Questions & Answers (Q&A) 11 – 12
7/11/14

Question #11: What are the vehicle qualifications such as Commercial big rig or noncommercial?

Answer #11: Appropriate requirements for the mechanical and electrical environments for heavy vehicles will have to be determined as part of the first phase of the project.

Question #12: Whose responsibility is it to install the equipment and who is authorized to install it?

Answer #12: Identifying installers is not part of this project. Eventually, installation guidelines will have to be established as part of the overall system requirements (with corresponding certification requirements) since installation practices will effect system performance.
