

3DEP FY21-23 Federal Areas of Interest

The goal of 3DEP is national coverage. This map reflects current near-term federal agency areas of interest for lidar data acquisition. Overlap with these near term federal agency areas of interest is encouraged and is one of several evaluation criteria defined within the BAA, however 3DEP welcomes proposal submissions over the entire United States in pursuit of national 3DEP coverage. All proposals will be reviewed against the full set of evaluation criteria. Final FY21 acquisition areas will be defined based on submitted and accepted proposals, as well as analysis of existing data holdings and work in progress. Final program of work is subject to available funding.
