:				
Cost/Schedule Risks:				
Technical/Scope Risks:				
Management, Planning, and Oversight Risks:				
ES&H Risks:				
External Factor Risks:				

D. Milestone Log:

Provide milestones for each budget period of the project. Each milestone should be linked to a specific Task or Subtask and include a title, planned completion date, and a description of the method/process/measure used to verify completion. Milestones should be quantitative and show progress toward budget period and/or project goals. Conversely, periodic, mandatory progress reports are not considered to be Milestones.

Milestones are presumed to lie on the critical path of the project, i.e., unless all milestones are achieved, the Objectives as defined in the SOPO cannot be met

Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov
 Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
 FOA name and number in subject line.

completely. Applicants must provide at least two milestones per year throughout the course of the project.

Milestone Format

Task/ Subtask	Milestone Title & Description	Planned Completion Date	Verification method

[Note: During project performance, the Recipient will report the Milestone Status as part of the required quarterly progress report as prescribed under the Federal Assistance Reporting Checklist. The Milestone Status will present actual performance in comparison with Planned Milestones, and include:

- (1) the actual status and progress of the project,
- (2) specific progress made toward achieving the project's milestones, and,
- (3) any proposed changes in the project's schedule required to complete milestones.]

E. Costing Profile:

Provide a table (the Spend Plan) that projects the expenditures of government funds by fiscal year for each project team member.

Spend Plan by Fiscal Year Format

	FY 20XX		FY 20XX		FY 20XX		FY 20XX		Total	
	DOE Funds	Cost Share	DOE Funds	Cost Share	DOE Funds	Cost Share	DOE Funds	Cost Share	DOE Funds	Cost Share
Applicant										
Subrecipient A, if proposed										
Subrecipient B, if proposed										
FFRDC/NL, if proposed										
Total (\$)										
Total Cost Share %										

F. Project Timeline:

Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.

Provide a timeline of the project (similar to a Gantt chart) broken down by each task and subtask, as described in the Statement of Project Objectives. The timeline should include for each task, a start date, and end date. The timeline should show interdependencies between tasks and include the milestones that are identified in the Milestone Log (Section C).

Project Timeline (Gantt Chart) Example

G. Success Criteria:

Success criteria are used by the DOE to determine if specific goals and objectives were met at the end of budget period(s), go/no-go decision points, and/or project completion. The success criteria should be objective and stated in terms of specific, measurable, and repeatable data. Usually, the success criteria pertain to desirable outcomes, results, and observations from the project.

[Note: As the first task in the Statement of Project Objectives, successful applicants will revise the version of the Project Management Plan that is submitted with their applications by including details from the negotiation process. This Project Management Plan will be updated by the Recipient as the project progresses, and the Recipient must use this plan to report scope, schedule, and budget variances.]

Appendix F – Data Management Plan

A Data Management Plan (“DMP”) explains how data generated in the course of the research or work performed under an assistance award will be shared and preserved or, when justified, explains why data sharing or preservation is not possible or scientifically appropriate.

DMP Requirements

In order for a DMP to be considered acceptable, the DMP must address the following:

At a minimum, the DMP must describe how data sharing and preservation will enable validation of the results from the proposed work, or how results could be validated if data are not shared or preserved.

The DMP must provide a plan for making all research data displayed in publications resulting from the proposed work digitally accessible at the time of publication. This includes data that are displayed in charts, figures, images, etc. In addition, the underlying digital research data used to generate the displayed data should be made as accessible as possible in accordance with the principles stated above. This requirement could be met by including the data as supplementary information to the published article, or through other means. The published article should indicate how these data can be accessed.

The DMP should consult and reference available information about data management resources to be used in the course of the proposed work. In particular, a DMP that explicitly or implicitly commits data management resources at a facility beyond what is conventionally made available to approved users should be accompanied by written approval from that facility. In determining the resources available for data management at DOE User Facilities, researchers should consult the published description of data management resources and practices at that facility and reference it in the DMP. Information about other DOE facilities can be found in the additional guidance from the sponsoring program.

