# [Expectation 1] Develop and implement a disparity impact statement (pages 7-8)

- OMH expects the recipient to develop a disparity impact statement to identify racial and ethnic minority populations at highest risk for experiencing health disparities associated with policies that contribute to structural racism.
- The disparity impact statement should also include a description of how the recipient will use program implementation data and apply the National Standards for Culturally and Linguistically Appropriate Services in Health and Health Care (National CLAS Standards) to support quality improvement and ensure the project is implemented in a culturally appropriate manner (http://thinkculturalhealth.hhs.gov).

# [Expectation 2] Identify or create a methodological framework, structured process, and tool (page 8)

- Within six months of project start date, OMH expects the recipient to convene MP-CPI-21-004 recipients to collectively identify or create the methodological framework, structured process and tool for identifying policies that create or perpetuate health disparities by contributing to structural racism.
- The methodological framework is expected to provide the theoretical basis for the policy effort, while the structured process provides guidance on how to use the tool to assess and identify policies.
- The framework, process, and/or tool may be built upon those which already exist, and should align with current relevant research.

# [Expectation 3] Develop strategies for addressing identified structural racism in policies (pages 8-9)

OMH expects the recipient to develop strategies for addressing identified structural racism in policies. These strategies should be supported by research and best available evidence. They must be developed in collaboration with the MP-CPI-21-004 recipients.

# [Expectation 4] Recruit additional participant organizations (page 9)

- In Year 2, OMH expects the recipient to recruit self-funded participant organizations to implement the framework, process, and tool and contribute evaluation data.
- These self-funded participant organizations must demonstrate readiness to implement the framework, process, and tool; create new or modify existing policies designed to reduce health disparities by addressing structural racism; implement the new or modified policies; and contribute evaluation data within the project period.

# [Expectation 5] Develop and implement a technical assistance plan (page 9)

OMH expects the recipient to provide technical assistance to MP-CPI-21-004 recipients to:

- support their implementation of the methodological framework, structured process, and tool to identify policies
- create new or modified policies designed to reduce health disparities by addressing structural racism
- implement those new or modified policies
- implement the strategies developed for addressing identified structural racism in policies
- support their development of sustainability plans

In Year 2, OMH expects the recipient to expand TA to the additional partner organizations not funded through this initiative.

# [Expectation 6] Evaluate the implementation of the methodological framework, structured process, tool, and strategies (pages 9-10)

OMH expects the recipient to:

- implement a process and outcomes evaluation to evaluate the overarching initiative
- provide the measures and data collection protocol to the participating sites
- collect data from the participating sites and lead the evaluation of the implementation, utility, and impact of the methodological framework, structured process, and tool and of the impact of new or revised policies on improving health outcomes among the participating sites' populations of focus

# [Expectation 6] Evaluate the implementation of the methodological framework, structured process, tool, and strategies (pages 9-10) – Cont.

The evaluation should assess the extent to which:

- the methodological framework, structured process, and tool provided clear and unambiguous guidelines that allow for the identification of policies that create or perpetuate health disparities by contributing to structural racism
- implementation of the methodological framework, structured process, tool, and strategies result in the development of new policies that address structural racism
- implementation of the methodological framework, structured process, and tool will lead to the implementation of new or modified policies designed to reduce health disparities by addressing structural racism
- implemented policies resulted in improved health outcomes among racial and ethnic minority populations that are measurable within the project period, or have clear, demonstrated potential to lead to improved health outcomes after the project period.

# [Expectation 7] Document and disseminate project findings (pages 10-11)

OMH expects the recipient to:

- document in a final report the overall findings of the Framework to Address Health Disparities through Collaborative Policy Efforts initiative, lessons learned, and opportunities for future research, replication, sustainability and other efforts
- document the methodological framework, structured process, and tool, such that the implementation process can be replicated in other communities
