ANNOUNCEMENT

CALL FOR LOCALLY LED DEVELOPMENT CONCEPTS ON MALARIA ELIMINATION IN SENEGAL
ADDENDUM #24 TO
LOCALLY LED DEVELOPMENT ANNUAL PROGRAM STATEMENT
APS No.: 7200AA19APS00007

APPLICANTS - PLEASE NOTE: This is an addendum to an existing announcement. All interested organizations must carefully review both this addendum AND the full announcement, which can be found here**:** https://www.grants.gov/search-results-detail/314757
Important information contained in the full worldwide announcement is not repeated in this specific addendum.

This program is authorized in accordance with the Foreign Assistance Act of 1961, as amended.

Through this Addendum to the Locally Led Development Annual Program Statement (APS) No. 7200AA19APS00007 USAID/Senegal is making a special call to local actors for the submission of concepts focused on malaria elimination in Senegal. The deadline for concept submissions is **May 6, 2024**.

The goal of the Malaria Elimination Activity is to advance Senegal toward its goal of malaria elimination by 2030. In the first year, the Malaria Elimination Activity will target the country's northern zone, with the regions of Matam, St-Louis and Louga, which have malaria annual incidence levels below the elimination threshold (below 5 per thousand). The table below shows data for these regions in 2021:

Regions	**Population**	**Malaria cases**	**Incidence (‰)**
Louga	1,091,269	1,899	1.74
Matam	368,601	521	1.41
St-Louis	1,120,586	872	0.77

Additional areas may be added in Year 2 and 3 of implementation.

The anticipated mechanism is one fixed amount “renewal” award for specific programmatic activities and milestones. Eligibility is limited to local organizations in Sénégal per the eligibility criteria requirements and definition in Section 3 of this addendum. The anticipated overall

funding for the initial three-year Malaria Elimination Activity is $3 million. Should USAID pursue a renewal award to extend the award beyond three years, it will conduct a programmatic review in the third year. Following the programmatic review, USAID will request a renewal application including a technical and cost application. The total period of performance covered by both the initial award period and the renewal award period may be up to a maximum of five years.

The Locally Led Development APS (link to French version: https://www.grants.gov/search-results-detail/314757 and this addendum (French version attached) have been translated into French for the convenience of local partners**.** If there are discrepancies between the English language version and the French version of either document, the English language version will control.

Unless otherwise stated herein, all terms and conditions of the Locally Led Development APS apply (https://www.grants.gov/search-results-detail/314757).

Section 1: Background

Malaria is a major public health problem in Senegal. It is an endemic disease in most of the country, with a recurrence during the rainy season. Senegal has made the fight against malaria a national priority. The Ministry of Health and Social Action (MSAS) through the National Health Development Plan (PNDSS), has reaffirmed this priority and reinforced the National Malaria Control Program in its determination to achieve elimination in Senegal by 2030.

In line with the global technical strategy of the World Health Organization (WHO), the National Malaria Control Program (PNLP) strategic plan 2021-2025 intends to:

- Interrupt malaria transmission in at least 80% of districts that were eligible for malaria pre-elimination in 2019;
- Reduce malaria morbidity by at least 75% compared with 2019; and
- Reduce malaria mortality by at least 75% compared with 2019.

Since 2009, with the support of technical and financial partners (PTF), the National Malaria Control Program (PNLP) has developed strategies aimed at interrupting malaria transmission. These activities were in a pilot phase in certain districts, notably Richard Toll. Starting in 2016, the National Strategic Plan (NSP) 2016 - 2020 in its strategic objectives initiated the roadmap towards the elimination of malaria in Senegal. The aim was to reduce malaria morbidity and mortality by at least 75% compared with 2015, and to achieve pre-elimination of malaria in the country's northern zone.

The evaluation of the NSP revealed that, in general, indicators have evolved favorably on a national scale, with parasite prevalence reduction from 3% to 0.3% between 2013 and 2019; malaria-related mortality by 51% between 2015 and 2019; and a reduction in malaria proportional morbidity has also decreased by 37.6% for the same period. In 2020, 51 districts out of 79 have an annual incidence below 5‰ (Senegal's pre-elimination threshold) covering a population of 6,772,028.

In the northern areas, the regions of Saint-Louis and Louga were able to reach the pre-elimination threshold with an administrative incidence of 0.8 ‰ and 2 ‰ respectively, while the Matam region had recorded 9.1 ‰, but with disparity between districts. The Matam and Thilogne health districts had 1.8 ‰ and 1.3 ‰ respectively. With these successes, the PNLP, in the NSP 2021-2025, plans to achieve interruption of malaria transmission in at least 80% of the districts that were eligible for pre-elimination in 2019.

