

**USAID**  
FROM THE AMERICAN PEOPLE

**Issuance Date:** draft RFA: on/about October 22, 2013

**Closing Date:** on/about March XX, 2014

**Closing Time:** 11:59 a.m. (Eastern Standard Time)

**CFDA Number:**

**Subject:** Request for Applications for Title II Development Food Assistance Programs for Burundi, Madagascar and Malawi

**Title:** Fiscal Year 2014 Title II Development Food Assistance Programs for Burundi, Madagascar and Malawi

---

The U. S. Agency for International Development (USAID) Office of Food for Peace (FFP) is seeking applications (proposals for funding) for Title II development food assistance programs in Burundi, Madagascar and Malawi. Private voluntary organizations or cooperatives that are, to the extent practicable, registered with the USAID Administrator, may apply. This includes U.S. and non U.S. nonprofit organizations. Intergovernmental organizations are also eligible to apply. Please refer to the Program Description for a complete description.

**Subject to the availability of funds and commodities**, under this Request for Applications (RFA), FFP plans to enter into several awards as described in detail in the Country Specific Information (CSI) for each country.

USAID reserves the right to adjust the number of awards or funding levels and sources of funding. For example, Community Development Funds (CDF) may be made available for select programs, and if so, CDF may be used in lieu of monetization. Successful applicants will be notified of any changes or updates, accordingly.

**Applications are submitted at the risk of the applicant, and all preparation and submission costs are at the applicant's expense.**

Issuance of this RFA for Burundi, Madagascar and Malawi does not constitute an award commitment on the part of USAID, nor does it commit USAID to pay for costs incurred in the preparation and submission of an application. Final awards cannot be made until funds have been fully appropriated, apportioned, allocated, and committed. While it is anticipated that these procedures will be successfully completed, potential applicants are hereby notified of these requirements and conditions for award.

For the purposes of this program, this RFA is being issued and consists of this cover letter and the following:

- Section I – Funding Opportunity Description
- Section II – Award Information
- Section III – Eligibility Information
- Section IV – Submission and Application Information
- Section V – Application Review Information
- Section VI – Award and Administration Information

- Section VII – Agency Contacts
- Section VIII – Other Information
- Annex I – Definitions
- Annex II – Gender: Title II Development Food Assistance Programs
- Annex III – FFP Initial Environmental Examination (IEE)
- Annex IV – Selected Templates and Examples

To be eligible for the award, the applicant must provide all required information in its application, including the requirements found in any attachments to this [www.grants.gov](http://www.grants.gov) opportunity. Any future amendments to this RFA can be downloaded from [www.grants.gov](http://www.grants.gov). This information may also be posted on the FFP website, but it is the responsibility of the applicant to ensure that she/he has the most up-to-date versions of all of the documents related to this RFA.

Applicants should retain for their records one copy of all enclosures that accompany their electronic application.

Pursuant to 22 C.F.R. 226.81, it is USAID policy not to award profit under assistance instruments. However, all reasonable, allocable, and allowable expenses, both direct and indirect, which are related to the agreement program and are in accordance with applicable cost standards (22 C.F.R. 226, 2 C.F.R. 230 (formerly known as OMB Circular A-122)) may be paid under the agreement.

USAID may (a) reject any or all applications, (b) accept other than the lowest cost application, or (c) accept more than one application (see Section V - Application Review Information). USAID intends to award predominantly cooperative agreements, but reserves the right to award grants. USAID may waive informalities and minor irregularities in applications received.

In the event of any inconsistency between this RFA and the referenced documents in the RFA, or any inconsistency in the sections comprising this RFA, note that the RFA shall take precedence over any referenced documents, except statute, regulations and country specific information, and the inconsistency shall be resolved by the following order of precedence:

- (1) Country Specific Information
- (2) Section V – Application Review Information
- (3) Section IV – Submission and Application Information
- (4) Section I – Funding Opportunity Description
- (5) Cover Letter

Thank you for your interest in USAID programs.

Sincerely,

/S/

Dina Esposito  
Director, Office of Food for Peace

## **SECTION I – FUNDING OPPORTUNITY DESCRIPTION**

### **1. General Description**

The Office of Food for Peace (FFP), in USAID's Bureau for Democracy, Conflict, and Humanitarian Assistance (DCHA), is the U.S. Government leader in international food assistance. Through FFP, USAID provides multi year development food assistance to reduce food insecurity among vulnerable populations by addressing its underlying causes. Through FFP, USAID also provides emergency food assistance to address needs arising from natural disasters, such as floods or droughts, and complex emergencies often characterized by insecurity and population displacement. More information on USAID food assistance programs can be found on the [USAID website](#).

This Request for Applications (RFA) for Burundi, Madagascar, and Malawi provides information on funding opportunities for multi-year development (nonemergency) food assistance programs. Nonemergency programs are mandated in the Food for Peace Act, which authorizes Title II food aid. The programs are designed to improve food access and incomes through agriculture and other livelihoods initiatives; combat undernutrition; especially for children under two and pregnant and lactating women; and mitigate disaster impact through early warning and community preparedness activities. They are increasingly associated with USAID's efforts to promote resilience among populations facing chronic poverty and recurrent crises, and the Office of Food for Peace (FFP) continues to play an important role in the development and implementation of USAID's new resilience policy. Note that assistance made available pursuant to this RFA may be used to meet emergency/exceptional circumstances as provided in accordance with the terms of those awards and 22 C.F. R. 211.5(o).

The range of activities may include, but is not limited to, sustainable agricultural production and marketing, natural resource management, non-agricultural income generation, integrated health and family planning programming, nutrition, water and sanitation, education, disaster risk reduction, vulnerable group feeding, and social safety nets. Gender, governance and environmental safeguards should be cross-cutting themes integrated throughout the range of selected activities.

For all programs, applicants must demonstrate that (a) proposed distribution and monetization food aid commodity levels will not result in disincentives to or interference with local agricultural production or marketing and will not disrupt commercial markets and (b) importation of agricultural commodities and the use of local currencies generated under the proposed award will not have a disruptive impact on the farmers or the local economy of the recipient country.

More specific information on the objectives, activities, and/or geographic locations targeted within the countries covered by this RFA may be found in the country specific information posted on the [Country Fact Sheets](#) page of the FFP website. It is essential that applicants review this country specific information carefully because details contained in the country specific information take precedence over the generalities contained in this RFA.

## **2. Authorizing Legislation**

The Food for Peace Act authorizes the USAID Administrator to establish programs to provide agricultural commodities to foreign countries on behalf of the people of the United States and to provide assistance to address famine and food crises; combat malnutrition, especially in children and mothers; carry out activities that attempt to alleviate the causes of hunger, mortality and morbidity; promote economic and community development; promote food security and support sound environmental practices; carry out feeding programs; and promote economic and nutritional security by increasing educational, training, and other productive activities.

## **3. Program Eligibility Requirements**

To be eligible for assistance under this RFA for Burundi, Madagascar, Malawi, the application must include Title II food aid resources, specifically commodities, for direct distribution. Given this eligibility requirement, FFP will not consider applications for 100 percent monetization and/or those without direct distribution activities, unless otherwise stated in the country specific information. Direct distribution activities should be accompanied by complementary activities that increase availability, access, and utilization/consumption of food and reduce vulnerability to food insecurity.

## **4. Award Administration**

Awards will be made and administered in accordance with the Food for Peace Act, U.S. Government regulations and [USAID Standard Provisions](#), which are available on the USAID website. The award will be administered under 22 C.F.R. 211, 22 C.F.R. 216, 22 C.F.R. 226, OMB Circulars, USAID Standard Provisions, and FFP information bulletins. Notwithstanding the foregoing, because intergovernmental organizations are subject to different requirements, USAID reserves the right to make awards to such organizations on different terms and conditions than those made to private voluntary organizations and cooperatives.

## **SECTION II – AWARD INFORMATION**

### **1. Estimate of Funds Available**

Subject to the availability of funds and commodities, under this RFA, FFP plans to enter into awards for Burundi, Madagascar and Malawi as specified in the country specific information for each country. The country specific information has been posted at [Country Fact Sheets](#) on the FFP website.

USAID reserves the right to adjust the number of awards or funding levels and sources of funding. For example, Community Development Funds (CDF) may be made available for select programs, and if so, CDF may be used in lieu of monetization. Successful applicants will be notified of any changes or updates, accordingly.

A separate RFA will result for any additional countries.

## **2. Anticipated Start Date and Performance Period**

A start date in July 2014 is anticipated. Typically, the award will be issued for a performance period of five years, unless otherwise noted in the country-specific information.

## **3. Assistance Awards**

USAID may make an award resulting from this RFA to the responsible applicant(s) whose application(s) conforming to this RFA offer(s) the greatest value. USAID may (a) reject any or all applications, (b) accept other than the lowest cost application, or (c) accept more than one application. USAID intends to award predominantly cooperative agreements, but reserves the right to award grants. USAID may waive informalities and minor irregularities in applications received.

USAID may award the resulting assistance award(s) on the basis of initial applications received, without discussions or negotiations. Therefore, each initial application should contain the applicant's best terms from a technical and cost standpoint. As part of its evaluation process, however, USAID may elect to discuss technical, cost or other pre-award issues with one or more applicants. Alternatively, USAID may proceed with award selection based on its evaluation of initial applications received and/or commence negotiations solely with one applicant.

## **SECTION III – ELIGIBILITY INFORMATION**

### **1. Eligibility Requirements**

To be considered for an award, the applicant must be a private voluntary organization or cooperative that is, to the extent practicable, registered with the USAID Administrator, or an intergovernmental organization, such as the World Food Program. This includes U.S. and non-U.S. nonprofit organizations as defined in Section 402 of the Food for Peace Act and as described in the [Private Voluntary Organization Conditions of Registration](#) on the USAID website.

Consortia of private voluntary organizations and/or cooperatives are neither encouraged nor discouraged from submitting applications. In the case of a consortium, the actual applicant must be the consortium lead and should identify any other members of the consortia or individuals tied to the implementation of the application, along with all sub-awardees. The respective roles (e.g., targeting, food aid distribution, etc.) of any other members of the consortia or individuals, including all sub-awardees, must be described and separate budgets must be attached for each.

### **2. New Partners**

USAID encourages applications from potential new partners.

### 3. Cost Share

Cost share is not required for FY14 applications.

### 5. Minimal Qualification Requirements

USAID has no additional minimal qualification requirements.

## **SECTION IV – SUBMISSION AND APPLICATION INFORMATION**

### 1. Submission

The application submission deadline is (for draft RFA: estimated to be **March XX, 2014**), **11:59 a.m., Eastern Standard Time**. The applicant is responsible for ensuring that the electronic application is received by the due date and time specified.

Food for Peace is requesting that applicants use the Food for Peace Management Information System (FFPMIS) to apply for a Title II development food assistance program under this RFA. FFPMIS can be accessed at <https://usaid-ffp.entellitrak.com/>.

- User guides and additional FFPMIS resources can be found on the [FFP website](#).
- Any technical questions on use of FFPMIS should be emailed to [FFPMIS\\_Support@usaid.gov](mailto:FFPMIS_Support@usaid.gov).

FFPMIS submission will require a combination of data entry and document uploads. All uploaded documents should be completed in accordance with the format detailed in this RFA and must adhere to the following:

- Written in English and in 12-point Times New Roman font;
- Text in tables or charts may be 10-point Times New Roman font;
- Narratives should be prepared in Microsoft Word with print areas set to 8.5 x 11 inch, letter-sized paper and one-inch margins, left justification and a footer on each page including page numbers, date of submission, proposed country, and applicant name;
- Spreadsheets should be prepared in Microsoft Excel, with print areas set to 8.5 x 11 inch, letter-sized paper;
- Only the Indicator Performance Tracking Table (IPTT) may be submitted on 8.5 x 14 inches, legal-sized paper;
- Official (signed) documents, memoranda, and certifications may be submitted as Adobe PDF files; and
- Emailed, faxed and hard copy applications are not acceptable.

Applications that are received late or are incomplete run the risk of not being considered in the review process. Such late or incomplete applications will be considered with FFP's sole

discretion depending on the status of application review process as of the time of receipt and/or the quality of other applications received.