The DMP must protect confidentiality, personal privacy, Personally Identifiable Information, and U.S. national, homeland, and economic security; recognize proprietary interests, business confidential information, and intellectual property rights; avoid significant negative impact on innovation, and U.S. competitiveness; and otherwise be consistent with all laws (i.e., export control laws), and DOE regulations, orders, and policies.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

Data Determination for a DMP

The Principal Investigator should determine which data should be the subject of the DMP and, in the DMP, propose which data should be shared and/or preserved in accordance with the DMP Requirements noted above.

For data that will be generated through the course of the proposed work, the Principal Investigator should indicate what types of data should be protected from immediate public disclosure by DOE (referred to as “protected data”) and what types of data that DOE should be able to release immediately. Similarly, for data developed outside of the proposed work at private expense that will be used in the course of the proposed work, the Principal Investigator should indicate whether that type of data will be subject to public release or kept confidential (referred to as “limited rights data”). Any use of limited rights data or labeling of data as “protected data” must be consistent with the DMP Requirements noted above.

Suggested Elements for a DMP

The following list of elements for a DMP provides suggestions regarding the data management planning process and the structure of the DMP:

Data Types and Sources: A brief, high-level description of the data to be generated or used through the course of the proposed work and which of these are considered digital research data necessary to validate the research findings or results.

Content and Format: A statement of plans for data and metadata content and format including, where applicable, a description of documentation plans, annotation of relevant software, and the rationale for the selection of appropriate standards. Existing, accepted community standards should be used where possible. Where community standards are missing or inadequate, the DMP could propose alternate strategies for facilitating sharing, and should advise the sponsoring program of any need to develop or generalize standards.

Sharing and Preservation: A description of the plans for data sharing and preservation. This should include, when appropriate: the anticipated means for sharing and the rationale for any restrictions on who may access the data and under what conditions; a timeline for sharing and preservation that addresses both the minimum length of time the data will be available and any anticipated delay to data access after research findings are published; any special requirements for data sharing, for example, proprietary software needed to access or interpret data,

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

applicable policies, provisions, and licenses for re-use and re-distribution, and for the production of derivatives, including guidance for how data and data products should be cited; any resources and capabilities (equipment, connections, systems, software, expertise, etc.) requested in the research proposal that are needed to meet the stated goals for sharing and preservation (this could reference the relevant section of the associated research proposal and budget request); and whether/where the data will be preserved after direct project funding ends and any plans for the transfer of responsibilities for sharing and preservation. A description of how the recipient intends to make the results of any resulting DOE-funded work available to the public, including the relevant technical community.

Protection: A statement of plans, where appropriate and necessary, to protect confidentiality, personal privacy, Personally Identifiable Information, and U.S. national, homeland, and economic security; recognize proprietary interests, business confidential information, and intellectual property rights; and avoid significant negative impact on innovation, and U.S. competitiveness.

Rationale: A discussion of the rationale or justification for the proposed data management plan including, for example, the potential impact of the data within the immediate field and in other fields, and any broader societal impact.

Additional Guidance

In determining which data should be shared and preserved, researchers must consider the data needed to validate research findings as described in the Requirements and are encouraged to consider the potential benefits of their data to their own fields of research, fields other than their own, and society at large.

DMPs should reflect relevant standards and community best practices and make use of community accepted repositories whenever practicable.

Costs associated with the scope of work and resources articulated in a DMP may be included in the proposed research budget as permitted by the applicable cost principles.

To improve the discoverability of and attribution for datasets created and used in the course of research, DOE encourages the citation of publicly available datasets within the reference section of publications, and the identification of datasets with persistent identifiers such as Digital Object Identifiers (DOIs). In most cases, DOE can provide DOIs free of charge for data resulting from DOE-funded research through its Office of Scientific and Technical Information (OSTI) DataID Service.

Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

Definitions

Data Preservation: Data preservation means providing for the usability of data beyond the lifetime of the research activity that generated them.

