|              |               | Page      | Section | Para. |                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                             |           |
| 1            | 7/2/2024      |           |         |       | Is there bathymetry data currently available for Pearson Creek and Harpers Creek?                                | No bathymetry data has been collected for Harper's/Pearson Creek.                                                                                                                                                                                                                                                                                                           | 0001      |
| 2            | 7/2/2024      |           |         |       | Is the Navy amenable to beneficial reuse of dredge material for sand fill?                                       | Is the dredge material from off site? If yes, it must be from within similar nearby watersheds and "clean" to avoid contamination.                                                                                                                                                                                                                                          | 0001      |
| 3            | 7/2/2024      |           |         |       | Are there more detailed erosion reports that support the mapping of erosion priorities across the study reaches? | There is a 2014 report available that includes documentation of erosion on all reaches shown in Figure 1 (map) that was provided prior to the site visit. There are no other more recent reports available. We also have some data for rebar bank pins that were installed to monitor erosion rates. Data is sporadic but may be useful, map and data attached to response. | 0001      |
| 4            | 7/2/2024      |           |         |       | Are there any limits on the types/sizes of vessels allowed on Harper's/Pearson Creek?                            | Limits are due to existing conditions, not base regulations. Sites can be accessed from the river with access passes, but passage under the bridge is not very tall. Access can also be from the site visit boat ramp but then there is a shallow section to navigate when moving from Harper's to Pearson Creek.                                                           | 0001      |