Should any of the necessary documents listed in the RFA not be submitted according to the format and/or deadline referenced in the RFA, FFP will consider the application incomplete. FFP shall notify the applicant headquarters and the relevant FFP field contact by email with this determination and consequences.

## 2. Point of Contact

Any questions concerning this RFA, including the country-specific information and annexes, must be submitted in writing to Juli Majernik, FFP grants manager, at [jmajernik@usaid.gov](mailto:jmajernik@usaid.gov) with a copy to [FACG@amexdc2.com](mailto:FACG@amexdc2.com) or via mail to AMEX International at the address below:

AMEX International  
Attention: FY2014 Title II Development Food Aid Programs RFA  
USAID Food for Peace Institutional Support Project  
Ronald Reagan Building, North Tower  
1300 Pennsylvania Avenue, NW  
Suite 270  
Washington, DC 20004, USA

Note: please include “FY14 RFA” in the subject line for email correspondence.

Any questions concerning submission of applications or the FFP MIS should be submitted in writing to [FFPMIS\\_support@usaid.gov](mailto:FFPMIS_support@usaid.gov) with a copy to [FACG@amexdc2.com](mailto:FACG@amexdc2.com).

## 3. Budget Information

Applicants **may** submit budgets using Standard Form 424, 424A, and 424B, as appropriate, which can be downloaded from the USAID website. Alternatively, the [forms](#) are found on [grants.gov](http://grants.gov).

Also, **sample budget formats** prepared by FFP’s Program Operation Division are also available on the USAID website.

In addition, applicants may use budget formats they have developed that contain the requested information. In detailed budgets, all costs must be associated with an applicable program element and funding source.

Applicants may propose up to 13 percent of Section 202(e) funding unless otherwise noted in the country specific information. Applicants should review and follow the most recent version of the [FFP Information Bulletin on eligible uses of Section 202\(e\) and ITSH funding](#) located on the FFP website.

For additional budget and commodity information requirements, see 4. Application Format, d) Management and Logistics, and f) Budget.

#### **4. Pre-Award Certifications, Assurances, and Other Statements of the Recipient**

Apparently successful applicants must provide a signed copy of [Certifications, Assurances, and Other Statements of the Recipient and Solicitation Standard Provisions](#) as described in ADS 303.3.8 on the USAID website in response to the issues letter.

#### **5. Application Format**

The Application should be specific, complete, and presented concisely. Applications that do not substantially meet the requirements of this RFA will not be considered for award. The application shall be divided into the following sections, with the maximum number of pages given per section, including any endnotes and/or footnotes, as follows:

- Cover Page (1 page)
- Executive Summary (3 pages maximum)
- Program Description and Design (50 pages maximum)
- Management and Logistics (10 pages maximum)
- Past Performance (4 pages maximum)
- Budget (no page limit, see requirements in section f)
- Annexes (see section g)

The above bullets correspond to the sections of the RFA described below and constitute the general application format.

##### **a) Cover Page (1 page)**

The Cover Page should have the following:

- Name of the applicant's organization and country (i.e., Burundi, Madagascar and Malawi) involved in the proposed application;
- Name and title of the organization's representative who has signatory authority and authority to submit the application;
- Name, title, and contact information of the organization's point of contact with whom USAID should coordinate on matters related to the application (if different from the organization's representative with signatory authority and authority to submit the application). Contact information should include mailing address, e-mail, and telephone and fax numbers;
- Food aid commodity request in metric tons by direct distribution and/or monetization and the percentage of total metric tons requested for monetization);
- Total direct beneficiary numbers;

- Total cost per direct beneficiary over the life of the award<sup>1</sup>, with an indication of how many of those beneficiaries are included in each strategic objective (i.e., overlap) and in each intervention; and
- Total funds requested, including monetization budget request in U.S. dollar equivalents, Section 202(e) funding request in U.S. dollars, internal transport, shipping and handling (ITSH) funding request in U.S. dollars, CDF and cost share.

***b) Executive Summary (3 pages maximum)***

The application's executive summary should provide a concise synopsis of the following:

- Underlying causes of food insecurity to be addressed
- Proposed goal, objectives, and intermediate results
- Technical interventions and activities, and
- Proposed target population(s)

Separate from the Executive Summary, a Fiscal Year 2014 Executive Summary Table for the Life of Award (EST) is a required part of the application. The EST will be data entered through FFPMIS.

***c) Program Description and Design (50 pages maximum)***

The program description should include, at a minimum, the following:

1. *Linkage between Food Insecurity in the Region and Program Design.* This should include:
  - Brief description and analysis of the underlying causes of food insecurity (including food access, availability and/or utilization/consumption) and how these causes impact the vulnerable population of the country in the proposed target area. At a minimum, this analysis should include and/or reference appropriate and current national and local data, major determinants and underlying causes of food insecurity, sources of risk and vulnerability, and gender, governance and environmental safeguard issues as they relate to food insecurity; and
  - Description of the area of intervention (including a map) and rationale for geographic targeting; and
  - Rationale for beneficiary targeting.
2. *Program Design.* This section should include the following components:
  - Development hypothesis outlining the program's theory of change, logic, and causal relationships among the building blocks needed to achieve the long-term program goal. The hypothesis should be based on development theory, practice, literature, and country-specific experience, and explain why and how the proposed investments from the applicant, FFP, and others collectively lead to achieving the program's goal and strategic objectives;

---

<sup>1</sup> Total cost per direct beneficiary over the life of the award equals the total budget from all strategic objectives divided by the number of beneficiaries from all strategic objectives (for LOA).

- Results framework reflective of the food aid program's theory of change with measurable, context-specific objectives and intermediate results stated as end results (not activities). This framework should demonstrate how the program will address country-specific food availability, access, and/or utilization/consumption constraints. (See [USAID Performance Monitoring and Evaluation TIPS #13 Building a Results Framework](#) for further information);
- Description of how the proposed food aid program will complement existing local government, other donor health, nutrition, agriculture, natural resources management and climate change programs as well as other USG activities, especially those under Feed the Future and Global Health. Applications should also describe how the proposed program will collaborate and coordinate with technical staff in local government;
- Description of how governance will be addressed throughout all the proposed activities; this must be presented in order to promote local ownership of the activities and long-term sustainability of the interventions.
- Description of how gender will be addressed in all areas of the proposed program in light of USAID's new [Gender Equality and Women's Empowerment Policy](#);
- Description of how program activities could affect, both positively and negatively, the access to and control over resources and benefits for boys, girls, men, and women.
- Description of how proposed activities would affect women's time, i.e. the trade-off between more work and less time for child care or child-focused activities, how potential exposure to agricultural pesticides can adversely affect health, etc.;
- Description of how the program in general, and the technical interventions in particular, will be carried out in a way that will allow for equitable participation by men, women, boys and girls must be included in the design of the project;
- Description of how the variability in natural resources availability and/or quality (i.e., water, soil, climate/weather) will affect program outcomes. The description should include how climate change stressors may adversely affect program performance.
- Critical assumptions of the proposed activities, any risks that may negatively impact expected results (e.g., shocks including conflict, drought, gender issues, changes in government policies, etc.), and how the applicant would monitor and mitigate the impact of such occurrences along with proposed resulting changes to the program. With regard to critical assumptions related to gender, applicants should consider the implications of their work on men and women. For example, an increase in women's workload or potential exposure to agricultural pesticides can adversely affect young child nutrition;
- Description of an exit strategy, including sustainability of activities and plan for graduating beneficiaries before the end of the award for each aspect of the program. (See [Program Graduation and Exit Strategies: A Focus on Title II Food Aid Development Programs](#) for further information). Descriptions of exit strategies should include consideration of maintenance necessary to ensure sustainability of program impacts (i.e. clearing check dam or irrigation system sedimentation, or community latrine sanitation, water quality monitoring, etc.).
- Monitoring and Evaluation (M&E) Plan, including the program's Results Framework; description of key monitoring and evaluation activities; indicator performance tracking table (IPTT) with appropriate and robust performance indicators; plans for performance monitoring, mid-term evaluation, formative research, and data collection throughout the life of the award; a description of how the data will be used to improve the program's

performance; a brief note of how and when datasets (and accompanying materials, such as data dictionaries and program files to process data) generated for assessments, studies, formative research, or evaluations related to this award will be submitted to USAID and made anonymous to meet expectations of the Federal Government Open Data Policy; and the personnel and funding required (see USAID ADS 303). Applicants should review and include applicable FFP required, required if applicable, and standard indicators based on the program's proposed activities in the IPTT as per the revised FFP list of indicators, in addition to program-specific indicators.<sup>2</sup> Targets must be set for all annual monitoring indicators and level of disaggregation must be identified in the IPTT. However, applicants are not required to set targets for baseline and final evaluation indicators in the IPTT submitted as part of their applications. Targets for these indicators shall be established once an award is issued and the baseline study has been completed. The M&E Plan should describe the data collection methodology for annual monitoring indicators, e.g. routine monitoring or annual surveys, and include associated budget costs. Applications should also review monitoring and evaluation requirements in [FFP Information Bulletin \(11-03\)](#) entitled, *Revision to Food for Peace Standard Indicators to be Collected in Baseline Surveys and Final Evaluations*, [FFP Information Bulletin \(07-02\)](#) entitled, *New Reporting Requirements for Food for Peace*, and [FFP Information Bulletin \(09-06\)](#) entitled, *Monitoring and Evaluation Responsibilities of Food for Peace Multi-Year Assistance Programs Awardees*. Subject to the availability of funds, FFP will contract with and manage a third-party firm to conduct the program's baseline study and final evaluation.

- Appropriate gender and environmental safeguard indicators in the M&E Plan, including the IPTT;
- Plans for achieving environmental safeguards, including developing an Initial Environmental Examination (IEE) and an appropriate Environmental Mitigation Monitoring Plan (EMMP), and providing necessary resources and capacity building to operationalize the EMMP; and

Select M&E materials, i.e., the Results Framework and the IPTT, should be included as an annex. Note that the M&E Plan is part of 2. *Program Design* and requests additional information. The Detailed and General Implementation Plan Table, a comprehensive Monitoring and Evaluation Plan, and an EMMP will be required at a later date from apparently successful applicants.

3. *Technical Interventions*. Applicants should explain how the proposed technical interventions address country-specific causes of food insecurity. Proposed interventions should be described in sufficient detail to assess their operational and technical appropriateness and feasibility. This should include, at a minimum, the following:

- Type, purpose, location, and feasibility of activities;
- Systematic description of the links among implementation activities, intermediate results, and objectives which, taken together, comprise the applicant's "theory of change";

---

<sup>2</sup> FFP's revised list of indicators can be found at <http://www.usaid.gov/what-we-do/agriculture-and-food-security/food-assistance/guidance/implementation-and-reporting>.