Data Sharing: Data sharing means making data available to people other than those who have generated them. Examples of data sharing range from bilateral communications with colleagues, to providing free, unrestricted access to anyone through, for example, a web-based platform.

Digital Research Data: The term digital data encompasses a wide variety of information stored in digital form including: experimental, observational, and simulation data; codes, software and algorithms; text; numeric information; images; video; audio; and associated metadata. It also encompasses information in a variety of different forms including raw, processed, and analyzed data, published and archived data.

Research Data: The recorded factual material commonly accepted in the scientific community as necessary to validate research findings, but not any of the following: preliminary analyses, drafts of scientific papers, plans for future research, peer reviews, or communications with colleagues. This 'recorded' material excludes physical objects (e.g., laboratory samples). Research data also do not include:

(A) Trade secrets, commercial information, materials necessary to be held confidential by a researcher until they are published, or similar information which is protected under law; and

(B) Personnel and medical information and similar information the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, such as information that could be used to identify a particular person in a research study.”

Validate: In the context of DMPs, validate means to support, corroborate, verify, or otherwise determine the legitimacy of the research findings. Validation of research findings could be accomplished by reproducing the original experiment or analyses; comparing and contrasting the results against those of a new experiment or analyses; or by some other means.

Appendix G – Workforce Readiness Plan Template

This is a suggested format. If it makes sense for the Recipient to present the information in a different format, it may do so provided all content is covered.

This document should generally be 1 – 2 pages in length.

Recipient Name:

PI Name:

Award Number:

Project Title:

Technology:

Availability and accessibility of training programs: Describe the necessary skillset and training required to prepare the workforce needed to commercialize/deploy the technology. Discuss availability of training and educational programs to fill current or projected activity/commercialization need.

Ongoing or planned collaborations with education and training providers: Describe plans and approaches to access the necessary training for the workforce needed to commercialize/deploy the technology. This includes coordination with educational institutions such as community colleges, technical schools, and universities, company-led in-house training, union training, etc. Please identify any institutions with which working relationships exist.

Identify any necessary certificates, certifications or other educational attainment involved in this technology/activity.

Examples include apprenticeships, certificates, certifications, academic training or other programs available through in-house training or in coordination with education institutions such as community colleges, technical schools, universities, unions or other professional associations.

Identify any Economically Distressed Communities or state or federal designated Opportunity Zones or other geographically defined empowerment zones where this activity may occur. *(example: Appalachian region distressed or defined counties)*

Appendix H – R&D Community Benefits Plan Guidance

The DOE is committed to pushing the frontiers of science and engineering; catalyzing high-quality domestic clean energy jobs through research, development, demonstration, and deployment; and ensuring energy equity and energy justice²⁷ for disadvantaged communities. Therefore, and in accordance with the Administration’s priority to empower workers and harness opportunities to create good union jobs as stated in EO 14008 (Executive Order on Tackling the Climate Crisis at Home and Abroad)²⁸, it is important to consider the impacts of the successful commercial deployment of any innovations resulting from this FOA on the current and future workforce.

The goal of the R&D Community Benefits Plan is to allow the application to illustrate engagement in critical thought about implications of how the proposed work will benefit the American people and lead to broadly shared prosperity, including for workers and disadvantaged communities²⁹. The three sections of the R&D Community Benefits Plans are considered together because there may be significant overlap among audiences considered in workforce and disadvantaged communities.

Example DEIA, Energy Equity, and Workforce Plan Elements

Outlined below are examples of activities that applicants might consider when developing their R&D Community Benefits Plan. Applicants are not required to implement any of these specific examples and should propose activities that best fits their research goals, institutional environment, team composition, and other factors. Creativity is encouraged.