In the NSP 2021 - 2025, the PNLP has reaffirmed its commitment to achieving elimination by 2030. To consolidate this elimination objective, the PNLP,, in collaboration with its technical and financial partners and all those involved in the fight against malaria, has developed an acceleration plan towards elimination 2023-2025. According to the local stratification adopted by Senegal for operational reasons, the ranking of regions according to incidence in 2021 is as follows:

Categories		**Region**	**Incidence 2021 (per 1000)**
Category I	**Incidence < 5 ‰**	Saint Louis	0.9
		Fatick	1.5
		Louga	1.9
		Thiès	2.8
		Dakar	4.9
Category II	**5‰ < Incidence < 15 ‰**	Kaffrine	5.7
		Matam	7.2
		Ziguinchor	10.3
		Kaolack	10.9
Category III	**15‰ < Incidence < 25 ‰**	Diourbel	19.4
Category IV	**Incidence > 25 ‰**	Sédhiou	29.8
		Tambacounda	149.7
		Kolda	214.5
		Kédougou	536.5

Section 2: Objectives

The goal of the Malaria Elimination Activity is to advance Senegal toward its goal of malaria elimination by 2030. Specific objectives of this activity include the following:

- Ensure detection, treatment, and investigation of malaria cases in accordance with elimination requirements in public and private health facilities and community sites
- Ensure integrated surveillance and response (clinical, biological, entomological and environmental) in eligible districts
- Ensure community follow-up of elimination activities in target districts
- Support Regional Health Directorates (DRS) and targeted districts in the ongoing capacity strengthening of players in malaria elimination activities
- Strengthen the regional malaria control coordination to increase domestic funding for malaria elimination
- Assist Regional Health Directorates and districts to develop relevant approaches to strengthening the health system, enabling the incorporation of malaria case investigation activities into the routine package of the healthcare system.

Building on the approaches suggested above, applicants are encouraged to suggest other creative approaches that are important to local stakeholders in support of the objectives.

USAID would like to fund a recipient who will coordinate with other partners (USG and non-USG), including LuxDev, and build upon investments made by USAID. The recipient is expected to work closely with the Ministry of Health, with the regional health directions and health districts.

Local actors are not required to propose a fully designed activity for this addendum -- a concept is requested that suggests a process to identify and then act on solutions from the local context and is fully supported by the Locally Led Development APS.

Section 3: Eligibility Criteria

USAID welcomes concepts from a wide variety of local actors who bring an understanding of the development challenges facing their communities, country, or regions or who demonstrate a way to determine local priorities in their approach. Eligible applicants:

1. Must be local entities in Senegal. When determining if an entity is a “local entity” for the purposes of this APS, USAID will consider:
    a. Whether the entity is legally organized under the laws of Senegal;
    b. Whether the entity has its principal place of business or operations in Senegal;

c. Whether the entity is majority owned and controlled by individuals who are citizens or lawful permanent residents of Senegal; and
d. Whether the entity is managed by a governing body, the majority of whom are citizens or lawful permanent residents of Senegal.

2. Cannot have received more than $5 million in direct funding (as a prime awardee) from USAID in the previous five fiscal years.
3. Cannot be a U.S.-based organization. U.S.-based organizations are not eligible as prime awardees under this APS.

Note: For purposes of this definition, "majority-owned' and "-managed by" include, without limitation, beneficiary interests and the power, either directly or indirectly, whether exercised or exercisable, to control the election, appointment, or tenure of the organization's managers or a majority of the organization's governing body by any means.

USAID understands that individual applicants may not have every skill and capacity to achieve the full range of objectives alone. Teaming arrangements and partnerships are therefore encouraged with one primary applicant and one or more sub-applicants to ensure successful performance.

Section 4: Locally Led Development Approaches

Applicants are encouraged to incorporate one or more of the following approaches in their proposed activities, or propose a different approach(es) that reflects the Applicant's own locally led development learning goals.

1. **Mechanisms** that improve the flow of information among the applicant and its own constituents, partners, and USAID to strengthen accountability **to** local constituents for achieving and sustaining results.
2. **Participatory analytical approaches**, which may provide a better understanding of the complex environments in which the program will operate.
3. **Participatory decision-making**, which includes locally led priority-setting, collaborative design, and other means of shifting decision-making power and control to local actors, including people who have traditionally been marginalized, such as women, youth, religious and ethnic minorities, and gender diverse people, ensuring inclusive local leadership.
4. **Mobilizing local resources**, which includes local philanthropy; partnerships that leverage resources from the local private sector, faith-based organizations, government, civil society, and academia; and other sources of local skills and finances to replace those of international donors.