- Detail of how the proposed activities will be implemented and by whom. Note that if an applicant proposes maternal-child health and nutrition (MCHN) activities, FFP strongly encourages applicants to focus specifically on preventing malnutrition of pregnant and lactating women and children during the first 1000 days between conception and a child's second birthday. Additional information on this preventive approach is found in Section VIII -- Other Information, 5. Preventing Chronic Malnutrition: The first 1000 days. Given the importance of health and nutrition for all women of reproductive age ((i.e., between 15 and 49 years of age) who may become pregnant, FFP also strongly encourages the engagement of this population, men, grandparents, adolescents and caregivers in health and nutrition messaging and service strengthening;
- Explanation of investments pertaining to agriculture or water activities. For example, if irrigation or water supply activities are proposed, applicants are strongly encouraged to foster an atmosphere of investments instead of entitlements in the beneficiaries. Distribution of free inputs should be severely limited if not eliminated, although step-down subsidies can be utilized where appropriate. Any distributed inputs should have value to the beneficiaries and provide tangible benefits, increased income, improved fertilizer use efficiency or improved drinking/irrigation water for example, such that fees can be charged to the end users in order to cover the recurring costs of such systems. Similarly, paying end users, in either food or free inputs, to work on their own land is strongly discouraged, however, incentivizing beneficiaries to improve income obtained from or the productivity of communal lands, through good governance interventions, is encouraged at the community level.
- Description of the target population, underlying causes of food insecurity, and the proposed program's direct beneficiaries within the target population, including criteria to be used to select and graduate direct beneficiaries. Include an estimate of what proportion of the residents living in the program's geographic area/target population will be direct beneficiaries. Also, applications with activities under multiple program elements should include an estimate of how many beneficiaries will benefit from more than one program element. Awardees are encouraged to use a Venn diagram to show how many beneficiaries are expected to overlap across program elements;
- Description of how gender will be integrated as a cross-cutting theme. Under each SO, applicants must provide detailed information sufficiently describing how gender will be integrated.;
- Description of how safeguards for ecological goods and services (e.g., groundwater recharge, soil fertility, slope stabilization) will be integrated across the design of all relevant interventions, drawing from USAID or other country-level environmental analyses as described in Section VIII.1.b.;
- Details of and justification for ration size, selection of commodities, and (in the case of rations for pregnant and lactating women and children under age two) nutrient contribution to the diet;
- Description of how activities in different program elements will be integrated and/or linked (for multi-element applications). Note that if an applicant proposes family planning activities, FFP strongly encourages applicants to focus specifically on how access to family planning services will allow families to appropriately time and space their children thereby impacting overall nutrition of the family according to resources

available. Additional information on this preventive approach is found in Section VIII -- Other Information, Family Planning; and

- Description of approach and proposed activities for the promotion of recommended behaviors and practices, description of expected key contact points and frequency of contact with target groups, description of the multiplication or replication of key activities expected within the overall approach, and description of any additional efforts proposed to reach the most vulnerable within a target population defined in general as vulnerable.
- Description of an overall implementation strategy that seeks to create wherever possible, self-financing and self-transferring models that will continue to spread under their own momentum both during and after the program. FFP seeks to implement effective models, build local capacity, and create an enabling environment adapted to the specific countries' contexts. FFP expects that these models will be adopted and adapted by a significant proportion of the population. Many examples of this type of intervention exist but one particularly successful example of this type of model is the Farmer Managed Natural Regeneration (FMNR) system that is spreading in Niger. A paper describing this system can be found here: <http://www.ifpri.org/publication/agroenvironmental-transformation-sahel>

4. *Learning, Knowledge Sharing, and Capacity Building.* Applicants should describe a program-level learning strategy that will illustrate processes and activities designed to: (1) identify and fill knowledge gaps through research, knowledge sharing, and outside technical assistance and training; (2) facilitate application of learning from assessments, evaluations and periodic monitoring and reflection processes; and (3) through networking and collaboration build sustained knowledge capture and sharing, across programs, partners, and sectors, and with key stakeholders from the USAID Mission, host country government, and other donor-funded programs. The strategy should include associated budget costs for the entire program cycle.

Illustrative activities include:

- Through collaboration and consultation with key partners, develop a learning agenda early in program implementation to consider a set of learning and capacity building issues and questions attached to a particular program or activity, and use internal or external scholars or technical experts to carry out the research alongside program implementation.
- Hold annual learning summits to identify promising practices, work collaboratively to overcome implementation obstacles and address changing contextual conditions. Results should be used to inform upcoming year work plans and activity design across multiple stakeholders, and captured and shared broadly across multiple stakeholders.
- Engage in periodic reflection activities using approaches such as After Action Reviews to identify, capture, and act upon lessons learned in technical, cross-cutting and management activities.
- Engage in active collaboration with other key in-country partners to share knowledge around assessments, emerging research results, lessons learned, and evaluations, and

jointly develop action plans for integrating the learning resulting from these activities into improved program implementation.

- Applicants are encouraged to use innovation and new technology, when appropriate, and engage technical experts, as needed. This may include, but is not limited to, utilizing mobile phone technology; engaging private sector experts for improvements in irrigation designs and models along with the mechanization of small grain processing; and engaging the international agricultural research institutions for new varieties of drought-resistant and nutritious crops.

Applicants are encouraged to consider how the FFP-funded Technical and Operational Support Program (TOPS), a capacity building and knowledge management Leader with Associates mechanism, can assist in capacity building efforts and/or developing a learning agenda. TOPS has several mechanisms for this support including technical task forces, knowledge sharing workshops, and training. TOPS small grants program is also an important resource available to applicants and awardees to pilot promising tools, and conduct capacity building exercises meeting in-country needs for improved programming, sharing best practices and innovative methods, programming, etc. <http://www.fsnnetwork.org/document/tops-small-grants-programs-implementers>

For further information on Title II programming approaches, applicants are encouraged to review resources, such as the recommendations from the second Food Aid and Food Security Assessment (FAFSA-2) found on the FFP website as well as the resources available on the TOPS Food Security and Nutrition Network <http://www.fsnnetwork.org/> Specific learning focused guides developed by TOPS include:

Developing Scopes of Work for Mid-term Evaluation of Title II Development Food Assistance Programs <http://www.fsnnetwork.org/sites/default/files/finalguidetodevelopsow.pdf>

Supporting Communities of Practice  
<http://www.fsnnetwork.org/sites/default/files/supportingcommunitiesofpracticefinal.pdf>,

Designing Participatory Brownbags and Meetings  
<http://www.fsnnetwork.org/sites/default/files/designingparticipatorymeetingsfinal.pdf>.

#### **d) Management and Logistics (10 pages maximum)**

The management and logistics section of applications should include the following:

1. *Management Structure.* This section should include a full description of the management structure of the proposed program, including any consortium arrangement, and detail any relationships with anticipated sub-awardees or sub-contractors. Specifically, if implementation will be done through a consortium or any potential sub-awards or sub-contracts, it should include an explanation of the scopes of the proposed activities, the individuals or organizations responsible, and why they are being selected. If the applicant proposes a consortium or any sub-awards, applicants should include signed “letters of

commitment” from consortium members or sub-awardees in an annex and refer to these in the application text.

2. *Staffing.* This section should describe the applicant’s staffing plans for all activities with descriptions of the number and type of staff and their roles and responsibilities. It should also include an organizational chart and the curriculum vitae (CV) of the proposed Chief of Party as annexes. During the issues letter phase, successful applicants may be requested to identify key technical staff responsible for nutrition and health; gender; environmental compliance; monitoring and evaluation; monetization; and agriculture and natural resource management, agribusiness, marketing, and/or economics and to provide their CVs as well.

3. *Logistics Plan.* This section should include an overview of the proposed food aid commodity use, along with commodity-related issues concerning direct distribution and monetization components of the program including, but not limited to, commodity requests and acceptable substitutions should select planned commodities not be available, port and warehouse, road and rail infrastructure, commodity management, including fumigation<sup>3</sup>, and commodity transportation (including inland and internal transport). The applicant is also required to include an Annual Estimate of Requirements and Commodity Pipeline, which will be data entered in FFPMIS. If the applicant has a current Title II award, the applicant should indicate any anticipated carry-over commodities. For landlocked countries, applicants should note the designated points of entry (which are limited to four). For special procurement or shipping requests, such as containerization or through-bills of lading, a detailed justification must be provided.

4. *Monetization and/or Distribution Plan.* The monetization plan should be developed as outlined in the [FFP Monetization Field Manual](#). Note that the country-specific information, RFA and FFP Information Bulletins take precedence over the manual, should there be a discrepancy. Key points should include a justification for the proposed monetization (including the level of monetization expressed as a percentage of total tonnage), description of the proposed mechanics of the monetization (e.g., type of sale, type of buyer, anticipated food aid commodities, and whether the potential sale will be conducted with other awardees), and a discussion of the local market factors and potential risks that may affect distribution, including negative gender impacts involving risks linked to the location or timing of distribution, as well as monetization. Applicants must also complete monetization proceeds and cost recovery information in FFPMIS. Applications for countries receiving CDF funds (as indicated in the country-specific information) would not include information on monetization and monetization related forms in FFPMIS.

For the Distribution Plan, the applicant must discuss the local market factors and potential risks that may affect distribution. Both food aid commodity distribution and monetization programs need to be familiar with and understand the implications of the FFP Information

---

<sup>3</sup> In keeping with requirements of the Programmatic Environmental Assessment: Commodity Protection by Phosphine Fumigation in USAID Food Aid Programs (aka “Fumigation PEA”).  
<http://www.usaidgems.org/fumigationPEA.htm>

Bulletin (09-02) entitled, [New Procedures to Determine Compliance of P.L. 480 Title II Food Aid Program Proposals with the Conditions of the Bellmon Amendment.](#)

Information on the status of the Host Country Agreement should be included as well. Please see Section VIII – Other Information for more information.

***e) Past Performance (4 pages maximum)***

The applicant acting on its own or acting as the lead of the consortium should include, at a minimum, the following items for itself (in the case of no consortium) or for all members of the consortium including itself (in the case of a consortium) in the past performance section of the application for U.S. Government and non-U.S. Government funded programs:

- Detailed description of prior performance within the past three years implementing food aid programs in the proposed country or other countries, if applicable;
- Detailed description of prior performance within the past three years implementing non-food aid programs with similar sectors or activities (e.g., nutrition, agriculture, etc.) in the proposed country or other countries in the region; and
- Any other evidence of the technical, financial, and managerial capability within the past three years to design, implement, and monitor the proposed activities, including the number and size of programs managed or proposed.

If the applicant (and/or any member or a proposed consortium) has previous experience **within the past three years** in the proposed country and is submitting an application to assist beneficiaries in a region similar or identical to where it has previous experience or in similar technical sectors in which it has worked in that country, the applicant (and/or consortium member) must explicitly incorporate lessons learned from prior activities into the description of Technical Interventions. The applicant must respond to any concerns raised in the final evaluation and/or in any audit findings of the prior activities in the application for itself or for any members of the consortium to which the concerns apply.

For each application, only the applicant (either submitting on its own or as the lead of a consortium) must submit as an annex the executive summary of final evaluations and audit reports for the past three years for those U.S. Government-funded programs described in the bullets above, as well as links to the full evaluations and audits.

***f) Budget (no page limit)***

Cost proposals include the executive summary table, comprehensive budget, detailed budget, and budget narrative and must be submitted as a separate section, which is not subject to the page limitation of the program application. Cost proposals must be in U.S. dollars only and include budget details as described below for the applicant, each member of the consortium (if applicable), sub-awardees and/or sub-contractors. Note that for restricted goods, the applicant (or prime in the case of sub-awards or lead in the case of a consortium) must ensure that they are identified in each budget and follow up with any approvals, as required.

1. *Executive Summary Table for the Life of Award.* Separate from the Executive Summary, a Fiscal Year 2014 Executive Summary Table for the Life of Award should be submitted through FFPMIS. It captures the proposed resources for the life of the award.
2. *Comprehensive Budget.* The comprehensive budget should pull together all planned costs by object class category and funding source for each year of the program. The Comprehensive Budget will be data entered on FFPMIS.
3. *Detailed Budget.* The detailed/itemized budget should list and account for individual line items within each *object class category* for each program element. Object class categories are logical groupings of costs, such as staff salaries, fringe benefits, travel, capital equipment, supplies, and indirect costs. A [suggested budget format](http://www.usaid.gov/documents/1866/detailed-budget-annex) organized by program elements, grouped by object class category and itemized by suggested individual line items, is available on the FFP website at <http://www.usaid.gov/documents/1866/detailed-budget-annex>. Also, if reimbursement for inland transport charges will be requested, include an estimate of total U.S. dollars needed for inland transport in the detailed budget. If this information is not yet available, please include the estimate and state in the budget narrative when the information will be submitted to FFP.
4. *Budget Narrative.* The budget narrative justifies proposed expenses and explains how costs were estimated. Applicants should provide their rationale for cost development, such as the methodology and assumptions used to determine individual costs. A thorough budget narrative will expedite the cost proposal review and prevent the applicant's staff from having to revisit the application and provide justifications following application submission. For ease of review, budget narratives should follow the order of line items in the detailed budget.