DEIA

²⁷ DOE defines energy justice as “the goal of achieving equity in both the social and economic participation in the energy system, which also remediating social, economic, and health burdens on those disproportionately harmed by the energy system” (Initiative for Energy Justice, 2019). Aligned with that document refers to this as, ‘energy equity,’ and is meant to encompass energy justice as well as DOE’s efforts related to Justice40. <https://www.energy.gov/diversity/articles/how-energy-justice-presential-initiatives-and-executive-orders-shape-equity>

²⁸ <https://www.federalregister.gov/documents/2021/02/01/2021-02177/tackling-the-climate-crisis-at-home-and-abroad>

²⁹ See footnote 2 for guidance on the definition and tools to locate and identify disadvantaged communities.

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

DOE strongly encourages applicants to involve individuals and entities from disadvantaged communities. Tapping all of the available talent requires intentional approaches and yields broad benefits.

Equity extends beyond diversity to equitable treatment. Equitable access to opportunity for members of the project team is paramount. This includes ensuring that all members of the team, including students, are paid a living wage, provided appropriate working conditions, and provided appropriate benefits. In the execution of their project plan, applicants are asked to describe efforts in diversity, equity, inclusion, and accessibility. In this context, efforts toward DEIA are defined as:³⁰

- 1) the practice of including the many communities, identities, races, ethnicities, backgrounds, abilities, cultures, and beliefs of the American people,
- 2) the consistent and systematic fair, just, and impartial treatment of all individuals, including protecting workers rights and adhering to Equal Employment Opportunity laws,
- 3) the recognition, appreciation, and use of the talents and skills of employees of all backgrounds, and
- 4) the provision of accommodations so that all people, including people with disabilities, can fully and independently access facilities, information, and communication technology, programs, and services.

Successful plans will not only describe how the project team seeks to increase DEIA, but will describe the overall approaches to retention, engagement, professional development, and career advancement. Specifically, they will demonstrate clear approaches to ensure all team members' strengths are meaningfully leveraged and all members are provided opportunities and paths for career development, especially including paths for interns and trainees to secure permanent positions. Diversity should be considered at all levels of the project team, not just leveraging early career individuals to meet diversity goals.

DOE strongly encourages applicants to consider partnerships to promote DEIA, justice, and workforce participation. Minority Serving Institutions, Minority Business Enterprises, Minority Owned Businesses, Disability Owned Business, Women Owned Business, Native American-owned Businesses, Veteran Owned Businesses, or entities located in an underserved community that meet the eligibility requirements are encouraged to lead these partnerships as the prime applicant or participate on an application as a proposed partner to the prime applicant.

³⁰ <https://www.whitehouse.gov/wp-content/uploads/2021/11/Strategic-Plan-to-Advance-Diversity-Equity-Inclusion-and-Accessibility-in-the-Federal-Workforce-11.23.21.pdf>

When crafting the DEIA section of the Plan, applicants should describe how they will act to promote each of the four DEIA efforts above into their investigation. It is important to note that diversity, equity, inclusion, and accessibility are four different but related concepts that should not be conflated. For instance, you can achieve diversity without equity; all four must be addressed. Applicants could discuss how the proposed investigation could contribute to training and developing a diverse scientific workforce. Applicants could describe the efforts they plan to take or will continue to take, to create an inclusive workplace, free from retaliation, harassment, and discrimination. Applicants could outline any barriers to creating an equitable and inclusive workplace and address the ways in which the team will work to overcome these barriers within the bounds of the specific research project. This plan could detail specific efforts to inform project team members in any capacity of their labor rights and rights under Equal Employment Opportunity laws, and their free and fair chances to join a union. Note that this inclusion of informing project team members is also incorporated into awards through the National Policy Assurances.

Equal treatment of workers, including students, is necessary but overcoming institutional bias requires intentionally reducing sometimes hidden barriers to equal opportunity. Applicants could consider measures like childcare, flexible schedules, paid parental leave, pay transparency, and other supports to ensure that societal barriers are not hindering realization of DEIA intentions. Some of these considerations may result in common approaches in different sections of the plan, and that is acceptable, as long as the submission is not a singular approach to all sections.

