3DEP FY23-25 Federal Areas of Interest

The goal of 3DEP is national coverage. This map reflects current near-term federal agency areas of interest for lidar data acquisition in areas without 3DEP coverage. Overlap with these areas in pursuit of national 3DEP coverage is encouraged and is one of several evaluation criteria defined within the BAA. All proposals will be reviewed against the full set of evaluation criteria. Final FY23 acquisition areas will be defined based on submitted and accepted proposals as well as analysis of existing data holdings and work in progress. Final program of work is subject to available funding.
