

Applicant Questions #3:

As our mining faculty develops our proposal, is it permissible to talk with KTI's mining department our project concept to gather their input on their needs? Please let me know if this okay for us to do, or if we should only count on talking to KTI about design if awarded.

The activities in the notice were developed in cooperation with the school (KTI). Contacting KTI is not recommended. If your institution qualifies for the award, we will work with you on how to engage with the school.