DOE especially encourages applicants to form partnerships with diverse and often underrepresented institutions, such as Minority Serving Institutions, labor unions, community colleges that otherwise meet the eligibility requirements.

Underrepresented institutions that meet the eligibility requirements are encouraged to lead these partnerships as the prime applicant. The DEIA section of the Plan could include engagement with underrepresented institutions to broaden the participation of disadvantaged communities and/or with local stakeholders, such as residents and businesses, entities that carry out workforce development programs, labor unions, local government, and community-based organizations that represent, support, or work with disadvantaged communities. Applicants should ensure there is transparency, accountability, and follow-through when engaging with community members and stakeholders.

Specific examples include:

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

- Building collaborations and partnerships with researchers and staff at Minority Serving Institutions
- Addressing barriers identified in climate surveys to remove inequities
- Providing anti-bias training and education in the project design and implementation teams
- Offering training, mentorship, education, and other support to students and early/mid-career professionals from disadvantaged communities
- Providing efforts toward improving a workplace culture of inclusion
- Developing technology and technology integration innovations to meet the needs of disadvantaged communities
- Creating partnerships with local communities, especially under-resourced and disadvantaged communities
- Voluntary recognition of a union and informing employees of their rights, regardless of their classification
- Making research products and engagement materials accessible in a greater variety of formats to increase accessibility of research outputs
- Implementing training or distributing materials to reduce stigma towards individuals with disabilities
- Designing technologies that strategically fit within the existing workforce for installation and maintenance of the potential innovation

Energy Equity

The Energy Equity section should articulate how project proposals will drive equitable access to, participation in, and distribution of the benefits produced from successful technology innovations to disadvantaged communities and groups. Intentional inclusion of energy equity requires evaluating the anticipated long-term costs and benefits that will accrue to disadvantaged groups as a result of the project, and how research questions and project plans are designed for and support historically disadvantaged communities' engagement in clean energy decisions. Similar to potential cost reductions or groundbreaking research findings resulting from the research, energy equity and justice benefits may be uncertain, occur over a long period of time, and have many factors within and outside the specific proposed research influencing them.

Applicants should describe the influencing factors, and the most likely energy equity implications of the proposed research. Applicants should describe any long-term constraints the proposed technology may pose to communities' access to natural resources and Tribal Cultural resources. There may be existing equity research available to use and citation in this description or the applicant could describe milestone-based efforts toward developing that understanding through this

*Questions about this FOA? Email DE-FOA-0003077@netl.doe.gov
Problems with NETL Exchange? Email NETL-ExchangeSupport@hq.doe.gov Include
FOA name and number in subject line.*

innovation. These near and long term outcomes may include, but are not limited to: a decrease in the percent of income a household spends on energy costs (energy burden³¹); an increase in access to low-cost capital; a decrease in environmental exposure and burdens; increases in clean energy enterprise creation and contracting (e.g., women or minority-owned business enterprises); increased parity in clean energy technology access and adoption; increases in energy democracy, including community ownership; and an increase in energy resilience.

Specific examples include:

- Describing how successful innovation will support economic development in diverse geographic or demographic communities
- Creating a plan to engage equity and justice stakeholders in evaluation the broader impacts of the innovation or in the development of the research methodology
- Describe how the proposed research strategy and methodology was informed by input from a wide variety of stakeholders
- Creating a literature review of the equity and justice implications of the outcomes of the specific research if the innovation is successful, or a plan with dedicated budget and expertise (staffing or subawardee) to evaluate the potential equity implications of successful innovation outcomes.

Workforce

The Workforce section of the R&D Community Benefits Plan should articulate the future workforce implications of the innovation or a milestone-driven plan for understanding those implications. This includes documenting the skills, knowledge, and abilities that would be required of workers installing, maintaining, and operating the technology that may be derivative of the applicant's research, as well as the training pathways and their accessibility for workers to acquire the necessary skills. There may be field-specific or relevant existing research that could be cited in this section. In addition, applicants could detail the process they will use to evaluate long-term impacts on jobs, including job growth or job loss, a change in job quality, disruptions to existing industry and resulting changes to relationships between employers and employees and improvements or reductions in the ability of workers to organize for collective representation, and anything else that could result in changes to regional or national labor markets.