5. **Strengthening local networks**, which may include understanding and supporting existing and emerging networks of local actors, supporting the work of local organizations, market facilitation, collective action, collective impact, and other demand-driven approaches to connecting local needs with local resources.
6. **Locally/community-led approaches to design, monitoring, evaluation, and learning** that prioritize local/community definitions of success and enhance local actors' role in managing and using data and learning related to development solutions, the development process, and the sustainability of results achieved.
7. **Strengthening local capacity**, which includes strengthening the role of local institutions and actors to sustain development outcomes with an eye toward ending the need for foreign assistance.
8. **Adapting and problem solving in non-permissive environments**, where uncertainty, instability, inaccessibility, or insecurity constrain the ability to operate safely and effectively. This may include environments such as those affected by natural disasters, inaccessible physical geographies, active conflict, corruption, closing political spaces, criminality, and pandemics, where local approaches are essential for long-term resilience and sustainability.

For further information on USAID's Locally Led Development Initiatives and locally led approaches, please visit the Local, Faith, and Transformative Partnerships Hub website.

Section 5: Budget Considerations

As stated in its Local Capacity Strengthening Policy, USAID must consider the potentially disruptive role that foreign assistance plays in local systems and support these systems to eventually move beyond the need for international donor funding. It is not USAID's intention to temporarily flood a local organization with funding, artificially expanding its size beyond what can reasonably be supported through local resources after an award ends. As part of concept submissions, Applicants must propose a budget that reasonably reflects their existing resources and capacity to grow in a sustainable way (sometimes referred to as "absorptive capacity").

Section 6: Merit Review Criteria

Concepts meeting the eligibility criteria (see Section 3, Eligibility Criteria) will be evaluated based on the merit review criteria below:

A. Locally Led Development

The Applicant demonstrates a strong understanding of the local context and priorities and is transparent, accountable, and responsive to the people they serve. The proposed approach and any teaming arrangements effectively shift priority-setting and decision-making power to

diverse local actors, including people who have traditionally been marginalized, such as women, youth, religious and ethnic minorities, and gender diverse people. The Applicant demonstrates a strong commitment to learning that advances the practice of locally led development for themselves, their constituents, and the wider development community. USAID's investment in this work is expected to strengthen the capacity of local organizations, networks, and/or communities to deliver results beyond the end of the funded activities.

In addition, the following evaluation criteria specific to USAID/Senegal will be used:

B. Technical Approach
How well the concept paper proposes strong and sound approaches to achieve the objectives and results described in Section 2: Objectives.

C. Organizational Capacity
How well the Applicant (and its sub-awardees if applicable) demonstrate the institutional capacity to achieve the expected outcomes detailed in the Technical Approach.

While merit criteria are paramount, cost considerations may also be a factor for award. The U.S. Government is not obligated to make an award on the basis of lowest proposed cost or to the Applicant with the highest merit evaluation score.

Section 7: Submission Instructions

Concepts are to be sent to USAID**/**Senegal at **SenegalHealthAPS@usaid.gov** . Concepts must be submitted by **May 6, 2024** to be considered.

Concepts must be submitted as a concept paper not exceeding five pages in total length (excluding the summary information).

Concepts must be submitted in English or in French**.**

Applicants must provide the following information in concept submissions:

A. SUMMARY INFORMATION (not included in five pages)

1. Name and contact information of the Applicant
2. Organization type and country of legal registration
3. Statement that the Applicant is a "local entity" per the definition in Section 3, Eligibility Criteria.

4. Statement that the Applicant has not received more than $5 million in funding from USAID in the previous five fiscal years as a prime recipient.
5. Title of proposed activity
6. Location of proposed activity
7. Name, contact information, and country of legal registration for other partner organizations collaborating on concept (if any)
8. Overall objective and locally led development approach of activity (2-3 sentences)
9. Amount of funding requested from USAID $ _____
10. Explanation of how the requested funding amount reasonably reflects the organization's(s') existing resources and capacity to grow in a sustainable way. (Consider: your organizations' current budget, existing human resources, whether/how you'd like your organization(s) to grow over the next several years, and what local resources are available to support your growth after USAID funding ends). (2-3 sentences each for the prime organization and any sub-partners.)

B. NARRATIVE DESCRIPTION

Successful narrative descriptions will include a clear and logical overview of the applicant's proposed technical approach. They will include discussion of the components below. Please note that each component aligns with a specific merit review criterion in Section 6, Merit Review Criteria.

B.1. Locally Led Development (One Page):

- What are the local challenge(s) that this concept addresses? How do local people experience the challenge(s), and what is important to them? How do you know?
- How will you enable diverse local actors, including marginalized people and any partners, to lead priority-setting and decision-making?
- What is your approach to learning? How will you share what you learn? With whom?
- How will you strengthen the capacity of local organizations, networks, and/or communities to deliver results beyond the end of the funded activities?