**g) Annexes**

The following is a list of annexes that should be included with the application.

| <b>Annex Type</b>                                                                                                        | <b>Methodology</b>     |
|--------------------------------------------------------------------------------------------------------------------------|------------------------|
| 1. Executive Summary Table for the Life of Award                                                                         | Data Entered on FFPMIS |
| 2. Comprehensive Budget                                                                                                  | Data Entered on FFPMIS |
| 3. Detailed Budget                                                                                                       | Uploaded into FFPMIS   |
| 4. Budget Narrative                                                                                                      | Uploaded into FFPMIS   |
| 5. Monetization Table: Anticipated Monetization Proceeds and Cost Recovery Data for Year One                             | Data Entered on FFPMIS |
| 6. Annual Estimate of Requirements and Commodity Pipeline                                                                | Data Entered on FFPMIS |
| 7. Results Framework and IPTT (For additional information see Section VIII.3.)                                           | Uploaded into FFPMIS   |
| 8. Gender Analysis Plan (Provide information about the gender analysis plan only. For additional information see Section | Uploaded into FFPMIS   |

|                                                                                                                                                                                                                                                                                |                       |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| VIII.1. below). <u>four pages maximum</u>                                                                                                                                                                                                                                      |                       |
| 9. Environmental Safeguards Plan (Provide information about the environmental safeguards plan only. For additional information, see Section VIII.2. below.) <u>four pages maximum</u>                                                                                          | Uploaded into FFP MIS |
| 10. Country Map(s) with any proposed and any ongoing Activity Area(s) by Applicant and/or members of the consortium                                                                                                                                                            | Uploaded into FFP MIS |
| 11.                                                                                                                                                                                                                                                                            |                       |
| 12. Past Performance Documentation (Include Executive Summaries from relevant Final Evaluations and Audit Reports, as applicable. For additional information, see Section V.1.c.)                                                                                              | Uploaded into FFP MIS |
| 13. Applicant Organizational Chart (and information on consortium or sub-awardee structure, if applicable)                                                                                                                                                                     | Uploaded into FFP MIS |
| 14. Curriculum Vitae (CV) of Chief of Party upon submission of the application (however, other CVs may be requested in response to the issues letters if application is accepted, prior to the first obligation of resources, and/or if key staff are identified in the award) | Uploaded into FFP MIS |
| 15. Glossary and List of Acronyms                                                                                                                                                                                                                                              | Uploaded into FFP MIS |

## 6. Funding Restrictions

For special considerations and information pertaining to ineligible and restricted goods, services, and countries, please see the USAID Automated Directives System (ADS) [Major Functional Series 300: Acquisition and Assistance, Chapter 312 - Eligibility of Commodities](#). Additionally, it is the legal responsibility of USAID awardees to ensure compliance with all U.S. laws and regulations, including those that prohibit transactions with, and the provision of resources and support to, individuals and organizations associated with terrorism. These laws, rules and requirements may affect the program design, budget, timing of award, and/or timely program implementation and post-award administration.

## 7. Pre-Award Costs

The award will not allow reimbursement of pre-award costs.

## 8. Other Submission Requirements

Certain documents may be required to be submitted by the applicant in order for the Agreement Officer to make a determination of financial responsibility. Applicants shall submit any additional evidence of responsibility, as requested, to support the determination pertaining to adequate financial, management and personnel resources and systems; ability to comply with the award conditions; satisfactory record of performance, integrity and business ethics; along with qualifications and eligibility to receive a grant under applicable laws and regulations.

## **SECTION V – APPLICATION REVIEW INFORMATION**

### **1. Evaluation Criteria**

For each application, the technical application and cost proposal will be evaluated separately. The technical application will be evaluated in accordance with the Technical Evaluation Criteria set forth below. Thereafter, the cost proposal of each applicant submitting a technically acceptable application will be evaluated for general reasonableness, allowability, and allocability. There are three criteria against which applications will be evaluated: Program Design and Description; Management and Logistics; and Past Performance. The maximum possible points according to criteria are in the table below:

| <b>Technical Evaluation Criteria</b> | <b>Maximum Possible Points</b> |
|--------------------------------------|--------------------------------|
| A. Program Design and Description    | 55                             |
| B. Management and Logistics          | 30                             |
| C. Past Performance                  | 15                             |
| <b>Total Possible Points</b>         | <b>100</b>                     |

#### ***a) Program Design and Description***

Factors under this criterion include, but are not necessarily limited to, the following:

- Soundness of program design, including a theory of change based on a proven or plausible logical reasoning, cross-cutting constraints and opportunities that may limit or affect the availability, access, or utilization/consumption of food resources by men and women, boys and girls, such as limiting factors related to climate change, conflict, and governance;
- Linkages between assessment of underlying causes of food insecurity, program design and proposed activities;
- Soundness of technical sector interventions with clear evidence base;
- Adherence to country-specific information on the objectives, activities and/or geographic locations specific to the country in the RFA;
- Integration of a gender-sensitive approach throughout all aspects of program activities (i.e. design, implementation, evaluation, etc.). There must be a gender outcome at either the IR or sub-IR level for each SO and each of these gender outcomes must have at least one gender indicator to measure the outcome. Additional information about gender can be found in Section VIII;
- Integration of approach to achieving environmental safeguards, including: developing an Initial Environmental Examination (IEE) and an appropriate Environmental Mitigation Monitoring Plan (EMMP), and providing necessary environmental management human capacity, and budget for IEE implementation.
- Well-defined exit strategy, including realistic support for the sustainability of activities and plan(s) for graduating beneficiaries before the end of the award; and
- Well-defined M&E Plan, including a robust Results Framework, description of key monitoring and evaluation activities, methods, and tools with clear performance

indicators, as indicated on page 10. In addition, the IPTT should include gender and environmental indicators to permit the measurement of food security gains while promoting gender equity and safeguarding environmental goods and services. Sex-disaggregated indicators must be collected in order to identify possible gender-related disparities or highlight new or unexpected differences affecting men, women, boys, or girls. However, sex-disaggregated data itself does not constitute a gender-sensitive approach; instead, this data can and should be used to construct gender sensitive indicators and guide future programmatic activities. A set of gender indicators that measure the gender outcomes given in the Results Framework is required. Gender and environmental indicators are described in Section VIII.

#### **b) Management and Logistics**

Factors under this criterion include, but are not necessarily limited to, the following:

- Suitability of management structure;
- Appropriateness of positions and staffing;
- Adequacy and feasibility of logistics plan; and
- Appropriateness and sufficiency of monetization plan if monetizing.

#### **c) Past Performance**

The applicant's past performance will be evaluated based on accomplishments (including success in reducing child undernutrition), quality of performance as described by donors or references, and as demonstrated expertise implementing programs similar to the one proposed.

For each application, the applicant will be requested to submit the Executive Summary of final evaluations and audit reports (for the past three years), a link to full final evaluations, and a minimum of three references.

### **2. Review of Cost Proposal**

The review of the cost proposal seeks to determine if the level of resources is appropriate for the number of beneficiaries and degree of change being proposed. Aspects to be considered under this criterion include the justification for program costs: general reasonableness, allowability under the cost principles and according to FFP policies, and the allocability of the costs reflected in the budget. Technical Evaluation Committee (TEC) members will also review whether the applicant's application is consistent with its cost accounting practices, policies and procedures, including ensuring that the indirect cost rates are consistent with any negotiated indirect cost rate agreements. Since monitoring and evaluation, research, and learning play a critical role in improving program performance, TEC members will review the level of resources allocated to these activities. Based on the review, the TEC will determine whether the cost proposal will pass with no revisions or pass with revisions.

For further information on costs considered reasonable, allowable, and allocable, please refer to 22 C.F.R. 230, [Cost Principles for Non-Profit Organizations](#), which was formerly OMB Circular A-122.

### **3. Review and Selection Process**

Consistent with the requirements set forth in the Food for Peace Act, FFP shall determine whether to accept an application no later than 120 days after receipt of a complete application (subject to availability of funds and commodities). FFP is committed to meeting this mandate; however, its ability to do so depends upon the quality of applications and their responsiveness to the standards and requirements set forth in the RFA.

Once an application is deemed complete, FFP will review each application based on the RFA evaluation criteria and FFP policies. FFP field offices will collaborate closely with FFP in Washington in the review of applications. Following its review of a complete application, FFP may accept the application, deny the application, or withhold a decision on whether to accept or deny the application pending resolution of outstanding issues.

FFP may determine that a particular application meets all requirements and warrants funding. In this case, FFP will notify the applicant that its application has been accepted. According to the period decided upon by FFP, the applicant must then submit the remaining components of the application (e.g., branding strategy and marking plan along with other components such as certifications). Updated materials may also be required to reflect any changes in program design. After receipt and examination of the remaining components, FFP will send a signed award letter with relevant attachments to the applicant (i.e., future awardee) for review and signature.

If FFP determines that an application generally meets food aid program requirements, but has deficiencies that can and should be addressed prior to approval, FFP will send an issues letter to the applicant, consolidating the comments from the technical evaluation. Given the importance to the funding decisions of the applicant's responses to the issues letter, applicants are strongly encouraged to respond promptly to the appropriate contact as indicated in the letter. Any delays will adversely affect the process, lead to subsequent delays in finalizing the award documentation, and may ultimately lead to denial of the food aid application. If FFP accepts the response to the issues letter, the applicant must submit a revised application, incorporating the changes accordingly and all the remaining components of the application. When a complete revised application and all components are received, FFP will review the entire submission. If FFP determines the revised application has adequately incorporated all of the issues cited in the final issues letter, all remaining components are complete and correct, and funds and/or commodities are available, then FFP will approve the application and send an award letter with relevant attachments to the applicant (i.e., future awardee) for review and signature.

Should FFP determine that an application has major deficiencies that cannot be resolved within the 120-day timeframe for acceptance or addressed in a letter, or should FFP determine that the applicant failed to adequately respond to the issues raised with sufficient detail and relevant information within the required period, FFP will then deny the application. Key reasons for the denial will be outlined in the denial letter.

## **SECTION VI – AWARD AND ADMINISTRATION INFORMATION**

USAID may make an award resulting from this RFA to the responsible applicant(s) whose application(s) conforming to this RFA offer(s) the greatest value. USAID may (a) reject any or all applications, (b) accept other than the lowest cost application, (c) accept more than one application, (d) accept alternate applications, and (e) waive informalities and minor irregularities in applications received.

Awards will be made in accordance with the [USAID Standard Provisions](#) and other applicable U.S. Government regulations, which are available on the USAID web site. The award will be administered under the 22 C.F.R. 211, 22 C.F.R. 216, 22 C.F.R. 226, OMB Circulars and the USAID Standard Provisions.

The Agreement Officer is the only individual who may legally commit the U.S. Government to the expenditure of public funds. No costs chargeable to the proposed agreement may be incurred before the start date of a fully executed Agreement. (In extreme cases, a specific written authorization from the Agreement Officer may be necessary and completed.)

Reporting requirements are briefly described in Section VIII – Other Information, 3. Monitoring and Evaluation Materials and Reporting.

## **SECTION VII - AGENCY CONTACTS**

Agency contacts may be found in Section IV – Submission and Application Information, 2) Point of Contact.

## **SECTION VIII – OTHER INFORMATION**

### **1. Gender**

Although the objectives of food aid programs and activities will need to be context-specific, one underlying aspect of food insecurity in all Title II programs that deserves careful consideration is the widely prevalent issue of gender inequality. Gender inequality affects food security through various pathways. For example, access to and rights over land differ between men and women, affecting food production, availability, and ultimately food security. Men and women engage in different livelihood activities and often women earn much less than men. Many women are married and bear children during their adolescent years, at a time when they have the least access to resources and decision-making power in the household, which affects food utilization and nutrition outcomes. Gender inequality varies from one host country context to another and therefore affects each dimension of food security in different ways. Understanding the gender constraints as they affect food security and integrating gender considerations into food aid programming is essential and a mandatory program requirement to ensure, promote and sustain food security.

A gendered approach throughout programmatic activities seeks to take into account the differences in men's, women's, boys', and girls' roles in the community context, as well as the intergenerational and gendered inequalities that exist within a household during program planning, implementation and assessment. Accounting for inequalities in designing food aid programs in order to reduce the disparities should not only contribute to more effective multi-year development programs, but also to increased social equality and greater reductions in food insecurity.

Applicants must recognize the pervasive additional obstacles that poor women and girls face and give serious attention to those impediments as roadblocks not only to women and girls, but also to effective national development. Opportunities exist and should take into consideration ways to engage men and boys in challenging traditional gender norms while also mitigating potentially negative impacts. Gender norms are at the center of how men and women are socialized to interact with each other; considering this relationship and the balance between them is critical to ensure equitable participation and benefits to both men, women, boys and girls. Applicants should incorporate elements that support USAID's policy on gender equality and women's empowerment when designing all activities for the proposed food aid program.

