Notice of availability of grants for fiscal year (FY) 2015 and request for applications (RFA)

Funding Opportunity Number: F15AS00047

Catalog of Federal Domestic Assistance (CFDA) Number: 15.626

Background:

The Federal Aid in Wildlife Restoration Act of 1937, 50 Stat. 917 as amended; 16 U.S.C. 669-669b, 669-669k, popularly known as the Pittman-Robertson Wildlife Restoration Act, was approved by Congress on September 2, 1937, and began functioning July 1, 1938. The purpose of this Act was to provide funding for the selection, restoration, rehabilitation, and improvement of wildlife habitat, wildlife management research, and the distribution of information produced by the projects. The Act was amended on October 23, 1970, to include funding for hunter safety programs and the development or the operation and maintenance of firearm and archery ranges. Congress saw a need for additional funds to support hunter education and shooting range development, if States were to meet the challenges of the 21st century. With broad support from sportsmen's organizations, Congress passed the Wildlife and Sport Fish Restoration Programs Improvement Act of 2000 and as part of this Act created the Firearm and Bowhunter Education and Safety Program (Section 10) to address these concerns. The passage of Section 10 set aside \$7.5 million in 2001 and 2002 and \$8 million thereafter to "enhance" existing hunter education or shooting range programs.

Additional information about Section 10 is on the internet at <http://wsfrprograms.fws.gov/Subpages/GrantPrograms/HunterEd/HE.htm>.

I. Funding Opportunity Description

States may use the funds apportioned to them under Section 10 to:

1. Enhance programs for hunter education, hunter development, and firearm and archery safety. Hunter-development programs introduce individuals to and recruit them to take part in hunting, bow hunting, target shooting, or archery.
2. Enhance interstate coordination of hunter-education and firearm- and archery-range programs.
3. Enhance programs for education, safety, or development of bow hunters and archers.
4. Enhance construction and development of firearm and archery ranges.
5. Update safety features of firearm and archery ranges.

Section 10 funds supplement, and do not replace Section 4(c) Hunter Education funds, thereby enhancing a State's hunter education and safety program. The following are some examples of eligible activities:

1. Training participants in the safe and proficient use of hunting equipment, hunter responsibility, principles of wildlife management, wildlife identification, and firearms handling;
2. Constructing facilities, such as classrooms, shooting ranges, and other support facilities needed for instruction purposes;
3. Gathering information to help develop, implement, and evaluate hunter education and safety grants;
4. Providing training in trapper education as it relates to safety, responsibility, humane trapping methods, and avoidance of nontarget species, and development of trapping skills; and
5. Communicating information about WSFR grant funded hunter education and recreational shooting sports activities.

II. Award Information:

The final Section 10 apportionments are on the web at http://wsfrprograms.fws.gov/Subpages/GrantPrograms/WR/WR_Funding.htm.

III. Eligibility Information:

A. Eligible Applicants:

Participation is limited to State, Commonwealth, or territorial agencies with lead management responsibility for fish and wildlife resources in the United States of America. States, Commonwealths, and territories (State(s)) must pass laws (assent legislation) for the conservation of fish and wildlife. The law(s) must include a prohibition against the diversion of license fees paid by hunters for purposes other than the administration of the fish and wildlife agency.

B. Formula and Matching Requirements:

One-half of the 11 percent excise tax on bows, arrows, and archery equipment and 10 percent excise tax on handguns, pistols, and revolvers make up the funding for the hunter education and safety program. The other one-half of the excise tax is for wildlife restoration purposes including the 11 percent excise tax on firearms and ammo.

Below is the explanation of how the Section 10 apportionment is determined for States.

1. It is a formula-based apportionment;
2. It is based on State population compared to the total U.S. population using the most recent census figures;
3. No State may receive more than 3 percent or less than 1 percent of the total Hunter Education funds apportioned;
4. The Commonwealths of Puerto Rico and the Northern Mariana Islands and the territories of American Samoa, Guam, and the U.S. Virgin Islands, receive up to one-sixth of 1 percent of the total apportionment; and
5. The program is a cost-reimbursement program, i.e., the State covers the full amount of an approved project then applies for reimbursement from WSFR and may be reimbursed up to 75 percent of project costs through the program. The State must provide at least 25 percent of the project costs from a non-Federal source. The non-Federal match for the Commonwealths of Puerto Rico and the Northern Mariana Islands, and the territories of American Samoa, Guam, and the U.S. Virgin Islands must not exceed 25 percent and may be waived at the discretion of the Regional Director. According to 48 U.S.C. 1469(a), the Regional Director must waive the first \$200,000 of match for each project from the Commonwealth of the Northern Mariana Islands and the territories of Guam, the U.S. Virgin Islands, and American Samoa. The non-Federal share may come from license fees paid by hunters. Matching and cost-sharing requirements are discussed in 50 CFR 80, 43 CFR 12.64 and 43 CFR 12.923. In addition, 43 CFR 12.62 identifies Federal cost principles for determining allowable costs.

C. Other

After the Service obligates a State's current fiscal year Section 4(c) Hunter Education and Safety apportionment on eligible hunter education activities, a State may request the Service to obligate its Section 10 Hunter Education funds on any eligible Wildlife Restoration or hunter education activities. Prior to the Service obligating the full Section 4(c) apportionment, a State may only request the Service to obligate Section 10 funds on eligible hunter education activities.

Section 10 Hunter Education funds are one-year funds and any funds not obligated in the current year's apportionment are reappropriated to those States where the Service has fully obligated the States' Section 4(c) funds on eligible hunter education and safety activities. The funds are reappropriated in the following year under section 3(a) of the Wildlife Restoration Act as additional regular Wildlife Restoration funds. Although only State agencies may apply for and receive grants under this program, the program encourages partnering with local governments, Native American governments and non-governmental organizations (NGOs), and educational institutions.