B.2. Technical Approach (Three pages):

- What strategies and activities do you propose to achieve the objectives outlined in section two?
- How will your approach improve the malaria situation in the targeted districts and accelerate the districts and regions towards elimination?
- How does the proposed technical approach support or relate to the National Malaria Control Program Strategic Plan and the *Plan National de Développement Sanitaire et*

Social (PNDSS) 2019-2028 and the National Malaria Control Program's National Strategic Plan 2021-2025 and the Acceleration Plan for Malaria Elimination?
- What is your approach to monitoring and evaluating the project?

B.3. Organizational Capacity (One Page):
- Describe the organizational capacity – technical, managerial, financial, etc. – the organization (and any collaborating organizations, if any) has to carry out the proposed activities in the three focus regions of Louga, Matam, and Saint-Louis.
- Briefly describe programs or projects of similar size or scope that the organization (and any collaborating organizations, if any) has implemented.
- If proposing a partnership, describe and define the role of other entities/organizations.

Section 8: Selection Process and Co-Creation

USAID/Senegal is responsible for the selection process and management of any awards issued under this Addendum. USAID/Senegal will confirm receipt of the concept within one week of submission.

USAID/Senegal will use the following selection process:

Step 1 - Concept review: All merit review criteria are weighted equally in each phase of the selection process. USAID/Senegal will first review each concept submission and provide a pass/fail rating. Concepts will receive a pass rating if they adequately address the merit review criteria and a fail rating if they do not adequately address the merit review criteria. USAID/Senegal will then review and rate the "passing" concepts with an adjectival rating system (exceptional, very good, satisfactory, marginal, and unsatisfactory) to select the applicant(s) for the co-creation process.

Prior to award, USAID/Senegal and the Applicant will have significant interaction in-person, via phone, and/or electronically. If selected to co-create an activity with USAID/Senegal, the Applicant will be contacted by an Agreement Officer (AO) from USAID/Senegal and given instructions for the co-creation period and pre-award requirements. Applicants not selected to advance will also be notified.

Step 2 - Pre-award Assessment: USAID/Senegal will work with the selected applicants to conduct an Organizational Capacity Assessment (OCA) and an eligibility checklist after selection.

Step 3 - Co-creation: USAID/Senegal may decide to invite more than one Applicant to enter a period of individual (one-on-one) or multi-stakeholder co-creation. In a multi-stakeholder co-

creation exercise, they will collaborate on and refine approach(es) with one another and USAID for award consideration. USAID/Senegal anticipates that the co-creation process may begin on/about **July 22, 2024** and last approximately two weeks.

Step 4 - Award: Depending on the results of the co-creation process and the OCA, USAID/Senegal may issue Request(s) for Application to the entity submitting the accepted concept, or decide to enter directly into negotiations and award development.

Section 9, Federal Award Information of the Locally Led Development APS includes the requirements that an applicant must meet if they are requested to co-create an activity and receive an award from USAID. Please note that **these requirements do not have to be met in order to submit a concept under the APS.**

Section 9: Sharing of Concepts

If USAID identifies opportunities to strengthen or fund a concept or application by connecting it with other USAID mechanisms, other potential funders, and/or external partners, USAID may make that concept or application available internally or externally for up to one year from receipt of the concept for appropriate consideration.

Section 10: Questions and Further Assistance

Questions regarding this addendum may be directed to SenegalHealthAPS@usaid.gov no later than **March 25, 2024**. USAID/Senegal intends to hold a pre-concept submission conference in French on **March 28, 2024** at 10:00 am local time. The conference will be held on the Google Meet platform at this link: https://meet.google.com/eym-ezss-hyw. After a presentation of the funding opportunity and application process, including the concept note submission instructions and a complete description of a final award document and all of its elements, prospective Applicants may ask questions via the chat function on Google Meet. All questions must be submitted in writing via the chat function. In addition to oral responses provided during the conference, USAID will respond to all questions in writing. Responses will be posted on the Grants.gov web page for the Locally Led Development APS.

Before submitting a concept, applicants are highly encouraged to read through USAID's resources for organizations seeking funding and partnership opportunities, including How to Work with USAID and workwithusaid.org. The first link contains various “how to” modules with which your organization should familiarize itself. We would like to draw your attention to Module 8 and the Quick Reference Resources PDF which includes multiple links that address compliance as it relates to applicable laws, regulations and award conditions. Additionally, USAID’s Automated Directives System Chapters 303 (Grants and Cooperative Agreements to

Non-Governmental Organizations), 310 (Source and Nationality Requirements for Procurement of Commodities and Services Financed by USAID), 320 (Branding and Marking) and ADS 303mat (Standard Provisions for Fixed Amount Awards to Nongovernmental Organizations) are key references that would guide implementation should your organization become a USAID recipient (https://www.usaid.gov/about-us/agency-policy/series-300).

For additional information on the Locally Led Development APS objectives and requirements, please refer to the Locally Led Development APS, which can be found at the following website: https://www.grants.gov/search-results-detail/314757.