For additional support with developing the Workforce section of the R&D Community Benefits Plan, please refer to DOE's Community Benefits Plan Frequently

³¹ Energy burden is defined as the percentage of gross household income spent on energy costs: <https://www.energy.gov/eere/slscl/low-income-community-energy-solutions>

Asked Questions (FAQs) webpage (<https://www.energy.gov/bil/community-benefits-plan-frequently-asked-questions-faqs>). This new resource, though created primarily for BIL-funded demonstration and deployment projects, may be useful for R&D projects.

Applicants will find section 2 of the FAQ (“Investing in America’s Workforce”) particularly helpful for understanding key federal policies, terms and concepts, as well as workforce development strategies relevant to examination of the workforce implications of applicant’s proposed research.

Specific examples include:

- Outlining the challenges and opportunities for commercializing the technology in the US
- Creating a literature review of the workforce implications of the outcomes of the specific research if the innovation is successful or a plan with dedicated budget and expertise (staffing or subawardee) to evaluate the potential equity implications of successful innovation outcomes
- Creating a plan and milestones for assessing how a successful innovation will have implications for job savings for loss, either at the macroeconomic level or within specific industries
- Describing how the project will support workforce training to address needs of successful innovation
- Voluntary recognition of a union and informing employees of their rights, regardless of their classification
- Creating a plan to evaluate how a successful innovation will result in potential workforce shifts between industries or geographies

Inclusion of SMART milestones

DOE requires that the applicant’s R&D Community Benefits Plan include on Specific, Measurable, Achievable, Relevant, and Timely (SMART) milestone for each budget period. An exemplar SMART milestone clearly answers the following questions:

- What needs to be accomplished?
- What measures and deliverables will be used to track progress toward accomplishment?
- What evidence suggests that the accomplishment is achievable?
- Why choose this milestone?
- When will the milestone be reached?

FOA name and number in subject line.*

Appendix I – NETL Research and Innovation Center (RIC) Geospatial Modeling

NETL RIC's Unconventional Rare Earth Element and Critical Mineral (URC) Assessment method is focused on developing an approach for systematically assessing REE's in coal and related sedimentary strata to identify areas of predicted concentration and extractability. Ultimately, this assessment method will provide users with a novel, knowledge and data-driven assessment tool that can be used to predict the occurrence of promising REE-bearing deposits associated with coal bearing sedimentary strata, and for areas with enough data, quantify predicted REE resource volumes. The effort is aimed at supporting the development of technologies that lead to the commercialization of domestic REE deposits. The primary deliverable from this NETL RIC project is the URC Assessment Method, a strategic resource assessment method for REE's in sedimentary systems, enabled by a tool that is enhanced with "smart data" capabilities to (1) determine in-place resource estimates, and (2) ultimately assess if REE occur in adequate concentrations and volumes to support commercial extraction from U.S. regions.

The NETL URC Assessment Method is under development and validation, Version 1 of the method was published in 2023³². The method is based on a geologic, geostatistical, and data science approach, building off resource assessment methods for other mineral resource types, but adapted and tailored to the unique geologic processes and mechanisms documented to date in peer-reviewed literature that result in concentrations of REE's in sedimentary strata. The method begins with understanding the systematic nature of how REE become concentrated in coal, underclays, and other associated strata. The URC Method incorporates this information to test for processes that result in REE sedimentary deposits. The method leverages assessment strategies from petroleum and/or mineral resources to evaluate whether past geological conditions were favorable for REE-coal occurrences, and where enough data is available, estimate potential resource quantities. Geological factors such as depositional history, tectonic and diagenetic influences, and geochemical alteration are assessed using available geological, geochemical, and geospatial datasets from the DOE, USGS, state agencies and other public sources.

