

ANNEX C. PERFORMANCE MONITORING AND PLAN INDICATORS

The applicant's M&E plan must include the indicators listed below. The applicant may propose additional or alternative indicators that will best capture the project's performance and indicators that will help track the shift in performance from output to outcome.

ILLUSTRATIVE INDICATORS

The following list of indicators at minimum must be included in the awardee's Monitoring and Evaluation (M&E) Plan. Additional indicators will be discussed and included during the work planning activity.

USG Indicators

Quality of Care:

- HL-1b TA provided for improving quality of health services

Maternal Health

- HL.6.2-1 Number of women giving birth who received uterotonics in the third stage of labor (or immediately after birth) through USG-supported programs
- HL.9-3 Number of pregnant women reached with nutrition interventions through USG-supported programs

Newborn Health

- HL.6.3-1 Number of newborns not breathing at birth who were resuscitated in USG-supported programs

Family Planning

- HL.7.1-1 Couple Years protection in USG supported programs
- HL.7.1-2 Percent of USG-assisted service delivery sites providing family planning (FP) counseling and/or services
- HL.7.1-3 Average stock out rate of contraceptive commodities at Family Planning (FP) service delivery points
- HL.7.2-2 Number of USG-assisted community health workers (CHWs) providing Family Planning (FP) information, referrals, and/or services during the year
- HL.7.2-1 Percent of audience who recall hearing or seeing a specific USG-supported FP/RH message

Child Health/Nutrition

- HL.9-1 Number of children under five (0-59 months) reached by USG-supported nutrition programs
- HL.9-2 Number of children under two (0-23 months) reached with community-level nutrition interventions through USG-supported programs
- HL.9-4 Number of individuals receiving nutrition-related professional training through USG-supported programs

- HL.6.6-1 Number of cases of child diarrhea treated in USG-assisted programs

Gender/GBV

- GNDR-4 Percentage of participants reporting increased agreement with the concept that males and females should have equal access to social, economic, and political resources and opportunities
- GNDR-6 Number of people reached by a USG funded intervention providing GBV services (e.g., health, legal, psychosocial counseling, shelters, hotlines, other)
- GNDR-8 Number of persons trained with USG assistance to advance outcomes consistent with gender equality or female empowerment through their roles in public or private sector institutions or organizations

Custom Indicators:

- Number of community -level workers trained (in case management)
- Proportion of reported malaria cases that are confirmed with a diagnostic test at public sector health facilities
- Proportion of malaria cases (presumed and confirmed) that received first line antimalarial treatment at public sector health facilities
- Proportion of pregnant women who received at least two doses of DOT Intermittent Preventive Treatment (IPT) for malaria during Antenatal Care (ANC) visits
- Proportion of pregnant women who received at least three doses of DOT Intermittent Preventive Treatment (IPT) for malaria during Antenatal Care (ANC) visits
- Proportion of targeted health facilities that receive supervisory visits
- Percent of patients with suspected malaria receiving a diagnostic test
- Percent of confirmed malaria cases receiving effective malaria treatment according to standard national protocols
