DEPARTMENT OF ENERGY

[DOE Docket No. 202–22–1]

Emergency Order Issued to the California Independent System Operator Corporation To Operate Power Generating Facilities Under Limited Circumstances in California as a Result of Extreme Weather

AGENCY: Office of Cybersecurity, Energy Security, and Emergency Response; Department of Energy.

ACTION: Notice of emergency action.

SUMMARY: The U.S. Department of Energy (DOE or the Department) is issuing this Notice to document emergency actions that it has taken pursuant to the Federal Power Act. California experienced several periods of extreme heat, drought conditions, and threat of wildfires. California Governor Gavin Newsom issued a proclamation declaring a state of emergency regarding increased electrical demand and generation. Because the additional generation may result in a conflict with environmental standards and requirements, the DOE authorized only the necessary additional generation, allowing CAISO to sufficiently supply the necessary amount of energy needed to prevent electrical disruption.

FOR FURTHER INFORMATION CONTACT: For further information on this Notice, or for information on the emergency activities described herein, contact Kenneth Buell, (202) 586–3362, *Kenneth.Buell@hq.doe.gov,* or by mail to the attention of Kenneth Buell, CR–30, 1000 Independence Ave. SW, Washington, DC 20585.

SUPPLEMENTARY INFORMATION: The Order and all related information are available here: *https://www.energy.gov/ceser/federal-power-act-section-202c-caiso-september-2022*.

Background

Section 202(c) of the Federal Power Act

The U.S. Department of Energy is issuing this Notice pursuant to 10 CFR 1021.343(a) to document emergency actions taken in accordance with section 202(c) of the Federal Power Act (FPA) (16 U.S.C. 824a(c)). FPA section 202(c) provides that ''[d]uring the continuance of any war in which the United States is engaged, or whenever the [Secretary of Energy] determines that an emergency exists by reason of a sudden increase in the demand for electric energy, or a shortage of electric energy or of facilities for the generation or transmission of electric energy, or of fuel or water for generating facilities, or other causes, the [Secretary of Energy] shall have authority, either upon [her] own motion or upon complaint, with or without notice, hearing ore report, to require by order such temporary connections of facilities and generation, delivery, interchange, or transmission of electric energy as in [her] judgment will best meet the emergency and serve the public interest.

1. Request for Emergency Order From the California Independent System Operator Corporation

On September 1, 2022, the California Independent System Operator Corporation (CAISO) submitted to the Department a Request for Emergency Order under section 202(c) of the Federal Power Act (Application) with the Department ''to preserve the reliability of bulk electric power system in California.'' In its Application, CAISO cited extreme heat and forecasted a supply deficiency to meet demand during peak demand hours. CAISO requested the authority to direct the operation of three natural gas-fired generating resources capable of providing 28 megawatts of additional generation supply (the Covered Resources). CAISO stated that the emergency order it was requesting could result in exceedances of National Ambient Air Quality Standards under the Clean Air Act. Given the permit limits of the Covered Resources, CAISO anticipated that the additional capacity could not be made available absent an order under FPA section 202(c).

2. CAISO Order

On September 2, 2022, the Acting Under Secretary for Infrastructure, acting pursuant to delegated authority, issued Order No. 2022–22–1 (the CAISO Order). As set forth in the CAISO Order, the Acting Under Secretary for Infrastructure found that an emergency exists in California due to a shortage of