Datasets and knowledge to support the workflows for the primary and secondary URC enrichment processes are vital to executing a successful assessment at the

³² Justman, D., Sabbatino, M., Montross, S., Pantaleone, S., Bean, A., Rose, K., & Thomas, R. B. (2022). A database and framework for carbon ore resources and associated supply chain data. *Data in Brief*, 40, 107761. [A database and framework for carbon ore resources and associated supply chain data - ScienceDirect](#)

basin, mine, or stratigraphic layer scales. The URC team has assembled an open data collection (<https://edx.netl.doe.gov/dataset/ree-and-coal-open-geodatabase-geocube-collection>) of resources via EDX that may be useful for resource evaluations in the future. Technical reports summarizing the REE enrichment mechanisms documented in the literature to date is available³³.

Specific objectives of the NETL RIC **Geospatial Modeling** effort could include:

- Developing novel, data-driven CMM resource assessment tools/methodologies/models to predict the occurrence of promising CMM bearing deposits associated with coal bearing sedimentary strata, and where possible quantification and prediction of CMM resource volumes, and their accessibility and feasibility for recovery of these resources in a sustainable and economical manner.
- Developing systematic sampling methods for improved characterization of lithographic and CMM measurements in sedimentary systems.
- Assessing sedimentary formations based on geological factors such as depositional history, tectonic and diagenetic influences, and geochemical alteration using available geological, geochemical, and geospatial datasets from the DOE, USGS, state agencies and other public sources.
- Utilizing information generated during conduct of field sampling and characterization of lithostratigraphic and CMM measurements to develop a Virtual Resource Assessment Atlas similar to that developed under the DOE-NETL's Carbon Storage Program.

³³ Justman, D., Creason, C.G., Sabbatino, M., Rocco, N., DiGuilio, J., Rose, K., Thomas, R.B., Ree and Coal Open Geodatabase Geocube Collection, 2018-09-25, <https://edx.netl.doe.gov/dataset/ree-and-coal-open-geodatabase-geocube-collection>, DOI: 10.18141/1475034

Appendix J – DE-FE-0002364 Resource Sampling Basins of interest and planned resource sampling

Basin Study Area	CORE-CM (DE-FOA-0002364) Planned Resource Sampling
AOI 1- Appalachian Basin, North	AMD sludge, clay, tailings, metal slags, coarse coal refuse, coal underclays
AOI 2-Appalachian Basin, Central	Coal, fly ash, bed ash, landfill bed ash, landfill fly ash, clays, ironstones, limestones, sandstones, and volcanics, produced water, mine refuse and waste streams
AOI 3-Appalachian Basin, South	Coal, roof rock, AMD/sludge, coal waste, coal ash
AOI 4-San Juan River-Raton Basin	Coal, coal ash, shale, beach placer sandstone, heavy mineral sands, carbonatites, clinker, volcanic ash beds, humate deposits, black shales, uranium deposits, produced water, AMD
AOI 5-Illinois Basin	Coal, coal floor seam, coal roof seam, shale, coal wastes and slurries, AMD, coal ash, ash ponds
AOI 6-Williston Basin	Coal, shale, lignite mining waste, combustion by-products, ash, roof, floor, tonsteins
AOI 7-Powder River Basin	Coal seams and coal related sediments, coal ash, alkaline complex material, carbonatite dikes and veins
AOI 8-Uinta Basin	Coal seams and adjacent sedimentary strata, mine waste, ash piles
AOI 9-Green & Wind River	Coal seams and coal related sediments, coal ash, coal refuse, AMD, trona deposits
AOI 10-Gulf Coast	Coal, tonstein, coal ash, clays, coal waste streams, coal ash, ash ponds, produced water
AOI 11-Alaska	Coal and coal related strata, coal waste
AOI 12-Cherokee-Forest City	coal, coal ash, refuse, AMD, lead-zinc tailing piles, cement plant streams, produced water, helium, coal-bed methane, low-alumina limestone
AOI 13- Mid-Appalachian	Coal, shale coal refuse, coal ash, AMD