#### ***a) Gender Integration***

All Title II programs are required to integrate gender into the program as cross-cutting objectives that must appear in the Results Framework. The specific domains of gender equality addressed by the program must be described, and should be grounded in an understanding of the local context and may be adjusted if the need arises (i.e. the gender analysis highlights a domain that should be focused on). In the program description and design, applicants must explain how they will recognize and mitigate potential negative impacts with regard to gender, as well as how, and the ways in which, men and women will be engaged throughout program activities.

For example:

For programs that plan to implement agriculture and livelihoods activities, domains of gender equality that could be impacted include, but are not limited to:

- Access to and control over resources and assets
- Economic empowerment
- Distribution of household labor

For programs that plan to implement maternal and child health and nutrition activities, domains of gender equality that could be impacted include, but are not limited to:

- Gender relations and dynamics
- Male involvement in maternal infant and young child nutrition
- Shared responsibility between men and women for infant and young child nutrition
- Decision-making related to health
- Mobility related to health-seeking behaviors

- Supporting the necessary food frequency and quality at the household level while also being responsive to women's time (e.g., baby friendly community initiatives, early childhood development activities, etc.)

For programs that plan to implement disaster risk reduction activities, domains of gender equality that could be impacted include, but are not limited to:

- Community planning for risk reduction and disaster mitigation that identifies men and women's risks/vulnerabilities, roles, responsibilities, and permissions by age and life-stage
- Gender relations and dynamics that are affected by shocks and disasters

**Further guidance on how to integrate gender and create gender indicators at the proposal level can be found in *Annex II – Gender: Title II Development Food Assistance Programs, Part A: Guide to Creating Gender Indicators and Gender Integration of this RFA.***

#### ***b) Gender Analysis Plan***

Completing a gender analysis at the time of application is not required; however, a gender analysis must be completed within the first year of a program if the application is awarded. After a gender analysis is completed, applicants are required to apply results to program activities as necessary. Applicants are required to share their plans for completing a Gender Analysis as an annex entitled Gender Analysis Plan. This Plan is limited to four pages, and is intended to only outline the projected plan for undertaking a gender analysis. This plan should include, but is not limited to, information on: key questions to be addressed, duration of analysis, data analysis plan, plan for application of results, and projected budget. **Further guidance on how to conduct a gender analysis can be found in *Annex II – Gender: Title II Development Food Assistance Programs, Part B: Guide to Conducting a Gender Analysis of this RFA.***

#### ***c) Gender M&E***

All Title II programs are required to identify a set of gender indicators that will be collected during the baseline survey, final evaluation, and annually that measure the gender objectives identified in the results framework. These should be included in the IPTT of the M&E Plan and proposed at both the output and outcome levels. In addition, all Title II development food assistance programs are required to complete an in-depth gender analysis within the first year of implementation in a way that best ensures the results of the analysis will be incorporated into the design and implementation of the programs. The AOR must approve the gender analysis scope of work before the analysis begins. In addition, all programs are required to include an analysis of the impacts of the program on gender dynamics as part of the midterm evaluation.

#### ***d) Gender Expertise***

Considering this mandatory requirement, FFP expects that applicants will have the necessary gender expertise and capacity available to ensure gender is integrated and addressed at every point in the food aid program cycle. Applicants must identify the gender expertise and explain their capacity to implement gender-sensitive activities within the application. In addition, it is essential that applicants include in applications meaningful approaches to address gender issues

of specific relevance to food security. Applications must demonstrate a sound understanding of gender issues as they affect food security directly along the dimensions of food availability, access, and utilization in the proposed host country and possibly the proposed project area. Priority will be given to applications that demonstrate the integration of gender throughout all phases of the project lifecycle as a means to improve food security.

## **2. Environmental Safeguards**

Many FFP programs are implemented in countries affected by environmental stressors, e.g., deforestation, eroded soils, climatic variability, ground water contamination, or over-harvesting of near-shore fisheries. While it is often assumed that much of the developing world has experienced irreversible environmental degradation worsened by climatic changes, examples of community-driven, equitable environmental protection and recovery are on the increase.<sup>4</sup> Reducing the environmental impact of USAID development assistance through environmental performance practices (e.g., water safety plans, sustainable sourcing of materials, cleaner production, waste minimization, environmental health and improved natural resources management) has multiple positive outcomes. At the most basic level, USAID ensures that taxpayer dollars are doing no harm to the natural resource base. Environmental impact assessment is a decision-making tool to maximize the achievement of program outcomes while minimizing coupled environmental and social impacts.

Environmental resources health and climate stressors vary from one country context to another and with time, thus, affect dimensions of food security in different ways. Climate change cannot be addressed in isolation from environmental degradation as the two are very closely inter-linked. Understanding the environmental limiting factors as they affect food security and integrating environmental sustainability considerations into food aid programming are essential and mandatory requirements to ensure, promote and sustain food security.

### ***a) Integrating Environmental Safeguards into Project Design***

The objectives of integration of environmental safeguards are to ensure that while Title II programs achieve goals in the reduction of food insecurity, plans are in place to reduce unintended environmental impacts and strengthen resilience to climate and environmental changes. Specifically, applicants should consider the following two questions: 1) how will proposed activities affect the relative quality and sustainability of environmental resources? and 2) how will climate variability and change affect the achievement of sustainable results?;

To this end, the USAID FFP food assistance program is to be designed to:

1. Do no harm to the affected natural capital baseline of land, water and flora/fauna, including humans.
2. Rehabilitate or reverse losses in natural resource wealth.

---

<sup>4</sup> Reij, C., G. Tappan, and M. Smale. 2009. Agroenvironmental transformation in the Sahel: Another kind of “Green Revolution.” IFPRI Discussion Paper. Washington, D.C.: International Food Policy Research Institute, <http://www.ifpri.org/sites/default/files/publications/oc64ch07.pdf> ).

3. Strengthen sustainability of community natural resource use.
4. Improve community resilience to environmental- and climate-related shocks.

In addition to language in this RFA, FFP applicants will draw direction and guidance for application design from USAID and other donor country-level and global environmental assessments.

### **Consultation of Country Environmental Analyses**

First, applicants are strongly recommended to draw from country-level USAID Environmental Threats and Opportunities Analyses (ETOAs) and/or USAID Foreign Assistance Act (FAA) Section 118/119 Biodiversity and Tropical Forestry analyses which are developed for USAID bilateral or country Missions to integrate environmental concerns into annual Country Development Cooperation Strategy (CDCS) processes. These analyses are developed with technical expertise via consulting a wide variety of key stakeholders from government and civil society (including intended beneficiaries of programming) and when integrated into partner-country programs can improve the resiliency of over-exploited natural resources, improve environmental health, and strengthen partner-country environmental governance essential to achieving development objectives (USAID Automatic Directive Systems (ADS) 201.3.4.2.1a). For example, environmental issues such as unsustainable agricultural practices and fuel wood-driven deforestation are threats to biodiversity analyzed in ETOAs that can and should inform food security programming applications.

Second, applicants are strongly recommended to draw from key lessons learned from climate change vulnerability assessments developed by USAID or other key entities and initiatives. A vulnerability assessment looks at exposure and sensitivity to climate stressors along with adaptive capacity to provide actionable information for adaptation. It can be carried out at different levels, ranging from the community to the national. It can also help applicants to understand *why* a place or sector is vulnerable to climate stressors, so that activity applications can be designed to alleviate that specific vulnerability. For examples of country-level vulnerability assessments see <http://www.worldbank.org/en/news/feature/2011/06/06/economics-adaptation-climate-change-country-case-studies>.

### **Consultation of Global Environmental Analyses**

USAID has conducted targeted global assessments that applicants must use to inform FFP programs in achieving food security objectives. Common to all FFP development food assistance programs are the commodity components related to warehouse management and beneficiary cooking practices. USAID has conducted two global environmental assessments and provided guidance for commodity fumigation and fuel wood cooking needs. All Title II program applications must identify in the application how applicants will: 1) ensure that fumigation practices will be conducted in accordance with the USAID Programmatic Environmental Assessment for the Fumigation of Commodity<sup>5</sup>, and 2) promote efficient and effective use of fuel wood, or other energy sources, used in the preparation of commodity through energy/fuel

---

<sup>5</sup> See the Programmatic Environmental Assessment: Commodity Protection by Phosphine Fumigation in USAID Food Aid Programs (aka “Fumigation PEA”). <http://www.usaidgems.org/fumigationPEA.htm>

wood supply or demand-side programming and/or policy approaches. Cook stove programs will draw from the USAID Fuel-Efficient Stove Programs in Humanitarian Setting: An Implementer's Toolkit<sup>6</sup>.

While it is expected that environmental safeguards are to be addressed throughout the entire application, applicants must further describe their plan for addressing environmental issues by including an Environmental Annex in their application.

#### ***b) Environmental Analysis***

The Foreign Assistance Act of 1961, Section 117 requires that the impact of USAID's activities on the environment be considered and that USAID include environmental sustainability as a central consideration in the design and over the life of its development programs. This mandate is codified in Federal Regulations (22 C.F.R. 216) and in USAID's [Automated Directives System \(ADS\) Part 204](#). This mandatory environmental compliance for the FFP programs will be met both through a strategic, FFP office-level Initial Environmental Examination (IEE, hereafter, "FFP-IEE"), which is provided by USAID, see **Annex III**, and a detailed awardee IEE, to be developed by awardees only.

This FY14 FFP RFA includes a change from FY 13's solicitation regarding this mandatory assessment.

- For the FY14 RFA, applicants are not required to complete an IEE at the time of application submission. FFP applicants will, however, draw direction from the new, global FY14 FFP-IEE see **Annex III**, developed by USAID which sets in place the strategic, high-level environmental compliance policy and process for FFP programs for the current priority countries. The FFP-IEE will serve as a pre-award, decisional document for purposes only of the disbursement of funds to the awardee. In addition to language in this RFA, the FFP-IEE directs 1) all applicants to integrate environmental safeguards into application design by drawing lessons from USAID country and global environmental assessments (described above) and 2) only awardees to develop a awardee IEE which analyzes, mitigates, budgets and develops plans for foreseeable environmental impacts. The effectiveness of this change in environmental policy implementation will be ascertained to inform future FFP solicitations.

Awardees' IEEs will be similar in depth and content to IEEs that have been included at the time of application submission in previous years. However, the environmental safeguards will be better integrated into the overall application design and strengthened with regard to environmental and health impacts associated with common commodity related activities. The awardee IEE serves as a post-award, analysis describing the national and sub-national environmental baseline, potential environmental impacts and project-specific environmental mitigation measures including implementation plans providing environmental budgeting, monitoring and reporting. FFP awardees are encouraged to refer to the Agency IEE Database in the development of awardee IEEs, as this online database contains environmental impact

---

<sup>6</sup> [http://transition.usaid.gov/our\\_work/economic\\_growth\\_and\\_trade/energy/pubs/cookstoves.html](http://transition.usaid.gov/our_work/economic_growth_and_trade/energy/pubs/cookstoves.html)

analyses for a wide range of the development sectors and FFP countries of implementation (<http://gemini.info.usaid.gov/egat/envcomp/>).

### **Timing of Awardee IEE Submission**

Awardees will be responsible for providing the Agreement Officer's Representative (AOR) with an 'awardee IEE'. The AOR will follow up with the awardee to ensure that the mandatory awardee IEE is prepared and submitted to FFP on time, after the M&E workshop, but prior to baseline evaluations for final decision by the DCHA Bureau Environmental Officer (BEO). The critical triggering point for submitting the IEE is once the final program design is determined, which is typically after the M&E workshop. It is not appropriate to submit the IEE simply prior to the "start of field programs", as the IEE must be submitted to USAID with sufficient time for administrative and technical review, revision, and decision. All awardee IEEs must undergo the full suite of both administrative clearance (i.e., Mission (including the Director) and FFP Washington (including the Agreement Officer)) and technical clearances (Mission and/or Regional Environmental Officers/Advisors) that can be time consuming given the inter-institutional processes and procedures within USAID. Additionally, the BEO typically will request IEE revisions as conditions for final clearance which must be incorporated into implementation plans prior to the start of field activities. Further guidance and templates on how to conduct an IEE analysis and necessary documentation can be found at the Global Environmental Management Support (GEMS) project webpage, <http://www.usaidgems.org/compliance.htm> and in the FFP-IEE included in **Annex III**.

USAID expects that any awardees to plan accordingly in order to provide sufficient time to conduct the IEE analysis at the field level. At minimum, the awardee is strongly advised to plan for any/all necessary sub-contractual arrangements or alignment internal technical staff time as soon as FFP determines that an application generally meets food aid program requirements, and deficiencies can and should be addressed prior to approval, if not sooner.

### **c) Environmental M&E**

Applicants are to include environmental performance indicator frameworks through the development of cross-cutting issues in the Results Framework and environmental (or "green") output and select outcome indicators for program Indicator Performance Tracking Tables (IPTTs). Environmental indicators should be strategically selected to monitor the sustainability of implementation of activities that rely on the natural resource base and/or may do harm. Additional information on "green" indicators is available in the [Green Recovery and Reconstruction Toolkit \(GRRT\)](#) for Humanitarian Aid, Module 2: "Project Design, Monitoring and Evaluation." The [UNHCR FRAME Toolkit](#): Framework for Assessing, Monitoring, and Evaluating the environment in refugee-related operations, Module V: Environmental Indicator Framework, provides example indicators and score cards.

### **d) Environmental Expertise and Budgeting**

Considering this mandatory requirement, FFP expects that applicants (and awardees) will have the necessary environmental compliance expertise and capacity available to ensure the awardee IEE and operationalized EMMP are integrated and addressed at every point in the food aid program cycle, and to that end, applicants will identify in their application environmental expertise and capacity of the program. Provisions for implementing environmental compliance

activities should be included in the detailed and comprehensive budgets, integrated into other cost items, as appropriate, and highlighted in the budget narrative. Applicants must reflect illustrative costs for environmental compliance mitigation measures, monitoring, evaluation, training and consultancies in their cost application. USAID is undergoing the development of a FFP environmental budgeting guidance under the USAID GEMS project, and is currently in its pilot implementation phase. Applicants are encouraged to review the March 7, 2012, presentation (Washington, DC) of the draft Food For Peace GEMS Environmental Budgeting Guidance <http://www.usaidgems.org/documents/Rfaenvironmentalbudgeting.pdf>.

### **3. Monitoring and Evaluation Materials and Reporting**

As part of the Monitoring and Evaluation Plan, applicants must include as an annex the Results Framework and IPTT **upon submission**. However, the Detailed and General Implementation Plans (Tables) and detailed M&E plan describing all of the monitoring and evaluation activities, a revised IPTT, methodology for annual monitoring, methodologies and plan for evaluations and formative research, data quality assurance plan, a calendar of M&E activities, and an organogram of M&E staff along with updates or revisions to the Results Framework will be required **within 30 days** from the date of the Monitoring and Evaluation Workshop for new awardees. In addition, applicants must include in the program design and description an enhanced focus on environmental performance and management as well as gender equality and gender integration for which specific indicators must be designed. See **1. Gender** and **2. Environmental Safeguards** above. All Title II development food assistance programs are required to complete an in-depth gender analysis and an awardee IEE analysis within the first year of implementation, in a way that best ensures the results of these analyses will be incorporated into the design and implementation of the programs. The Agreement Officer's Representative (AOR) must approve the gender analysis scope of work before the analysis begins. In addition, all programs are required to include an analysis of the impacts of the program on gender dynamics and the environmental setting as part of the midterm evaluation.

Quarterly reporting, annual results reports, mid-term evaluation, and final evaluation are expected from all FFP awardees. Exceptions will be at the AO's discretion. Details will be contained in the award language for successful applicants.

#### **a) Results Framework**

Applicants must include as an annex a Results Framework or other type of logic model that represents the food aid program's theory of change by laying out the activities and outputs that will lead to short, medium, and long-term outcomes and objectives. The Results Framework should contain all of the necessary and sufficient conditions to achieve each intermediate result and the overall objective. Results Frameworks are described further in [USAID Performance Monitoring and Evaluation TIPS #13 Building a Results Framework](#).

#### **b) Indicator Performance Tracking Table**

The IPTT includes output, outcome, and impact performance indicators linked to the food aid program application's strategic objectives, intermediate results, and activities. The IPTT is an

awardee's primary tool for organizing and reporting on performance indicators. Applicants should review and include FFP required, required if applicable, and standard indicators based on the program's proposed activities in the IPTT as per the revised FFP list of indicators, in addition to program-specific indicators. The IPTT also lays out estimated baseline and target values for each indicator, ensures that target values are appropriate for the indicator type (i.e., at baseline and final evaluation only vs. annual targets), and makes it clear whether target values are cumulative or annual. The IPTT is submitted along with the Results Frameworks as an annex.

#### **4. Host Country Agreement**

The Host Country Agreement (HCA), formerly the Host Country FFP Agreement or HCFFPA, is expected prior to finalization of the award. However, additional information is provided here for the applicant's consideration.

The HCA establishes the terms and conditions by which an applicant will be able to conduct a Title II program in a specific country in accordance with the applicable requirements of USAID 22 C.F.R. 211 (i.e., Regulation 11). As such, the applicant shall enter into a written HCA with the government of the country in which it is proposing to implement a Title II program. If the program will be implemented in a number of countries within a region, an HCA must be negotiated with each government. Applicants submitting applications to work in countries for which they do not have an HCA should make arrangements well in advance to ensure that a signed HCA is prepared prior to the food aid program approval.

Even though the HCA is expected and preferred prior to finalization of the award, the applicant may submit when asked during the review and approval process (if selected) either the HCA or the Mission Director's determination that the proposed food aid program can be effectively implemented in compliance with 22 C.F.R. 211.

- Note that the Mission Director's determination is not a substitute for an HCA.
- There must first be a written decision by the Mission Director that it is "not appropriate or feasible" for the applicant to have an agreement with the government at this time.
- Following that determination, programs may only be implemented after the Mission Director's determination is made that the program can be implemented without an agreement in place for the time being.
- If an HCA is not in place prior to finalization of the award, the AOR will include the awardee's explanation for the delay with the award language, along with a timetable for awardee's HCA negotiations and anticipated receipt of a signed HCA.

#### **5. Preventing Chronic Malnutrition: The first 1000 Days**

The over-arching goal of preventing malnutrition is related to Millennium Development Goal 1; Target 1c is to...*reduce by half the proportion of people who suffer from hunger*. In contributing to the achievement of this goal, FFP aims to reduce chronic malnutrition among children under five years of age.

In order to achieve this overarching goal, FFP expects development partners to focus on a preventive approach during the first 1,000 days of life (from conception to two years of age)

because this is the period in which women, infants and children are most vulnerable to malnutrition. For FFP, this preventive approach should be food-assisted. Participants in targeted food-insecure areas need to receive conditional food rations based on program participation to prevent the onset of malnutrition *before* it occurs. This population-based approach differs from many MCHN interventions that target children *after* they have become malnourished to help them recuperate from malnutrition. The most important aspect of the conditional food transfer is a “biological” supplementary ration for the mother-child pair that ensures that both mother and child receive essential energy and nutrients during the critical first 1,000 days of life that will help to prevent chronic malnutrition. Such rations also provide an incentive to participate in the program and offset the opportunity costs of participation in the program while the community begins to develop its own capacity for protection of the mother-infant pair. While the mother-child ration is a “biological” supplementary ration and important as part of the conditional food transfer, a household ration is not. The purpose of the household ration is to supplement the household food supply when necessary, prevent sharing, and/or incentivize participation. Applicants should keep in mind that in most cases, the purpose of the household ration is not to improve nutritional status of the household and commodity selection should reflect the actual purpose. Applicants who propose not to distribute preventive food rations during pregnancy and the first six months postpartum and to children from six to twenty-three months in participating communities should justify why this would not be advisable and/or feasible.

Program design for the core interventions in the preventive approach, namely social and behavior change communication (SBCC), and preventive and curative health and nutrition services should consider at a minimum:

- Improving infant and young child feeding practices (including early initiation and exclusive breastfeeding; adequate and timely complementary feeding<sup>7</sup>; promotion of improved complementary feeding using locally available, affordable, and nutritious foods; feeding during and after illness/severe malnutrition; etc.) based on formative research, effective, age-appropriate, individualized personal counseling, and home visits; Improving maternal nutrition and health, with a focus on pregnant and lactating women, WRA, and adolescent girls;
- Improving nutritional status and nutrition awareness among single and newly married WRA, adolescent girls, and their families;
- Increasing access to safe drinking water and appropriate sanitation and improving hygiene practices to prevent diarrhea;
- Increasing diet diversity and dietary quality at the household level, with particular focus on women and children. Activities to support improved dietary diversity and quality may include homestead food production, such as home gardens and a small livestock programs, social and behavior change interventions, and technical solutions like lipid based nutrient supplements (e.g., Nutributter<sup>®</sup>) or micronutrient powders (such as Sprinkles<sup>®</sup>), sachets of vitamins and minerals in powdered form that are used like a condiment on the child’s food;

---

<sup>7</sup> For children 6-23 months of age an optimal diet of age-appropriate complementary foods, in addition to continued breastfeeding, should meet the principles of: **F**requency, **A**mount, **D**ensity and **D**iversity, **U**talization (hygienic preparation and feeding) and **A**ctive Feeding by the mother or caregiver (**FADUA**).

- Improving adoption of key essential nutrition, hygiene, and health practices through effective use of SBCC, including local advocacy. Applicants should include a description of their proposed multisectoral social & behavioral change communication strategy in the application. The adoption and reinforcement of key food security, health, and nutrition-related behaviors by mothers/caretakers, households and the community are central to the reduction of food insecurity (including improvements in agricultural productivity and reductions in malnutrition among children under five and pregnant and lactating women).
- Improving prevention and treatment of childhood illnesses in children under five years of age;
- Improving access to and quality of health services, including birth preparedness and maternity services, immunization, family planning service delivery and communication, as well as nutrition services – most importantly, vitamin A and iron supplementation for children and iron/folic acid supplementation for pregnant and lactating women. Requiring an understanding of the country policy for maternal and child health and nutrition services, what types of health service strengthening may be occurring and what efforts need to be supported, coordinated, and/or facilitated in the areas they propose to cover, taking into account national efforts, bilateral and other efforts, family planning and Global Health Initiative activities aimed at strengthening these services;
- Improving detection of Moderate and Severe Acute Malnutrition (MAM and SAM) and referral of children under five years of age with SAM, focusing on working with health partners to strengthen the capacity of the health services to treat SAM. A preventive program should contribute to decreasing the incidence of acute malnutrition through improvements in health preventive practices such as immunization, deworming, malaria prevention and treatment, community integrated management of childhood illnesses (c-IMCI), growth promotion and monitoring and improved pregnancy spacing
- Ensuring sustainability and consideration of how participation in programs to improve nutrition of women and children during the first 1000 days may be maintained in the absence of food aid, along with a phased out approach that might include food aid in the early stages of other types of incentives and approaches once food security is improved

Since the above interventions are considered essential for preventing maternal and child deaths and malnutrition, the goal should be to ensure that women and children participating in Title II MCHN activities receive an integrated package with as many of these interventions as possible. Baseline quantitative and qualitative assessments may show that emphasis should be placed on one or more of these interventions, and that the others are already adequately provided or will be delivered through the applicant partnering with host government health and nutrition services, other USAID projects, or other organizations. The application should provide information on the type of assessments done or to be done to define the intervention package. It should also describe the platform to be used to deliver the community-based health and nutrition actions including the type of community health workers or volunteers to be used and the client-worker ratio.

## **Family Planning and Reproductive Health<sup>8</sup>**

### *a) Maternal Child Health and Family Planning*

Family planning enables a woman to delay, time, space, and limit her pregnancies to ensure that pregnancy occurs at the healthiest times of her life, and thus helps ensure the healthiest maternal, newborn, and child outcomes. Family planning prevents maternal and newborn deaths by a) reducing the number of births, and hence the number of times a woman is exposed to the risk of maternal mortality; b) preventing unwanted pregnancies, and hence preventing the risk of induced abortion; and c) preventing demographically high-risk pregnancies.

In order to promote a healthy outcome for both mother and baby, all women, including adolescent girls, should have the information and access to services that allow them to choose whether and when to become pregnant, enter pregnancy infection free and with good nutritional status, have access to skilled care for delivery, postpartum care and continued reproductive health care. To reduce unmet need and enhance maternal health USAID promotes rights-based, client-centered family planning services that respond to the needs of all women and increase the method mix of services promoted and available.

### *b) Integrating Family Planning Funding Opportunities with Food Security Programs*

The Advancing Partners & Communities (APC) project is a USAID Cooperative Agreement implemented by JSI Research & Training Institute, Inc. (JSI) and FHI 360. The APC project will periodically invite Title II recipients an opportunity to apply for small grants that aim to integrate quality family planning activities into existing development projects in USAID PRH priority countries. In order to remain up-to-date on the solicitation opportunities available through APC, Title II recipients are encouraged to remain current on the APC Grants website at: <http://www.advancingpartners.org/grants>.

### Commodity Selection and Ration Design

The *Commodity Reference Guide* will be revised and updated based on both Food Aid Quality Review recommendations as well as other ongoing studies. Revisions of Commodity Fact Sheets are posted on the FFP website and can be found here: <http://www.usaid.gov/what-we-do/agriculture-and-food-security/food-assistance/resources/implementation-tools/commodity>

In terms of community management of acute malnutrition, note that FFP policy does allow, at this time, the purchase of ready to use therapeutic and supplementary foods (RUTF and RUSF) with Title II funds (specifically, either with section 202(e) funds with certain conditions or with cash proceeds from monetization).

The World Food Program (WFP) formulation of CSB+ is now available through the Title II commodity list, offering improvement in zinc and iron levels.

---

<sup>8</sup> Title II applicants considering including family planning messages or referral to family planning services as a part of Title II programming must abide by the USG Tiahrt Amendment that forbids requiring participation in a family planning program as a condition of receiving other benefits such as food support or health care. Awardees must be extremely cautious and ensure there is no perception that receipt of other benefits, such as a ration, is linked with family planning in any way.

Suggested Links related to health and nutrition programming:

- World Health Organization's 2003 publication: [\*Guiding Principles for Complementary Feeding of the Breastfed Child\*](#)
- [\*The Essential Nutrition Actions \(ENA\) Framework , The Nutrition Program Design Assistant \(NPDA\): A Tool for Program Planners\*](#) on the Core Group website and [\*The Grandmother Project\*](#)
- [\*Food Security and Nutrition Network SBC Task Force Approved SBC Tools and Methods\*](#)
- [\*Integrating Family Planning and Maternal and Child Health Care: Saving Lives, Money, and Time \(Population Reference Bureau\).\*](#)

Note that additional important considerations in relation to health and nutrition programming can be found in the [\*FAFSA II Maternal and Child Health and Nutrition chapter\*](#) and the [\*Food Aid Quality Review\*](#).

## 6. Motor Vehicle Procurement Table

If procurement of any motor vehicles is requested in the application for the prime, members of a consortium, and/or sub-awardees, the applicant (i.e., the prime) should include a table with the following information for all vehicles (included in the budget(s)):

- Type and number of motor vehicles (includes motorcycles);
- Manufacturer/make, model, and year of motor vehicles;
- Planned uses of motor vehicles, including who will retain title;
- Estimated cost of each motor vehicle;
- Funding source for each motor vehicle; and
- Fiscal year during which each procurement is planned.

The applicant must specify who will use the vehicles; when and how purchases and transfers to consortium members and/or sub-awardees would occur; and a rationale for the purchase or long-term lease and all vehicles (US and non-US) in text accompanying the table.

For subsequent applications from previous or expiring Title II programs, applicants should provide in table format:

- The size and condition of the current motor vehicle fleet;
- Age of each motor vehicle;
- Funding source for each motor vehicle;
- Use of motor vehicles by activity; and
- Plans for maintenance and replacement

Supporting text regarding the history of the motor vehicle fleet and its procurement by the applicant in the country should also be included.

A Mission concurrence cable is required prior to the signing of an award with details pertaining to Mission vehicle procurement policies.

## **7. Branding Strategy and Marking Plan**

The Branding Strategy and Marking Plan is required for successful applicants only; it is **not** required upon submission of the application. Additional information on branding strategies and marking plans is provided here for the applicant's consideration. Nonprofit applicants are required to comply with 22 C.F.R. 226.91 and USAID Acquisition and Assistance Policy Directive (AAPD) 05-11 and complete a branding strategy and marking plan (BS/MP) with each award. If the application is apparently successful, the applicant will be required to submit an acceptable BS/MP as a prerequisite for any resulting award.

Note that because USAID's branding and marking requirements have cost implications, such costs should be included in the application budget even if the applicant does not submit its BS/MP with the application. These rules do not apply to public international organizations (PIOs).

USAID approved Marking Plans may be waived pursuant to conditions set forth in 22 C.F.R. 226.91(j).

Agency branding and marking guidance can be found in [ADS Chapter 320](#), Branding and Marking (contains instructions on how to prepare the branding strategy and marking plan) and on the [USAID website](#) (contains samples of the USAID logo in various formats).

USAID requires the recognition of the contributions of the American people extended under this Agreement. In this regard, awardees are reminded of the requirements to acknowledge USAID funding of projects and programs as required by the Standard Provisions. In publications and media products, awardees will apply, where appropriate, the Agency branding standards published in the Agency's Graphics Standards Manual. Awardees should also note that the acknowledgement of the U.S. Agency for International Development as a funding source may be applied where texts are publicly published.

## **8. Country Specific Information**

Country-specific information for Burundi, Madagascar, and Malawi is found on the USAID/FFP website under the heading "[Country Fact Sheets](#)" by country name.

## **ANNEX I: Definitions**

**Call Forward:** A request by the awardee for food aid commodities for distribution and/or monetization to be procured for use in approved programs in a timely manner.

**Carryover:** Food aid commodities or funds unused during a fiscal year that are transferred to the budget or planning levels for the following financial or reporting year.

**Delayed Shipping:** The practice when an awardee places a call-forward that requests a U.S. load port date later than the traditional procurement schedule. For example, in the traditional procurement schedule, if a call-forward was entered in WBSCM by May 10th and approved by USAID for the June purchase, it would have a July U.S. load port date. In the delayed shipping practice, the call-forward that was entered in WBSCM by May 10th and approved by USAID for the June purchase may have an October U.S. load port date. Commodity requests are entered based on the standard call forward schedule, but the date by which the commodity suppliers are required to deliver them to the specified U.S. load port is extended a maximum of two to three months beyond the standard delivery period. All commodities purchased in the current fiscal year must be loaded on board the contracted vessel prior to end of that calendar year.

**Direct beneficiaries:** Those who come into direct contact with the set of interventions (goods or services) provided by the program in each technical area. Individuals who receive training or benefit from program-supported technical assistance or service provision are considered direct beneficiaries, as are those who receive a ration or another type of good. Note that all recipients are beneficiaries, but not all beneficiaries are necessarily food ration recipients. Services include training and technical assistance provided directly by program staff, and training and technical assistance provided by people who have been trained by program staff (e.g., agricultural extension agents, village health workers). If cooperatives or organizations receive training or technical assistance from the program, all members of the cooperative/organization are considered direct beneficiaries. In a Food for Training (FFT) program, the direct beneficiaries are those trained under the program. In a Food for Work (FFW) or Food for Assets (FFA) program that is implemented as a stand-alone activity (e.g., not as part of a wider set of interventions), direct beneficiaries are those who directly participate in the activity (i.e., receive a ration), not all of those who use or benefit from the infrastructure/asset created (e.g., a road). If a FFW or FFA activity forms part of a set of activities in a program element (e.g., FFW to build irrigation infrastructure, accompanied by technical assistance in new cultivation techniques and water management to a targeted group of farmers), the direct beneficiaries include FFW participants and the farmers receiving the technical assistance and the two groups may overlap. In the case of food rations, direct beneficiaries include the individual recipient in the case of individual rations, and the recipient plus his/her family members in the case of family rations.

Direct beneficiaries do not include those who benefit indirectly from the goods and services provided to the direct beneficiaries, e.g., members of the household of a beneficiary farmer who received technical assistance, seeds and tools, other inputs, credit, livestock, etc.; farmers from a neighboring community who might observe the effects of the training and demonstration plots in the target community and decide to adopt or model the new practices themselves; the population of all of the communities in a valley that uses a road improved by FFW; or all individuals who may have heard a radio message about prices, but who did not receive the other elements of an

agricultural intervention necessary to increase incomes. Such individuals are considered indirect beneficiaries.

**Direct Distribution Food Aid Commodities:** Food aid commodities that are provided directly to beneficiaries as in-kind take home rations or for on-site feeding (versus food aid commodities sold for monetization proceeds).

**Environmental Safeguards:** Components of a program that are developed as part of the activities' design to deal with mitigating potentially foreseeable negative environmental impacts of program activities, maintaining ecological goods and services and promoting their sustainable management by community stakeholders. In USAID programs, environmental safeguards are incorporated into application design and implementation under the mandate of the USAID environmental compliance regulation, 22 CFR 216.

**Fiscal Year (FY):** The U.S. Government's fiscal year begins October 1 and ends the following September 30.

**Gender:** Gender refers to the socially constructed (rather than biologically determined) roles of men and women as well as the relationships between women and men in a given society at a specific time and place. Gender is not sex. Gender roles and relationships are learned and vary across cultures and over time. Understanding these roles and relationships and how they impact upon development outcomes is a key objective of gender integration. Designing appropriate interventions (based on an understanding of these roles and relationships through a gender analysis) and integrating gender into food security and nutrition programming improves the development outcomes of these programs. As of FY2010, FFP requires gender to be integrated throughout development food aid programs, and as of FY2011 FFP requires gender to be addressed in applications for emergency food aid programs. (Adapted from Human Rights and Justice Group's Gender and Development training)

**Gender Analysis:** A gender analysis examines the different but interdependent roles of men and women and the relations between the sexes. It also involves an examination of the rights and opportunities of men and women, power relations, and access to and control over resources. Gender analysis identifies disparities, investigates why such disparities exist, determines whether they are detrimental, and, if so, looks at how they can be remedied. (From FFP Occasional Paper 7)

**Gender Equality:** Gender equality concerns women and men, and it involves working with men and boys, women and girls to bring about changes in attitudes, behaviors, roles and responsibilities at home, in the workplace, and in the community. Genuine equality means more than parity in numbers or laws on the books; it means expanding freedoms and improving overall quality of life so that equality is achieved without sacrificing gains for males or females. (USAID definition)

**Gender Equity:** The process of being fair to women and men. To ensure fairness, measures must often be available to compensate for historical and social disadvantages that prevent women and men from otherwise operating on a level playing field. Equity leads to equality. (From FFP Occasional Paper 7)

**Gender Integration:** Gender integration involves identifying, and then addressing, gender inequalities during strategy and project design, implementation, and monitoring and evaluation. Since the roles and power relations between men and women affect how an activity is implemented, it is essential that project managers address these issues on an ongoing basis. (USAID definition)

**Initial Environmental Examination (IEE):** An environmental impact analysis, required as a condition for disbursement of program funding, as per USAID environmental regulation 22 CFR 216, the IEE analyzes potentially foreseeable impacts resulting from program activities.

**Indirect Beneficiaries:** Indirect beneficiaries are those who benefit indirectly from the goods and services provided to the direct beneficiaries (as defined above). For example, indirect beneficiaries include: members of the household of a beneficiary farmer who received technical assistance, seeds and tools, other inputs, credit, livestock, etc.; farmers from a neighboring community who might observe the effects of the training and demonstration plots in the target community and decide to adopt or model the new practices themselves; the population of all of the communities in a valley that uses a road improved by a food for work activity; or all individuals who may have heard a radio message about prices, but who did not receive the other elements of an agricultural intervention necessary to increase incomes.

**LOA:** Life of award.

**Metric ton(s) (MT):** The standard unit of measurement for Title II commodities. One metric ton equals 1,000 kilograms.

**Monetization and Monetization Proceeds:** The sale of food aid commodities to obtain cash for use in development food assistance programs. Awardees monetize U.S. Government-donated food aid commodities to generate cash resources (proceeds) to cover expenses associated with implementing development programs. Monetization can be conducted by direct negotiation or through sealed-bid auctions. Typical buyers include governments, parastatals, wholesalers and mid-level merchants.

**Recipient:** A recipient is a direct receiver of a food aid ration. Each projected recipient should be counted once, regardless of the number of months they will receive food aid. In other words, a recipient who will receive a food aid ration for 12 months is counted once, as is a recipient who will receive a food aid ration for three months.

### **Program Elements**

**Program Element:** The general category or focus of activities for Food for Peace resources in the form of direct distribution food aid commodities, monetization proceeds, section 202(e) funds and ITSH funds. The fourteen program elements are defined below.

**Civic Participation:** Strengthen the capacity of Civil Society Organizations (CSOs) for policy analysis, advocacy, coalition-building, internal governance, membership representation and

services, and engage in other activities aimed at fostering more peaceful and democratic societies. Areas of capacity building may include, but are not limited to, technical expertise (e.g. human rights, legal reform); CSO self-regulation (e.g. establishing NGO Codes of Conduct); organizational capacity (e.g. strategic planning, financial management and accountability, public relations, issue management, and outreach, revenue generation, accountable fundraising); and targeted advocacy training and technical assistance.

**HIV/AIDS:** Reduce the transmission and impact of HIV/AIDS through support for prevention, care and treatment programs.

**Maternal and Child Health:** Increase the availability and use of proven life-saving interventions that address the major killers of mothers and children and improve their health status, including effective maternity care and management of obstetric complications; prevention services including newborn care, routine immunization, polio eradication, safe water and hygiene; and treatment of life-threatening childhood illnesses.

**Family Planning and Reproductive Health:** Expand access to high-quality voluntary family planning services and information, and reproductive health care. This element contributes to reducing unintended pregnancy and promoting healthy reproductive behaviors of men and women, reducing abortion, and reducing maternal and child mortality and morbidity.

**Water Supply and Sanitation:** Objectives include improving water and sanitation infrastructure and practices. Activities include: organizational, technical and financial support for water and sanitation services; promotion of practices that protect water supplies from contamination by improper handling of domestic water supplies, household waste and inadequate sanitation; promotion of improved hygiene practices and behavior change; and, provision of technical assistance and training to enable communities to properly operate and maintain the new/rebuilt facilities. Food rations are used to build water and sanitation-related infrastructure.

**Nutrition:** Increase availability and use of proven nutrition interventions to reduce mortality, morbidity, and food insecurity, including nutrition education to improve maternal diets, nutrition during pregnancy, exclusive breastfeeding, and infant and young child feeding practices; fortified or biofortified staple foods, specialized food products, and community gardens to improve consumption of quality food; and delivery of nutrition services including micronutrient supplementation and community management of acute malnutrition. Strengthen host country capacity by advancing supportive nutrition and food security policies and improving nutrition information systems.

**Basic Education:** Improve early childhood education, primary education, and secondary education, delivered in formal or non-formal settings. It includes literacy, numeracy, and other basic skills programs for youth and adults.

**Social Assistance:** Cash or in-kind transfers to the poor or to those suffering from temporary shocks. Health services provided in-kind should be captured under the respective health element(s).

**Agricultural Sector Capacity:** Sustain the productivity of the agricultural sector through investments that foster increasing returns to land, labor, and capital. Targeted interventions to male and female producers provide improvements in technology and management practices, expanded access to markets and credit, increased organizational and market efficiency, and restoration and protection of resiliency in production and livelihood systems.

**Strengthen Microenterprise Productivity:** Support the start-up and expansion of self-employment and micro and small enterprises owned and operated by low-income people.

**Natural Resources and Biodiversity:** Conserve biodiversity and manage natural resources in ways that maintain long-term viability and preserve the potential to meet the needs of present and future generations. Activities include combating illegal and corrupt exploitation of natural resources and the control of invasive species. Programs in this element should be integrated with the Agriculture Area under Economic Growth and Conflict Mitigation and Reconciliation Area under the Peace and Security Objective, when applicable and appropriate.

**Protection and Solutions:** Ensure full respect for the rights of the individual and communities in accordance with the letter and the spirit of the relevant bodies of law (international humanitarian, human rights, and refugee law). This involves both legal and practical approaches for implementation in humanitarian situations, including efforts to ensure humanitarian access, incorporate protection strategies in assistance programming and other measures to reduce vulnerability and uphold human dignity for all victims of conflict and disasters. Activities included herein should be linked to relevant GJD/Human Rights elements.

**Assistance and Recovery:** Provide goods, personnel, services and assistance to meet basic human needs in order to foster transition from relief according to principles of universality, impartiality and human dignity. This element should be employed, when possible, as part of an integrated, coordinated and/or multi-sectoral approach.

**Capacity Building, Preparedness and Planning:** Improve the ability of the USG, host countries and other partners to prepare for and mitigate the effects of disasters, including both natural disasters and complex emergencies, in a manner that accommodate varying physical, cultural and social abilities to move freely and access information and services. Activities under this component include any efforts to enhance the capacities of the USG (in Washington and in the field), humanitarian assistance providers, national host-country authorities, and local communities to engage in disaster reduction and response activities. Activities consist of standardized and coordinated assessments, monitoring, information sharing, data and situational analysis, joint planning; enhancement of coping mechanisms, including the capacity to address adaptation to constantly changing situations on the ground including climate variability and climate change.

## **ANNEX II – Gender: Title II Development Food Assistance Programs**

### **PART A: Guide to Creating Gender Indicators and Gender Integration**

This section is intended to assist partners who may want further guidance on how to integrate gender into their applications. It provides information on how to create gender indicators and apply these indicators as a part of the project design.

#### **1. What are indicators?**

Indicators are standards used to measure the results of a project. Indicators can be both quantitative and qualitative and are criteria or measures against which changes can be assessed towards a specific objective. Indicators provide a closer look at the results of program activities, and for this reason, they are the front-line instruments in the monitoring and evaluation of development work.

#### **2. What are gender-sensitive indicators?**

Gender-sensitive indicators are indicators that track gender related changes over time and measures progress toward gender equality through a number of ways. They should be created and applied in a way that examines the unique experiences and roles of men, women, boys and girls. These indicators should lead to a better understanding of how program activities impact, both positively and negatively, the lives of men, women, boys and girls. Gender-sensitive indicators should highlight any gaps between men and women in terms of access to and control over resources, division of labor, needs, constraints, opportunities and capacities, and the interest of men and women (and boys and girls) in a given context. These indicators should be collected in a manner that allows for data to highlight any obstacles and achievements towards attaining project goals specifically, and development goals generally. While indicators by themselves do not completely capture men's or women's experiences, they can be used to highlight the need to address and/or guide programmatic decisions at the local, regional, and national level.

#### **3. How do you create gender indicators?**

There is no universal set of gender indicators applicable in every setting. Yet, indicators should be designed and adapted to fit the purpose of the project goals and evaluation activities. Gender indicators should reflect the known gender issues within a specific context, as well as be inclusive of results from the gender analysis. It is important to consider how indicators will be collected and progress monitored throughout the duration of a program in order to yield data of the highest quality and utility. To be useful for performance monitoring and credible for reporting, indicators should reasonably meet these five standards of data quality (see USAID ADS 203):

- 1) Validity:** Data should clearly and adequately represent the intended result;
- 2) Integrity:** Data collected should have safeguards to minimize the risk of transcription error or data manipulation;
- 3) Precision:** Data should have a sufficient level of detail to permit management decision-making; e.g. the margin of error is less than the anticipated change;

- 4) **Reliability:** Data should reflect stable and consistent data collection processes and analysis methods over time; and
- 5) **Timeliness:** Data should be available at a useful frequency, should be current, and should be timely enough to influence management decision-making.

#### 4. What does gender integration mean?

Gender integration involves identifying, and then addressing, gender inequalities during strategy and project design, implementation, and monitoring and evaluation. Since the roles and power relations between men and women affect how an activity is implemented, it is essential that program staff address these on an on-going basis.

### **PART B: ADS 205 and Gender Analysis**

Gender analysis is a subset of socio-economic analysis. It is a social science tool used to identify, understand, and explain gaps between males and females that exist in households, communities, and countries. It is also used to identify the relevance of gender norms and power relations in a specific context (e.g., country, geographic, cultural, institutional, economic, etc.). Such analysis typically involves examining:

- Differences in the status of women and men and their differential access to assets, resources, opportunities and services;
- The influence of gender roles and norms on the division of time between paid employment, unpaid work (including subsistence production and care for family members), and volunteer activities;
- The influence of gender roles and norms on leadership roles and decision making; constraints, opportunities, and entry points for narrowing gender gaps and empowering females; and
- Potential differential impacts of development policies and programs on males and females, including unintended or negative consequences.

There are different gender analysis frameworks and there is no one framework that has been adopted as the standard USAID approach. Nevertheless, most gender analysis frameworks involve collecting quantitative and qualitative information in the following areas. Missions and Bureaus must include as many of the domains listed below, as possible, in their gender analyses:

#### **Domains of Analysis to include in gender analysis:**

- **Laws, Policies, Regulations, and Institutional Practices** that influence the context in which men and women act and make decisions.
- **Cultural Norms and Beliefs:** Every society has cultural norms and beliefs (often expressed as gender stereotypes) about what are appropriate qualities, life goals, and aspirations for males and females.
- **Gender Roles, Responsibilities, and Time Used:** The most fundamental division of labor within all societies is between productive (market) economic activity and reproductive (non-market) activity.

- **Access to and Control over Assets and Resources:** A key component of gender analysis is an examination of whether females and males own and/or have access and the capacity to use productive resources – assets (land, housing), income, social benefits (social insurance, pensions), public services (health, water), technology – and information necessary to be a fully active and productive participant in society.
- **Patterns of Power and Decision-making:** This domain of gender analysis examines the ability of women and men to decide, influence, and exercise control over material, human, intellectual, and financial resources, in the family, community and country.

At the project level, the gender analyses should dig deeper and identify the:

- Relevant gaps in the status and anticipated levels of participation of women and men (including age, ethnicity, disability, location, etc.) that could hinder overall project outcomes;
- Differences in the status of women and men (e.g., economic, political, etc.) that could be closed as a result of the project; and 07/17/2013 New Edition ADS Chapter 205
- Possible differential effects the project might have on men and women.

### **ANNEX III – FFP INITIAL ENVIRONMENTAL EXAMINATION (IEE)**

**Environmental Safeguards and Compliance:** The role of environmental compliance and management in FFP food assistance programs is to enhance the resiliency of over-exploited natural resources, improve environmental health, strengthen partner-country environmental governance and community resilience to climate and other environmental changes. To uphold Agency environmental policies and procedures, the internationally-accepted environmental impact assessment methodology is incorporated into program design and implementation across FFP programs to support USAID in meeting the goals of disaster resilience, prevention, response, recovery and transition while protecting the environment.

As of FY 2014, all USAID development food assistance proposals will draw direction from the FFP Request for Applications Initial Environmental Examination (RFA-IEE), which sets in place the strategic, high-level environmental safeguards and [22 CFR 216](#) policies. The RFA-IEE presents potential environmental impacts of common FFP activities, such as agricultural commodity fumigation and energy cooking needs, as well as, recommendations for integration of environmental safeguards into other sectors of proposal design.

All FFP RFA applicants must review and apply requirements from this RFA IEE. The current link to the RFA-IEE for the FY14 FFP RFA is on the Agency's environmental compliance database website with a hyperlink at "source(s)" labeled "DOC":

1. Annual monitoring indicators should be reported on each fiscal year. Impact indicators need only be reported for those years determined by the awardee as appropriate by the awardee's monitoring and evaluation plans.
2. Clearly specify the applicant name, potential host country and page numbers on each page of the indicator performance tracking table.
3. Potential food aid programs implementing activities to improve health, nutrition and/or hygiene behaviors should define those behaviors being measured, such as improved personal, food, water and/or environmental hygiene.
